

My school in the future

A futuristic school courtyard with a glass and steel dome. The ground is covered in green grass. In the foreground, a man in a white suit is sitting on a yellow, wavy bench. In the background, several people in white uniforms are standing near a large digital display. The architecture features white columns and arches, and the sky is visible through the glass dome.

The teacher of English: Likhach Eugene

A future school...

What is it? What is it like?

Every pupil dreams about his/her own school...

The most wonderful building with glass walls, without doors, with lasers. All the building flies in the air. There are great flowerbeds with fountains in front of the school, and a perfect stadium behind the school. With the help of modern technologies you can change the colours of your classroom. Every pupil has a sensor screen in the deck except the blackboard.

In the first form pupils study how to write and draw but in the second form they study how to use the computer. Any pupil can choose any language he/she wants to study at school. All the lessons last 45 minutes and the breaks – 20 minutes. There are only 5 lessons every day!

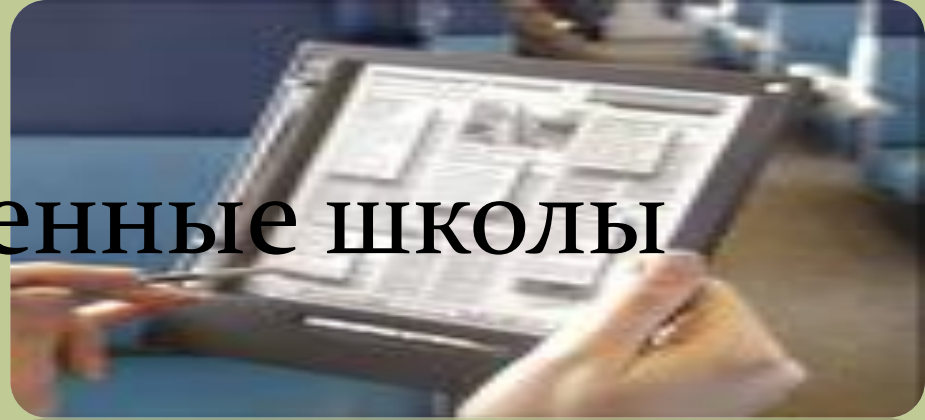

- In every classroom there will be pupils who have similar attitude towards life. Pupils should wear a special uniform with the colours of the emblem of the school. In such school pupils and teachers will pay attention to the knowledge but not to the marks.

Every pupil can serve the Internet with the help of the Electronic Library (EL) and has an electronic book. You can find EVERY book in this Library!!!

Новые современные школы

All the students will have iPads except books. iPad can be used as a walkman and a reader.

Pupils can connect with the On-Line Library or with their teacher and ask necessary questions to them.
There are no schoolbags, pens and pencils.

The school of Future is not a dream but reality!

What about a teacher? What will he/she be like?..

Миссия учителя и в будущем будет такой же, как сейчас:

*Учить, вести, дарить
И целый мир великих тайн
С учеником открыть!
И я желаю учителю будущего:
Шагай же смело, не робей.
Неси свечу добра
Для мира, школы, для детей...
(Дерябина В.В.)*

What will the teacher be like in future?

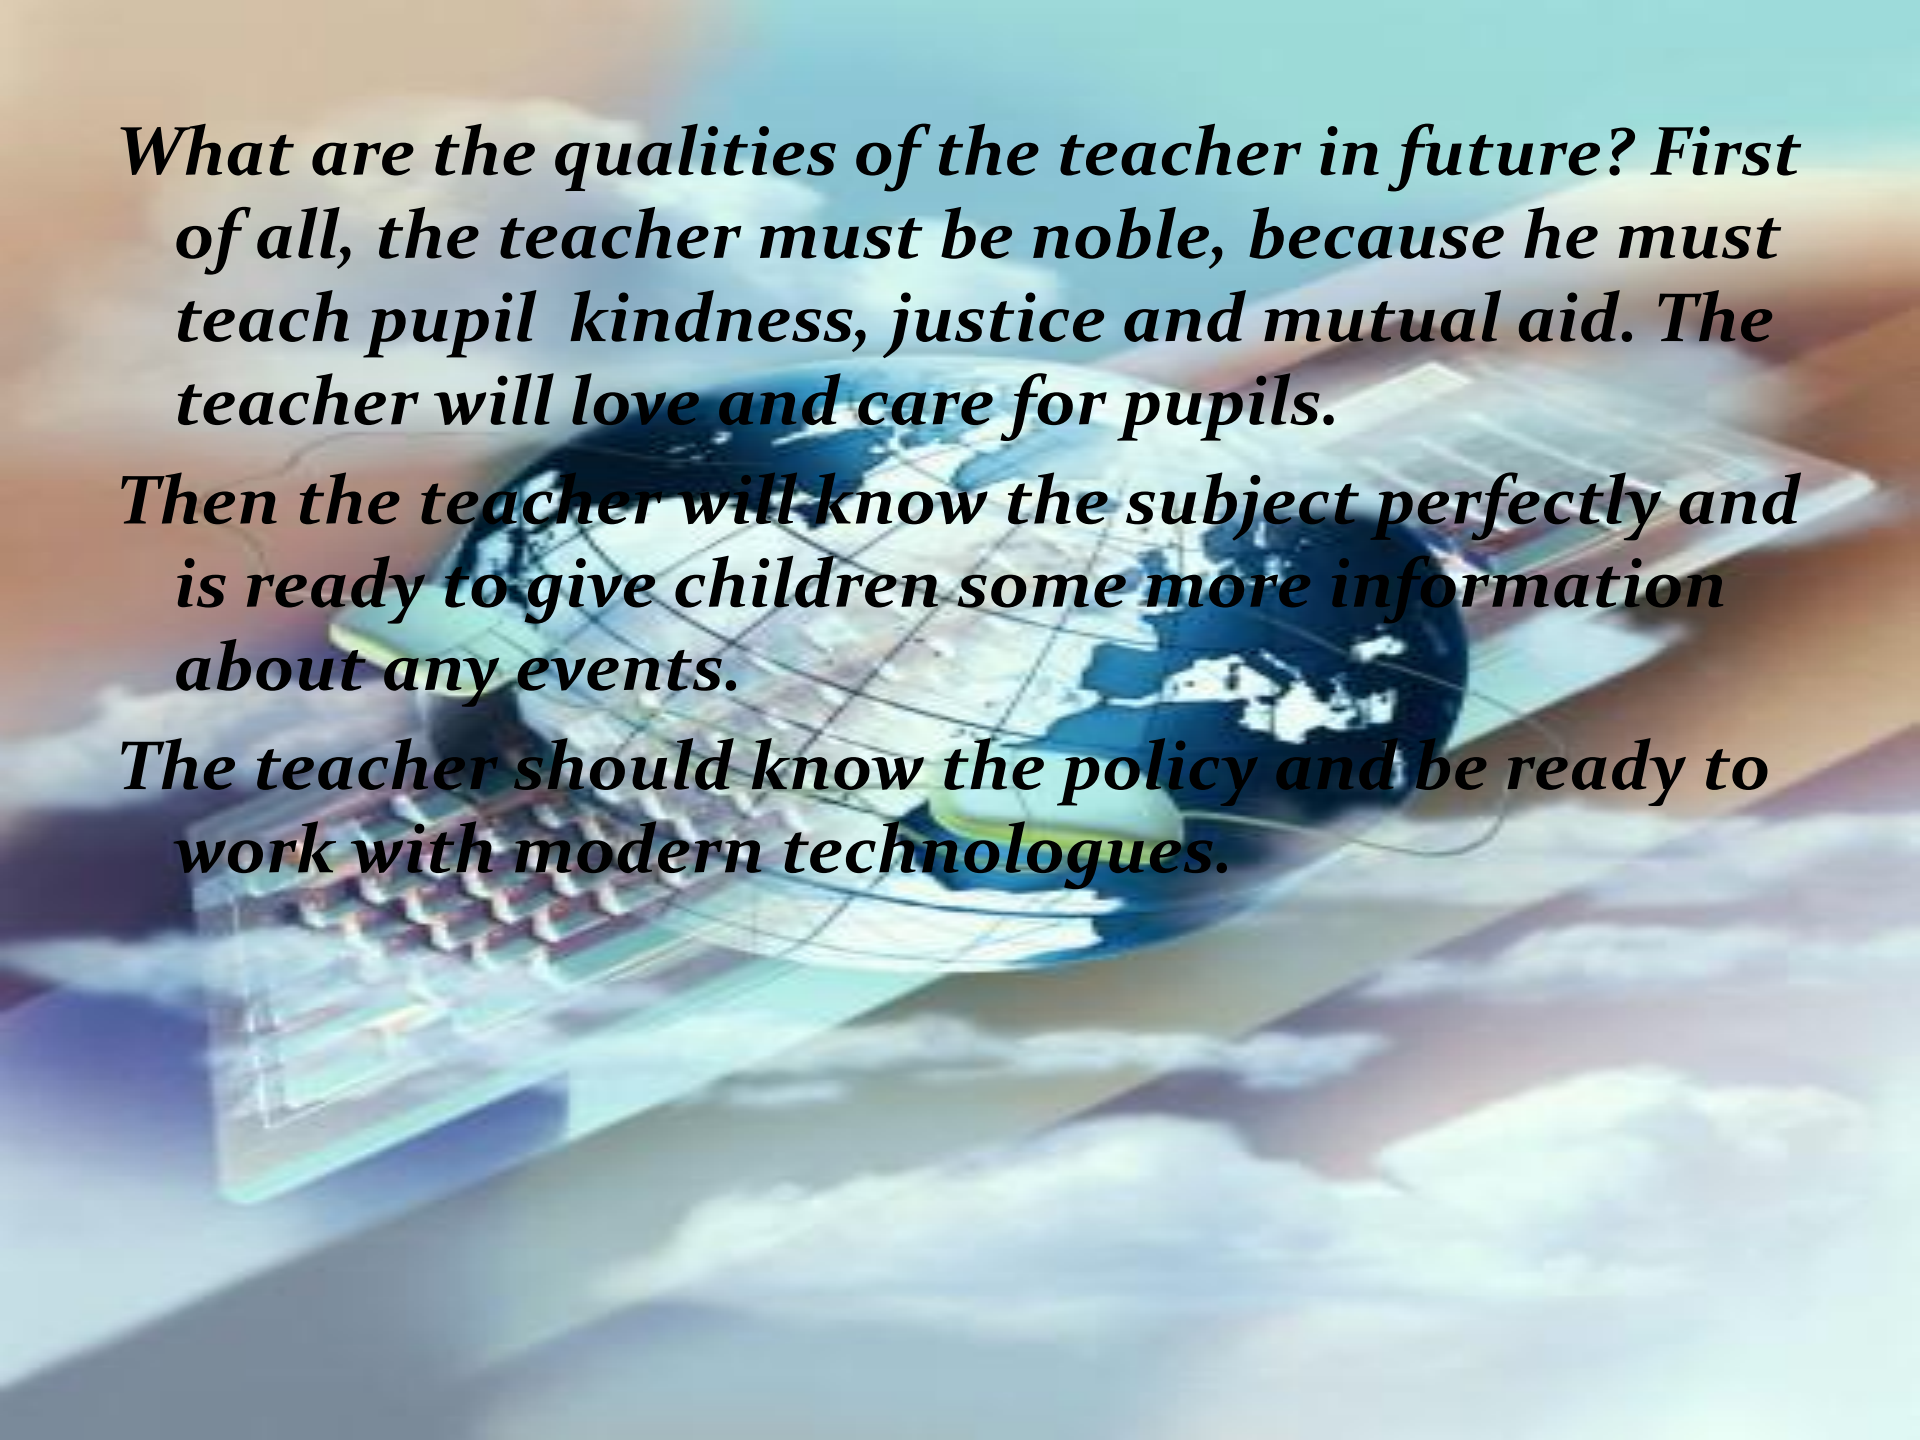

The teacher will teach pupils how to study, show a more comfortable way to get any information, how to analyse and use it.

What are the qualities of the teacher in future? First of all, the teacher must be noble, because he must teach pupil kindness, justice and mutual aid. The teacher will love and care for pupils.

Then the teacher will know the subject perfectly and is ready to give children some more information about any events.

The teacher should know the policy and be ready to work with modern technologists.

New technologies
