Fauna

Domestication

By 8000 BC human beings had begun to recognise the importance of other animals - dogs, goats, cattle, and sheep. These animals provided protection, food, clothing, and companionship. Some animals chose to live near human beings for protection from carnivorous enemies, or for the chance to approach a warm hearth on a cold night. The domestic animal has coexisted with human beings as a working partner and household pet in all eras and cultures since the days of the cave men.

Born to serve...

The bee...

People began to use the bee since the end of the Neolithic Period.

People depend on the bee for honey. The bee produces wax. People are used wax, which is used in candles. People still use bee only sweetener and they throw hives. All this has changed over time.

Brochure about domestic cat

General information

Most authorities agree that the domestic cat descended from the Caffre cat, a small breed of African wildcat. The caffre cat was domesticated in ancient Egypt, possibly as early as 2500 BC. The longhaired cat breeds are believed to originate from this Asian wildcat, *Felis manul*. The modern manul has the longest hair of any breed of wildcat.

Rules of care

House cat a clean animal for departure of needs nature the cat should allocate in an apartment a constant place where it is necessary to put capacity with dry sand, the ground, paper. Cat's are recommended to be combed out an individual brush. To feed an adult cat it is necessary 2 times day. In an accessible place always there should be a fresh water.

Useful advice

Interview to the expert (Mary Smitt, expert in wildlife nature)

- 
- A black panther and a black leopard are shown in a natural setting. The panther is in the foreground, looking towards the camera with its mouth slightly open, showing its teeth. The leopard is in the background, looking towards the camera. The background is a blurred natural environment with green and brown tones.
- Hello, Mary Smitt. I the journalist of magazine fauna and I would like to set to you some questions which our readers wrote to us. I want to ask you about wild nature and how reasons for keep exotic pets.
 - People keep exotic pets for different reasons: for example, for their status or to look extraordinary.
 - What do you think about keep wild animals in your house?
 - I think you may keep wild animals, but if you live in a block of flats, you should to ask the concert of the neighbors. Besides, wild animals can be dangerous on the other hand they can be harmless and kind. Personally I against.
 - You can tell what exotic animals store houses more often?
 - Crocodiles, snakes, lion...
 - There were accidents in your practice?
 - In my practice there were many accidente That's why I think to you better to be warned and get to yourself kind animals
