

Problem:

Is it possible to save the
Earth?

Kinds of pollution

- Water pollution
- Air pollution
- Soil pollution
- Noise pollution

Water pollution.

People throw out dust into the rivers

Washing the cars near river

Big tankers emit tons of oil into the sea water. Wild life suffers from this pollution

Big factories pollute the air

Burning waste

Noise pollution. There is much noise in the big cities because of air jets, city transport and so on.

Approximate Decomposition times in a Landfill

Traffic ticket

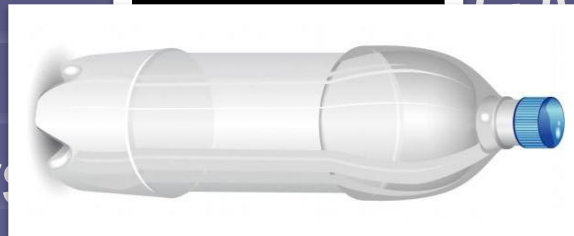

Banana peel

Tin cans

Plastic bottles

Glass containers
