

**Nanotechnologies:
potential benefits or a
great danger ?**

Objectives:

- To study the origin of nanotechnologies.
- To see the difference between normal and nanoprodukt.
- To learn more about contribution of Perm scientists in nanotechnologies.
- To investigate if lyceum students know much about nano.

Steps from the Stone Age to the Epoch of Nanotechnology.

**JOBS AND CAREERS
IN NANOTECHNOLOGY**

□ Nanotechnology is the study of phenomena and fine-tuning of materials at atomic, molecular and macromolecular scales, where properties differ significantly from those at a larger scale.

There are some main trends in nanotechnologies today:

- Making nano electronic schemes

Design & producing nanomachines

Manipulation of separate atoms
& molecules and making
microobjects out of them (tunnel
microscope, disks, DVD)

Since 2008 it has been headed by
Anatoliy Chyubais.

The meeting of Russian and the UK scientists in Moscow(January 16, 2009)

The meeting of Chinese & Russian scientists (December 15, 2008)

A new report from the British government's Royal Commission on Environmental Pollution says "new governance arrangements are necessary" to deal with the profound implications of advanced nanotechnology, and warns that this "will take time, possibly decades, to develop and implement and we hope the US and other countries will follow the UK. "

— **Mike Treder**, The UK Center for Responsible Nanotechnology

Vladimir Baldin ,the chief technologist of the Perm plant «Mashinostroitel», the head of the Perm group for the construction of the Large Hadron Collider.

Elena Lopatina, lyceum's
schoolleaver, a journalist of
Arguments &
Facts (Prikamie),
in No.6/2009 interviewed the
academition of RAN
Vladimir Antsiferov(Perm
Technical
University)- Where Can We
Use NANO?

Заносится в Книгу Почета

Ученица 11г класса

Лопатина Елена Александровна,
окончившая школу

с золотой медалью
«За особые успехи в учении»,

участница и призер городских
олимпиад по истории Отечества,
русскому языку, географии,
экономике, победитель XI городского
конкурса научно-исследовательских
работ учащихся (секция литературы),
дипломант XXIII областного конкурса
научно-исследовательских работ
учащихся (секция литературы).

24 июня 2003 г.
Директор лицея

О.И. Накарякова.

Latest NANO News:

- The delegation of ROSNANO, headed by Anatoliy Chyubais visited PERM (11- 12 March , 2009) and discussed the questions connected with the organization of the branch of ROSNANO in PERM.
- The leaders in NANO in Perm krai –Perm Technological Research Institute, ZAO"NOVOMET," Perm Instrument Making Company.

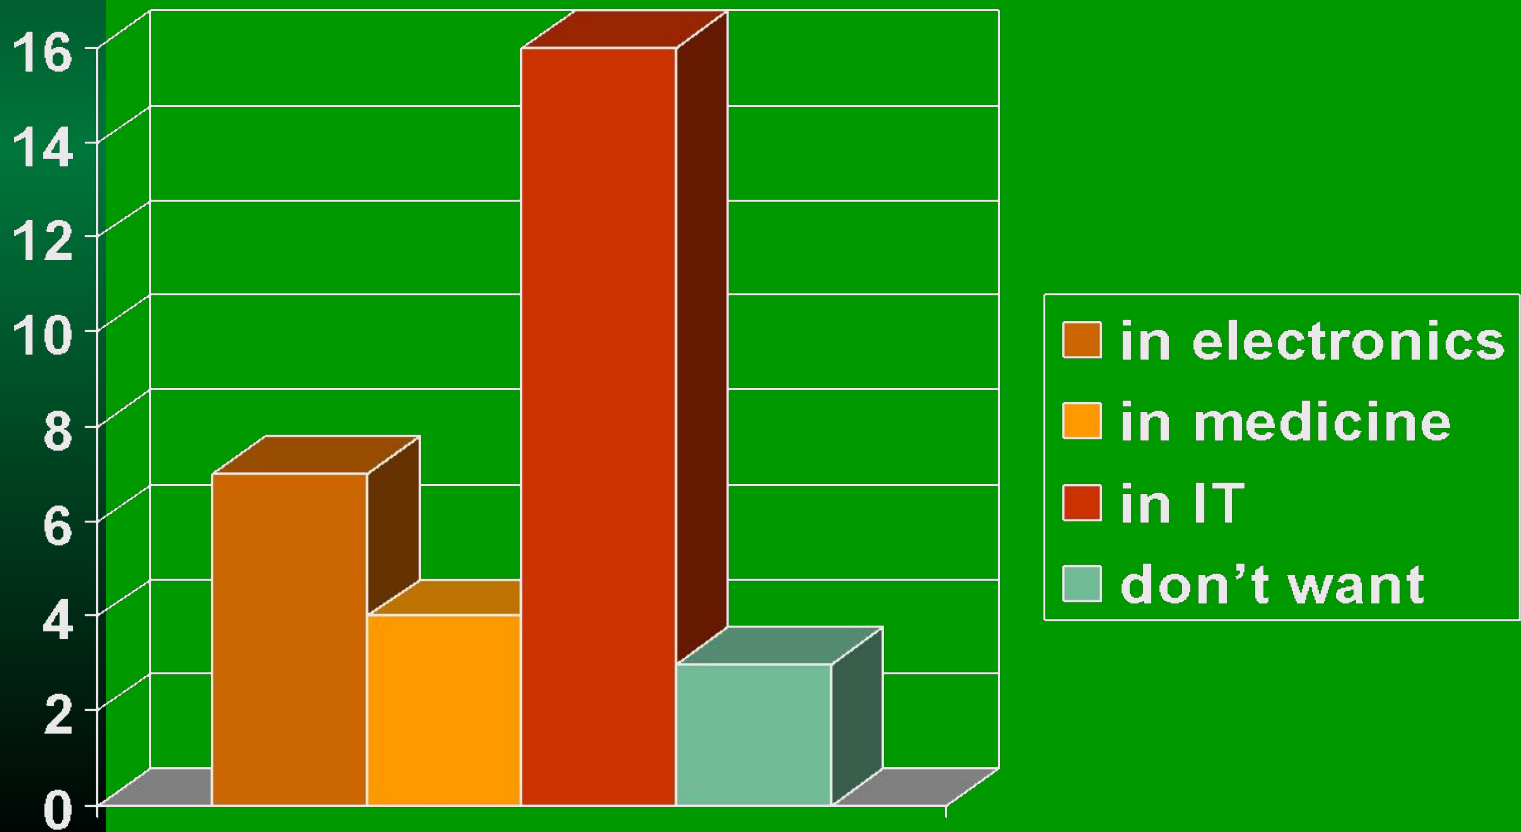

Do you know what NANO is?

■ 100%

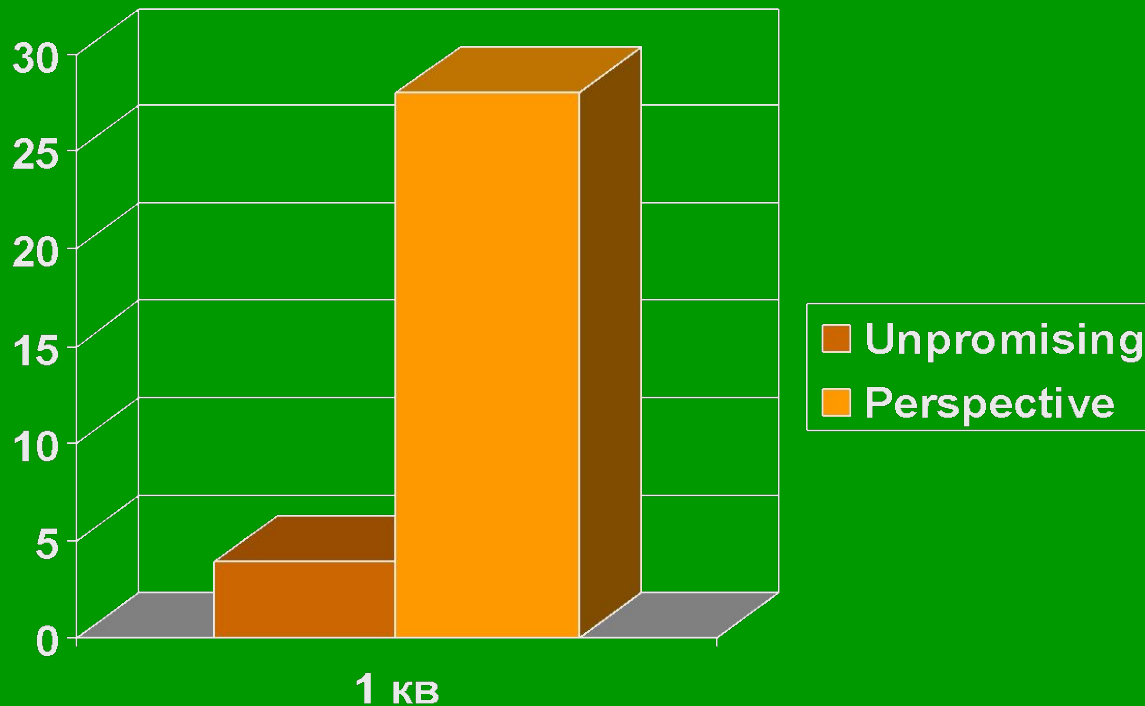

In what nanobranh would you like to invent something ?

Have nanotechnologies potential benefits ?

Nano's Pros

- To continue the revolution in computer hardware
- To develop a new manufacturing technology in metallurgy, IT, medicine, security.

Cons of NANOMATERIALS

- Some nanomaterials proved to be toxic to human tissues and cells.
- Some nanomaterials can cause potential DNA mutations.

Jobs in nanotechnology: Latest Job Postings

- Research Scientist in Semiconductors
- Nanobioscience
- Mechanical Modelling Engineer
- Microfluidic Technologies
- Aerospace
- IT
- Powdery Metallurgy

Latest News!!!!!!

- Alexey Shaporev, our school leaver graduated in physics from the Moscow State University with honours, works in the branch of NANO.
- Polina Secheiko, our school leaver of 2009, is a first year student of the department of NANO materials of the Moscow State University.

Nano is.....

- Knowledge about the microworld, especially based on examining, testing and proving
- Discovery of new properties
- Fun.....that's why

«Value what you
have but seek
more.»

Isocrates, 4th century BC
