

Isaac Newton

He was one of the greatest scientists of the world who was made a Knight by Queen Anne.

- He was born in England on 4 January 1643.

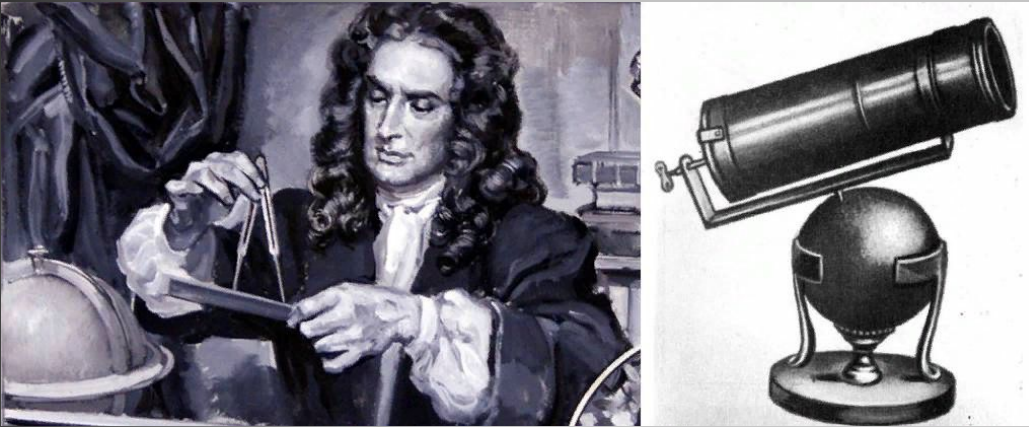

He spent much time with his grandmother.

Newton did not have many friends.

- When he was 19 he went to Cambridge University in England.

He invented the **Reflecting Telescope** where he used mirrors to reflect light and create images from that.

- He also discovered the **Laws of Motion** on which mechanics is based.
