

# Choosing a Profession

*My future profession*

People are  
always asked  
what they  
want to be  
when they  
leave school.  
I am no  
exception.

It is the period  
of my life,  
when I have to  
choose the  
future  
profession.

Choosing a career and getting a job are two of the most important things any person does in his life. I used to think that it is easy to choose a profession. But then I realized that the choice of a profession is a very serious problem.

I liked many professions.  
But as long as my choice for one of the more progressive.

One of the most fashionable and prestigious professions today is PR-manager.

As for me, it's challenging work in the future that are associated with some of my qualities and skills.

Of course it is very important to think about how well you can do this work. For example if you enjoy working with the people and helping them.

I really like talking to people. I am a very energetic person.

I am quite  
active, tidy,  
practical and  
organized.

I think I could be successful in this field.

---

I have not  
decided for sure,  
but I know I'm  
on the way to  
this!
