

Ecological problems in Severodonetsk

Our town needs protection, so we should help it to develop and to be clean at once.

LOGO

People should pay attention to our problems.

I know that simple people such me or my classmates can't help our polluted air or rivers.

Unfortunately our plant Azot pollutes all components of our environment.

LOGO

**But we can do some simple things.
At least we can through our rubbish in
special places, but not in streets.**

**Many of us are not content about the
condition of our streets. Why don't we help
them to become cleaner?**

LOGO

Our rivers and air are polluted by Azot. But we can't stop its work as it gives workplaces to most our citizens.

LOGO

But what is good in our town is that around it there is a big forest.
