My school

In Russia children start school at the age of 6 or 7 years. Their first academic year starts on 1 September. Over the next 11 years of their life 1 September will be very special day for them

School in Russia is divided into primary school (grades 1-4), junior secondary school (grades 5-9) and senior secondary school (grades 10-11). Kids study for 5 or 6 days a week in primary school and 6 days in junior and senior secondary school. In most of the Russian Federation the academic year is divided into 4 terms with one- or two-week breaks between them and longer summer holidays.

Hello

Some schools use the trimester system, which divides the academic year into three quarters. Exams are an important part of school life. Students must turn them in after the 9th and 11th years of study. Students who have graduated from Junior high school-pass exams called Final Certification (GIA), and if they pass the exam they get a certificate .

The certificate gives pupils access to further education. They can continue their education in secondary school or go to College. At the end of 11-year school pupils pass the Unified state examination (use) . If they pass the exams, they can go to University.
