How many people in Russia do keep pets at home?

Endangered

Many animals and birds on the earth are disappearing nowadays. Many of them are in danger. Indian tigers and African elephants are among them. People have hunted and killed many tigers in India and a lot of elephants in Africa. And there are several reasons:

- ◆ **Tigers and elephants can kill cows, sheep, other domestic animals.**
- ◆ **Some people kill such animals just for fun and hunt tigers and elephants for their beautiful skin to get money.**

In the last century Africa was full of elephants but these days there're not many of them in African parks.
