 - 21 in UK
 - 6 in Korea
 - 5 in Taiwan
 - 8 in Japan
 - 31 in Mexico

SWOT Analysis

Strengths

- 54.1m loyal cardholders
- Strong member renewals
- Absolute pricing authority
- Exceptional employees
- Excellent merchandise
- Quality image

Weaknesses

- Cannibalization
 - Costco's overexpansion domestically risks cannibalizing the sales of preexisting stores
- James Sinegal leave
- Maintaining high wages
 - Costco's average pay, for example, is \$17 an hour, 42 percent higher than its fiercest rival, Sam's Club
- Maintaining profit margins

Opportunities

- Recession has allowed Costco opportunities for luxury-item deals, including the chance to sell prime-grade meat that used to go almost exclusively to restaurants. With people eating out less often, said Sinegal, "there are not as many steaks being sold in restaurants, and we're selling them."
- To take over, merge with, or form strategic alliances with other global retailers, focusing on specific markets such as Europe or the Greater China Region.
- The stores are currently only trade in a relatively small number of countries. Therefore there are tremendous opportunities for future business in expanding consumer markets, such as China and India.

Threats

- Being a global retailer means that you are exposed to political problems in the countries that you operate in.
- The cost of producing many consumer products tends to have fallen because of lower manufacturing costs. Manufacturing cost have fallen due to outsourcing to low-cost regions of the World. This has lead to price competition, resulting in price deflation in some ranges. Intense price competition is a threat.
- Bad economic times (current recession)
