

# **Location and climate of the United States**

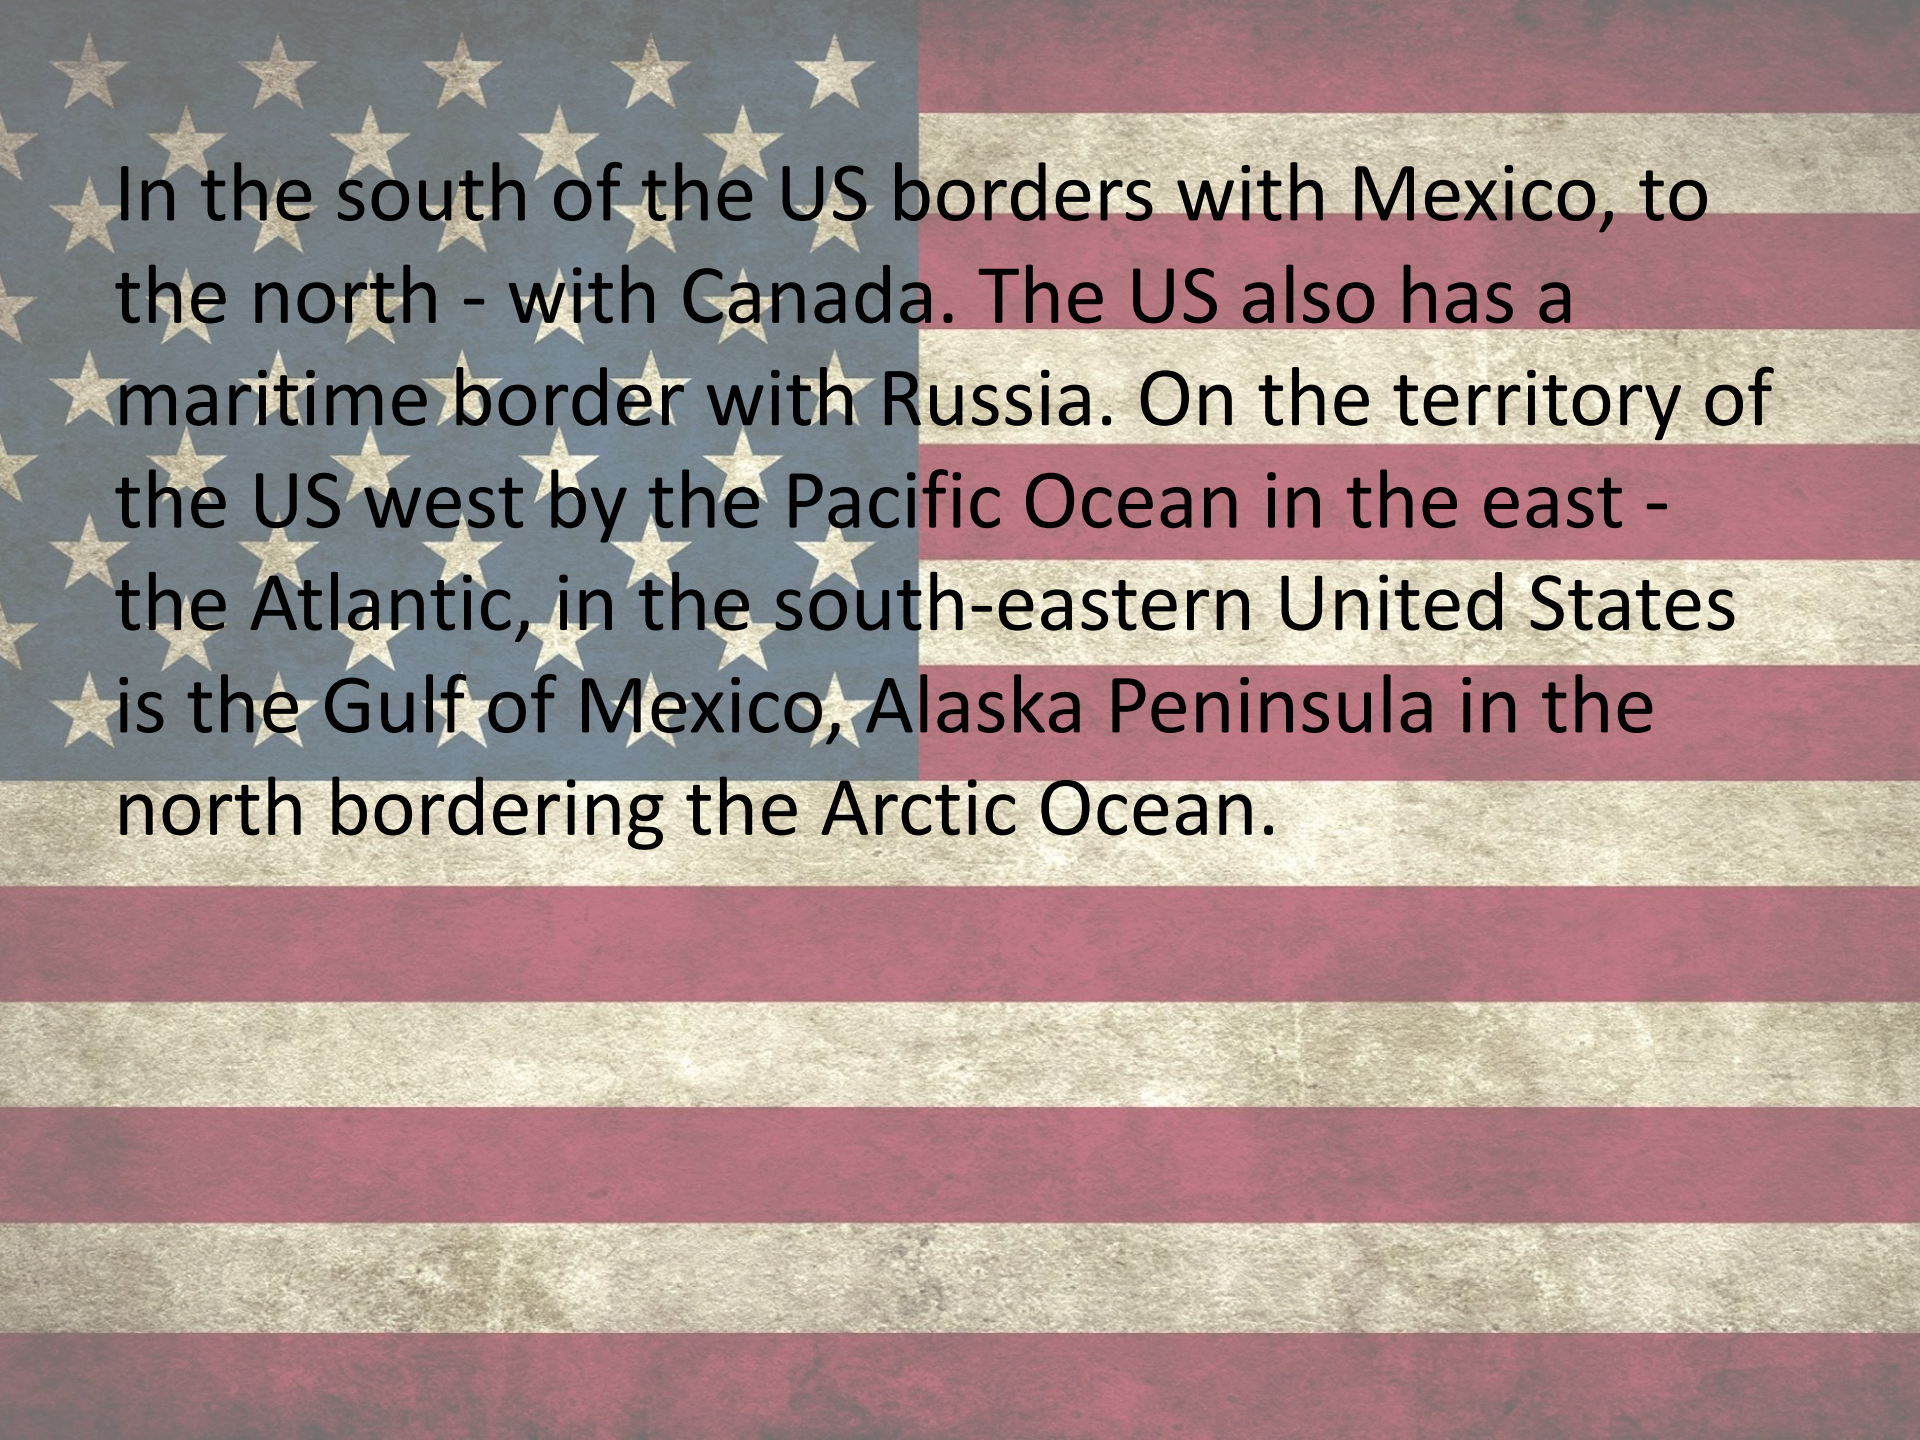

The background of the slide is a stylized American flag with a textured, slightly grainy appearance. The stars are white on a blue field, and the stripes are red and white. The word "Location" is written in a large, white, sans-serif font in the upper right quadrant.

# Location

**Located in the Western Hemisphere, mostly in the continent of North America. United States consists of 48 contiguous states with each other in the "mainland" and 2 states that do not have a common border with the rest: Alaska - located in the northwest of the continent of North America (not to be confused with the Alaska Peninsula, which is much smaller), and Hawaii in the Pacific Ocean. In addition, in the United States includes the District of Columbia and incorporated territory of Palmyra Atoll.**

The background of the image is a stylized American flag. It features a blue canton in the upper left corner containing a grid of white stars. The rest of the flag is composed of horizontal stripes, alternating between a dark red and a light beige or tan color. The stripes have a slightly textured, paper-like appearance.

In the south of the US borders with Mexico, to the north - with Canada. The US also has a maritime border with Russia. On the territory of the US west by the Pacific Ocean in the east - the Atlantic, in the south-eastern United States is the Gulf of Mexico, Alaska Peninsula in the north bordering the Arctic Ocean.

The background of the slide is a stylized American flag with a textured, slightly grainy appearance. The stars are white on a blue field, and the stripes are red and white. The word "Climate" is written in a large, black, sans-serif font in the upper right quadrant.

# Climate

Due to the large size of the country, its extent and the wide variety of geographical features in the US can be found areas with virtually any climatic characteristics. Type of climate within a single zone can vary significantly depending on the terrain, proximity to the ocean and other factors. The favorable climate has had a considerable influence on the settlement of the continent by Europeans and largely contributed to the US occupation of leading positions in the world.
