Mass media and ecology.

Getting information is one of daily necessities of a human being. We get a great amount of information by mass media.

But what about ecology. It takes 500000 trees just to make the newspapers we read every Sunday.

Mass media and ecology.

Save your family newspapers. Find out how to recycle newspapers in your area.

Television. We can't live without it. Many people spend their free time watching TV. TV stations, TV set these all causes a big consumption of energy.

Mass media and ecology.

The most part of energy in Russia is produced by heat power-stations.

Heat-power stations burn coal to produce energy. That burning coal gives off gases, that causes acid rains.

Mass media and ecology.

Turn off your TV set when you are not watching it. It will save a lot of energy and make ecological situation not to get worse.
