

Apple Inc.
*the modern
legend*

Apple Inc. is an American corporation headquartered in Cupertino, California, that designs, develops, and sells consumer electronics, computer software, online services, and personal computers. Its best-known hardware products are the Mac line of computers, the iPod media player, the iPhone smartphone, and the iPad tablet computer. Its online services include iCloud, iTunes Store, and App Store.

IPHONE

Apple was established on April 1, 1976, by Steve Jobs, Steve Wozniak and Ronald Wayne to sell the Apple I personal computer kit. The Apple I kits were a computer single handedly designed and hand-built by Wozniak and first shown to the public at the Homebrew Computer Club. The Apple I was sold as a motherboard (with CPU, RAM, and basic textual-video chips), which is less than what is today considered a complete personal computer. The Apple I went on sale in July 1976 and was market-priced at \$666.66 (\$2,763 in 2014 dollars, adjusted for inflation).
