

Foreign languages in my life

English is becoming the universal language of our planet. I would like to go abroad. It will be interesting to speak to people in England, Italy, France, Germany. Because all of them speak English well. It will be easy to learn about the life in these countries, their history and culture.

I am convinced that English will help me to become a highly-qualified specialist in working with computers.

First of all I would like to read books and periodicals in original and understand TV and radio programmes.

English will help me to find a good job and improve my life in the future.

English is a subject in my school curriculum.
I would like to get good marks. That is why
I try to learn English well.

The end
