

# Music in our life

Can you think of a day without music? We can hear music everywhere: in the streets and at home, over the radio and on TV, in the shops and in the parks. People all over the world are fond of music. They listen to music, they dance to music, they learn to play musical instruments.

**NO MUSIC?  
NO LIFE.**

Great Britain has produced more popular music stars than any other country. Over the last 30 years rock and pop music have been very popular in Britain. The Beatles, with their style of singing, eloquent and exciting, is still one of the most popular groups. British groups often set new trends in music.

Many of the new bands have been able to use the changes in technology to develop their music. Computerized drum machines, synthesizers and other electronic instruments are now just as popular as the piano and electric guitars.

Tastes differ. So people's musical interests range from pop and rock music, which are extremely popular nowadays, especially among young people, to classical music and opera.

Rock music as any other music help people to relax and have rest and feel themselves a harmonious individual. It is better to listen to rock music when alone, for no one hinders you to hear the beauty of its sound.

People believe that music a person listens to may say much about a person, his character, up-bringing and outlook. Many young people can't live without listening to rock music, because it makes their life brighter and more interesting.

Hand-drawn list of rock bands and logos:

- PINK FLOYD** (with symbol)

- the Gazette by SOIRN** (with logo)

It goes without saying that music plays a very important role in people's lives. It reflects our moods and emotions. Music appeals to our hearts and transforms our feelings.

It conquers our souls and enriches our minds. Besides, listening to music is the perfect way to spend free time and not to feel bored. You can hardly find a person who doesn't like or need music and who never sings or dances.

Thanks for watching
