

# Ecological problems in Severodonetsk

**Our town needs protection, so we should help it to develop and to be clean at once.**

**LOGO**

**People should pay attention to our problems.**

**I know that simple people such me or my classmates can't help our polluted air or rivers.**

**Unfortunately our plant Azot pollutes all components of our environment.**

**LOGO**

**But we can do some simple things.  
At least we can through our rubbish in  
special places, but not in streets.**

**Many of us are not content about the  
condition of our streets. Why don't we help  
them to become cleaner?**

LOGO

Our rivers and air are polluted by Azot. But we can't stop its work as it gives workplaces to most our citizens.

**LOGO**

**But what is good in our town is that around it there is a big forest.**
