Why we have problems with the environment

Large cities with thousands of smoky industrial enterprises appear all over the world today. The by-products of their activity pollute the air we breathe, the water we drink, the land we grow vegetables.

Our Planet is in Danger!

Every day we hear about environmental problems:

- ***Acid rain***
- ***Pollution***
- ***Climate change***
- ***The destruction of rainforests and other wild habitats***

The environment is all the things we need to be able to live - ***clean water to drink , air to breathe and healthy food to eat.***

We can't live without plants and animals. They help to make the soil, they clean the water and air, and they give us all our food.

Fish kills for us-our food

soon we will have nothing to

what do you like most

Шлыка - Esox lucius

or

where are we going to live?

WE CUT DOWN TREES JUST LIKE OUR HOUSE

FIRES

Forest fires are one of the greatest natural destroyers of our forests. Each year fires burn millions of hectares of forest all over the world.

why do we pollute our air?

Let's save our planet and it will thank us!

Let's live amicably with the planet Earth!

What can we do to protect nature?

- We can recycle newspapers, bottles and metal cans.
- We mustn't cut down trees.
- Feed birds in winter.
- Protect wildlife, plants and trees. Keep all water clean.
- Don't use aerosol sprays.
- Don't use chemicals in the garden.
- Turn off the light when you leave the room.
- Don't cut wild flowers.
- Try to avoid buying plastic. It's hard to recycle.
