

# Husky

Work done by Vitalia  
Vanicheva. 4v class  
School № 611

My favorite animal is Husky

Husky always **have got** blue eyes.  
They have a very serious look.

From birth they are very brave. They live in the north, and so they have to adapt to the harsh climate. And when the little puppies grow up they start to work in teams.

## ◉ Husky puppies

But often Huskies live in people's homes and certainly not in the north ( People give birth to them as a friend) These dogs are very kind. They are really very good friends)

**Thank you for Attention**
