The Universe

Вселенная

The Moon

The Sun

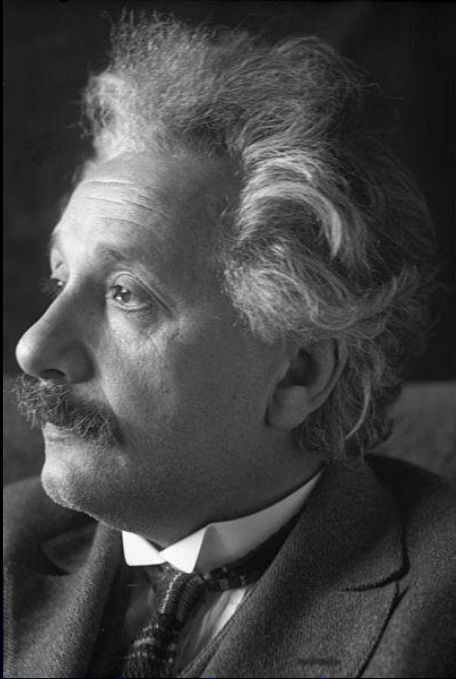

We live on the planet called the Earth
It's a part of the Universe

Do you know any other translations of the word “universe”?

People inhabited the Earth are called
universe

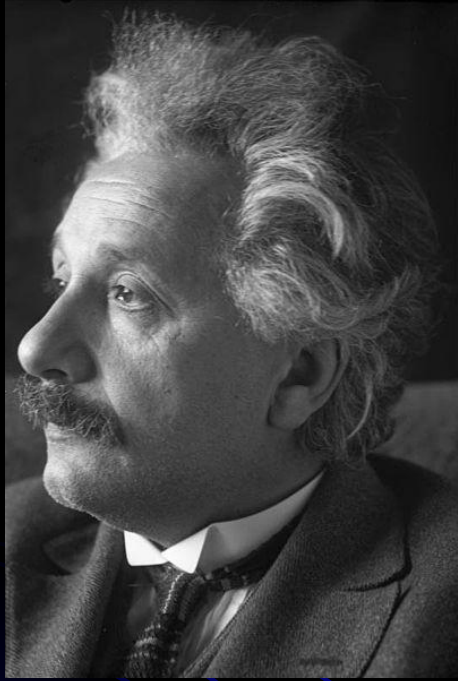

Albert Einstein's utterance

«A human being is a part of the whole called by us “Universe”, a part limited in time and space.

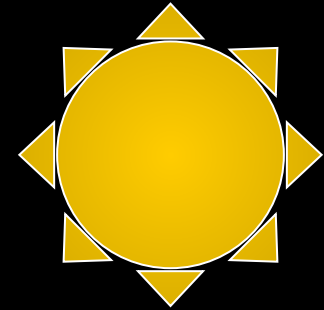

We experience ourselves, our thoughts and feelings, as something separated from the rest, a kind of optical delusion of our *consciousness*.

This delusion is a kind of prison for us, restricting us to our personal desires and to affection for a few persons nearest to us.»

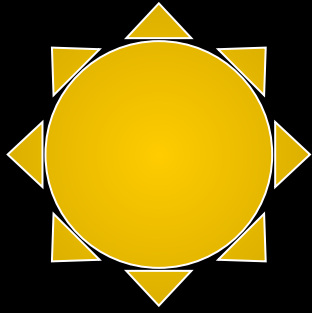

«Our task must be to free ourselves from this prison by widening our circle of compassion to embrace all living creatures and whole of nature in its beauty»

I think people should see the signs of
nature

The signs of nature prompt us to coexist in peace
and harmony with the rest of the world

The Sun is universal as a sign of nature which is similar to letter “O”

The new Moon is like letter “C”

If we combine the sign of the new Moon “” and the sign of the Sun “” we’ll get the “CO” – the beginning of words meaning of which to coexist in peace, love and harmony on the planet.

Do you know any of them?

сочувствие – compassion

сострадание

совесть – conscience

сознание – consciousness

сознание (признание) – confession

содружество – cooperation

сотрудничество – collaboration, cooperation

сопереживание – coexperience

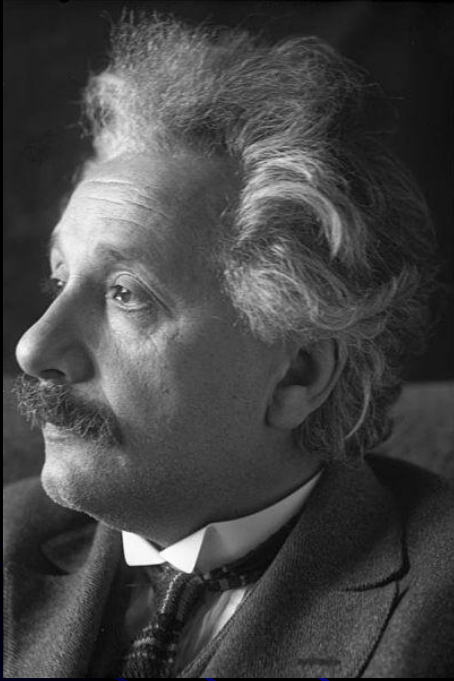

сопричастность

соучастие – complicity

соприкосновение – contact, contiguity

Even the beginning of these words is the same in the English and the Russian languages

Let's read the last sentence of
Einstein's utterance again

Our task must be to free
ourselves from this prison
by widening our circle of
compassion to embrace all
living creatures and whole
of nature in its beauty
