

Our Environment

Разработана учителем английского языка
МОУ ГСОШ г. Калязина
Савиной Натальей Игоревной

The aims of the lesson:

- *To speak about ecology;*
- *To hear a text about climate;*
- *To read the text “Our Environment;”*
- *To make up sentences about ecology*

Green Fields.

*Once there were green fields kissed by the sun,
Once there were valleys where rivers used to run,
Once there was blue sky with white clouds high
above,
Once they were part of an everlasting love.
We were the lovers who strolled through green
fields.*

*Green fields are gone now, parched by the sun,
Gone from the valleys where rivers used to run,
Gone with the cold wind that swept into my heart,
Gone with the lovers who let their dreams depart.*

Green fields.

*Where are the green fields that we used to roam?
I'll never know what made you run away.
How can I keep searching when dark clouds hide the day.
I only know there's nothing here for me,
Nothing in this wide world left for me to see.
But I'll keep waiting till you return,

I'll keep on waiting till the day you learn
You can't be happy while your heart's on the roam.
You can't be happy until you bring it home.
Home to the green fields and me once again.*

Listen to the text and say which of the facts are true, false or not mentioned in it.

- 1) Climate all over the world has become hotter.*
- 2) Climate is changing nowadays.*
- 3) Climate influences the life of people more than the life of plants and animals.*
- 4) Climate in Europe has changed recently.*
- 5) Winters in Europe are colder nowadays than in the twentieth century.*
- 6) Summer temperatures in Europe can be more than thirty degrees above zero.*

What do these words mean?

- 1) Isolation means
