

PRESENTATION

“My future job or how I met ur mother”

Chizhikov Arslanbek

My future job:

As a child, I did not want to be a doctor, but this does not mean that it is not necessary to wear a uniform in the treatment of poor cows.

What I could do in 11 years if I didn't want to be a doctor:

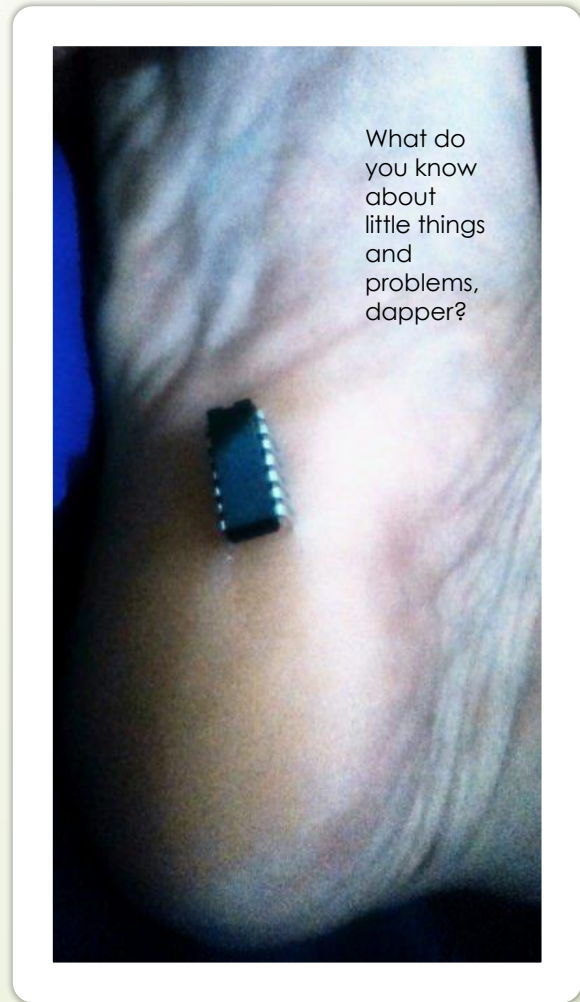

If I ran at a speed of 1675 km/h, I would have run around the earth 11 times.

I would have been able to finish school, or rather build another one and pass exams in it.

Eternal problems:

It is very important not to make a mistake while treating a person, because every little thing depends on his life.

Desirable places of each entrant:

MSMU is one of the best medical institutions not only in Russia but also in the world. It has a huge history and the best teachers from all over the country. Every future doctor wants to be there

Why I need English in my life:

1. I want to humiliate people beautifully.
2. I want to learn the swear word in English.
Why?
3. I want finally something to answer the cries of English-speaking rivals in the games.

The End
