

A satellite photograph of Earth from space, showing the Americas in the center. The image displays the blue of the oceans, the brown and green of the continents, and intricate white cloud patterns swirling across the globe. The text is overlaid on the upper left portion of the image.

Presentation of the English
language.
"Disappearance of animals'

8 "A" class

-
- Our planet become less and less plants and animals, some types are disappearing, the number the other declining.

-
- ALARM LIST
 - All types animals and plants registered in the Red Book, need to special protection. But they current status, the number and area of different habitats. There is a species quite numerous,
 - But living on a very limited area. This is usually species populating one or few small islands.
-

-
- The Red Book - the result of work done on a large scale. Taking this book as a basis, in some countries have held a census of fauna, feeding and migrating in the respective territory, and set up their Red Book.
-

-
- We - the people do not notice how we destroy the world! Look closely, because there is already more than 200 species of animals. For us it is not important, while others lose their lives because of our apathy and indifference.

Black Book of Animals

This list of extinct animals that have existed on Earth long ago. All of them died through the fault of the person.
