Aggregate Demand and Aggregate Supply

Aggregate Demand

- Real GDP desired at each price level
- Inverse relationship
 - Real balances effect
 - Interest effect
 - Foreign purchases effect

Aggregate Demand

Changes in Aggregate Demand

Consumer Spending

- Consumer wealth
- Household borrowing
- Consumer expectations
- Personal taxes

Investment Spending

- Real interest rates
- Expected returns
 - Expectations about future business conditions
 - Technology
 - Degree of excess capacity
 - Business taxes

Government Spending

- Government spending increases
 - Aggregate demand increases (as long as interest rates and tax rates do not change)
 - More transportation projects
- Government spending decreases
 - Aggregate demand decreases
 - Less military spending

Net Export Spending

- National income abroad
- Exchange rates
 - Dollar depreciation
 - Dollar appreciation

Aggregate Supply

- Total real output produced at each price level
- Relationship depends on time horizon
 - Immediate short run
 - Short run
 - Long run

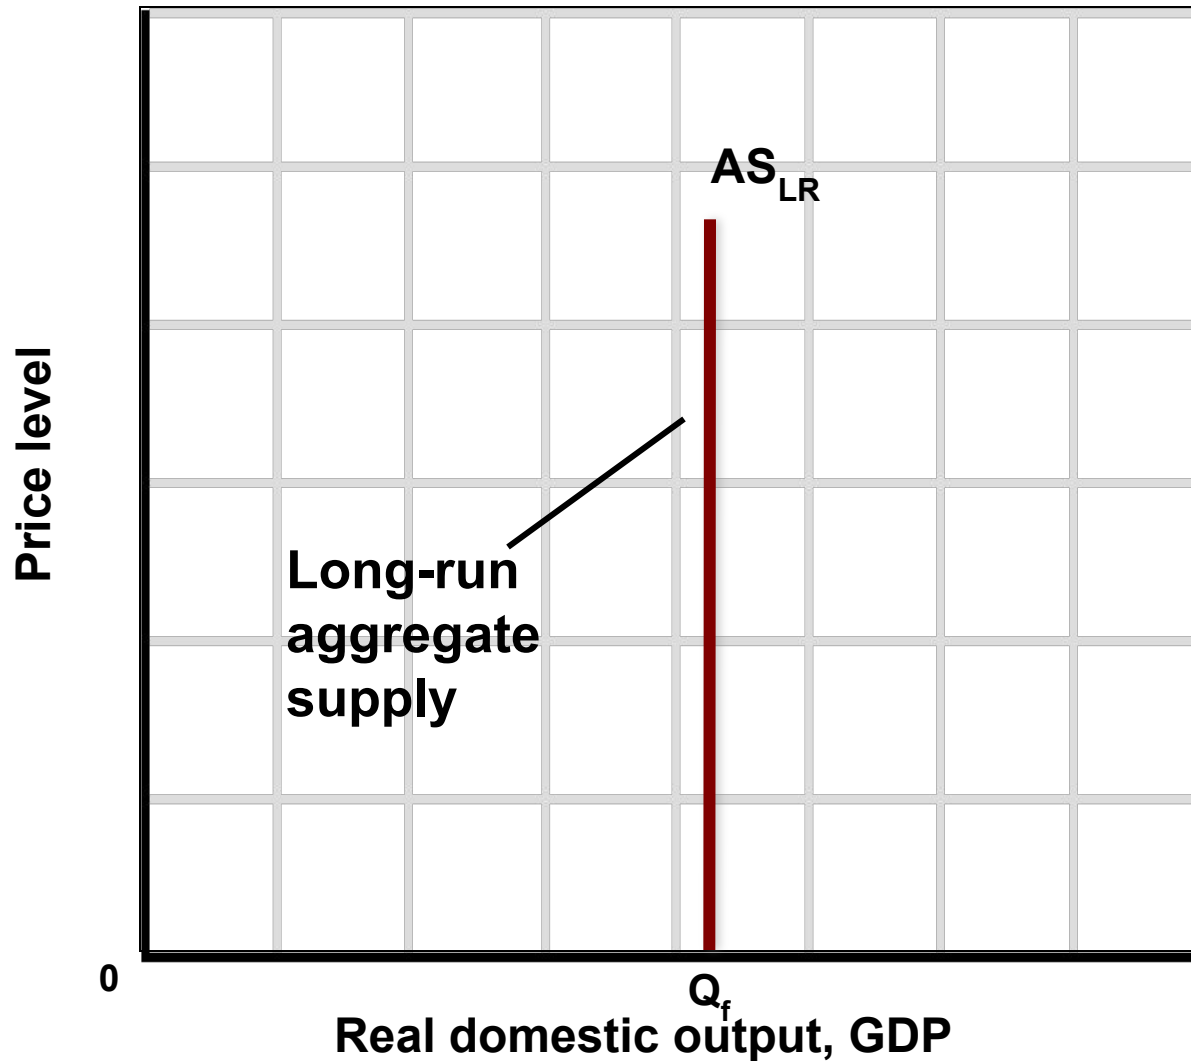

AS: Immediate Short Run

Aggregate Supply: Short Run

Aggregate Supply: Long Run

Changes in Aggregate Supply

- Determinants of aggregate supply
 - Shift factors
- Collectively position the AS curve
- Changes raise or lower per-unit production costs

Changes in Aggregate Supply

Input Prices

- Domestic resource prices
 - Labor
 - Capital
 - Land
- Prices of imported resources
 - Imported oil
 - Exchange rates

Productivity

- Real output per unit of input
 - Increases in productivity reduce costs
 - Decreases in productivity increase costs
- $$\text{Productivity} = \frac{\text{total output}}{\text{total inputs}}$$

$$\text{Per-unit production cost} = \frac{\text{total input cost}}{\text{total output}}$$

Legal-Institutional Environment

- Legal changes alter per-unit costs of output
 - Taxes and subsidies
 - Extent of government regulation

Equilibrium

Real Output Demanded (Billions)	Price Level (Index Number)	Real Output Supplied (Billions)
\$506	108	\$513
508	104	512
510	100	510
512	96	507
514	92	502

Increases in AD: Demand-Pull Inflation

Decreases in AD: Recession

Decreases in AS: Cost-Push Inflation

Increases in AS: Full-Employment
