

Polar Bear

The Polar Bear is the largest predator.

The Polar Bear lives near the Arctic Ocean. It has got a very thick fur, that protects it from cold.

It does not like hot weather. Therefore in the Zoo it needs a swimming pool.

The Polar Bear is a beautiful swimmer. He can swim up to 50 kilometers.

They live
one by one.
The females
can have
from one to
three cubs.

The Polar Bears eat ringed , bearded seals , sea cows and fish.

Polar bear is listed in the Red Book.
