

REED BLOOD CELLS

Prepared by student of group 39fm4

Korotkova Kristina

Bryansk 2015

Erythrocyte

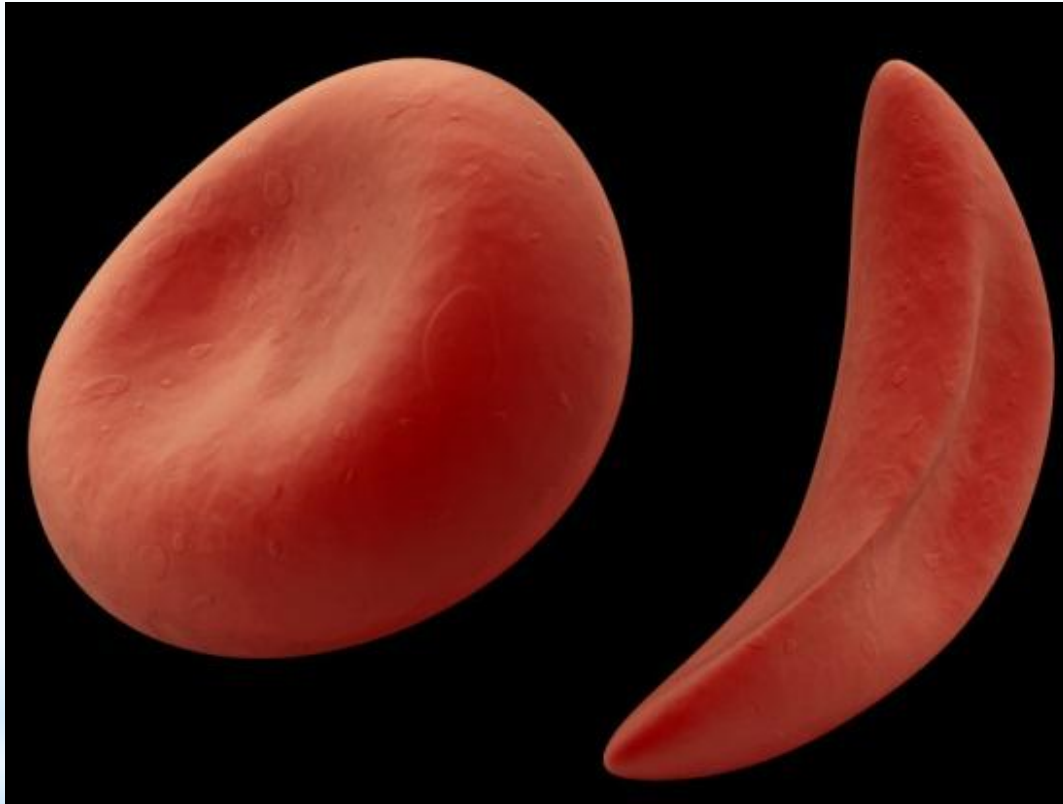

red blood cells

Color

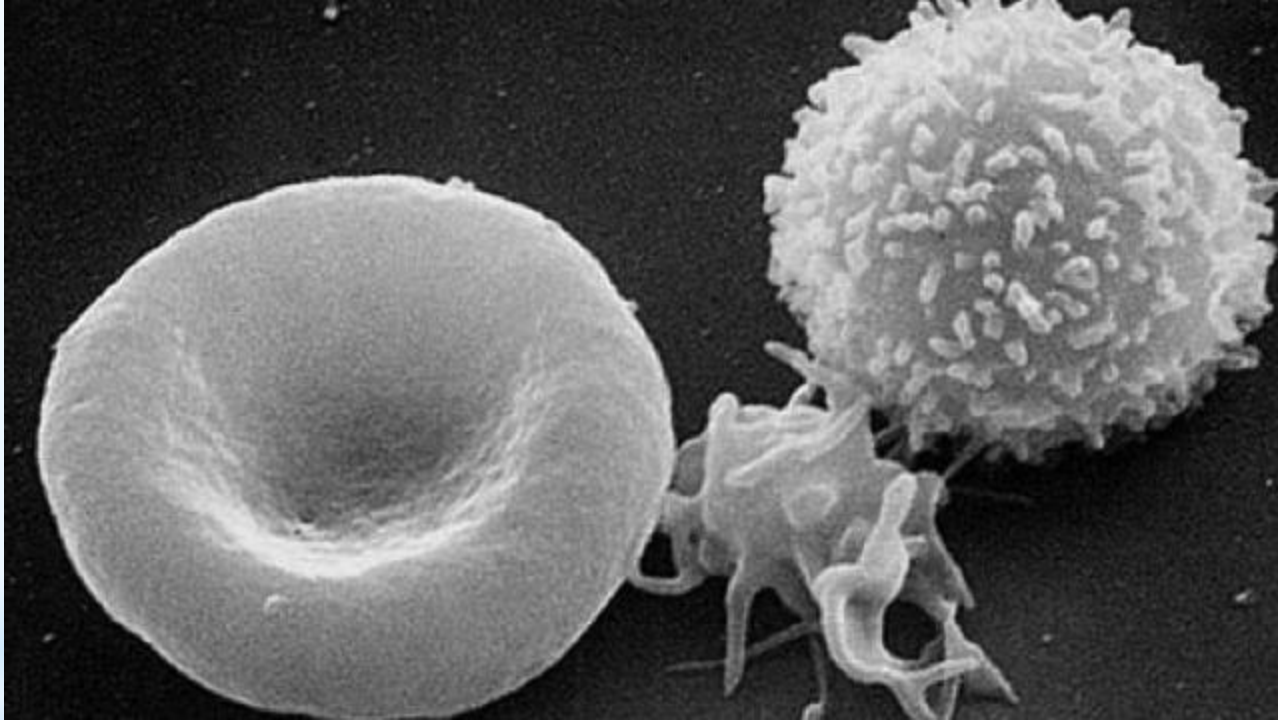

of red blood cells

Form

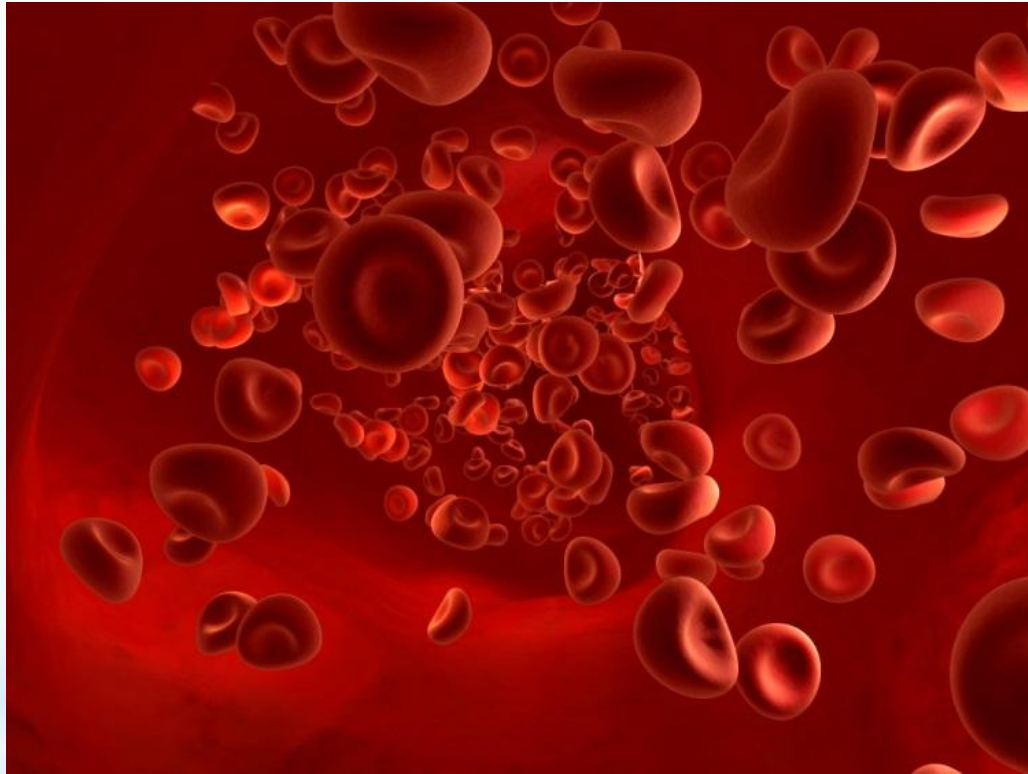

as a disk

Life cycler

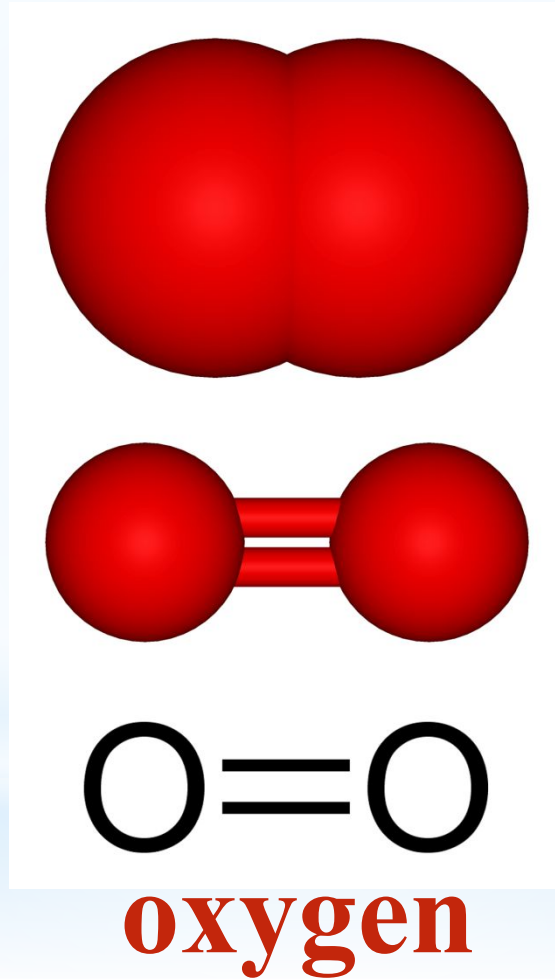

120 days

Number

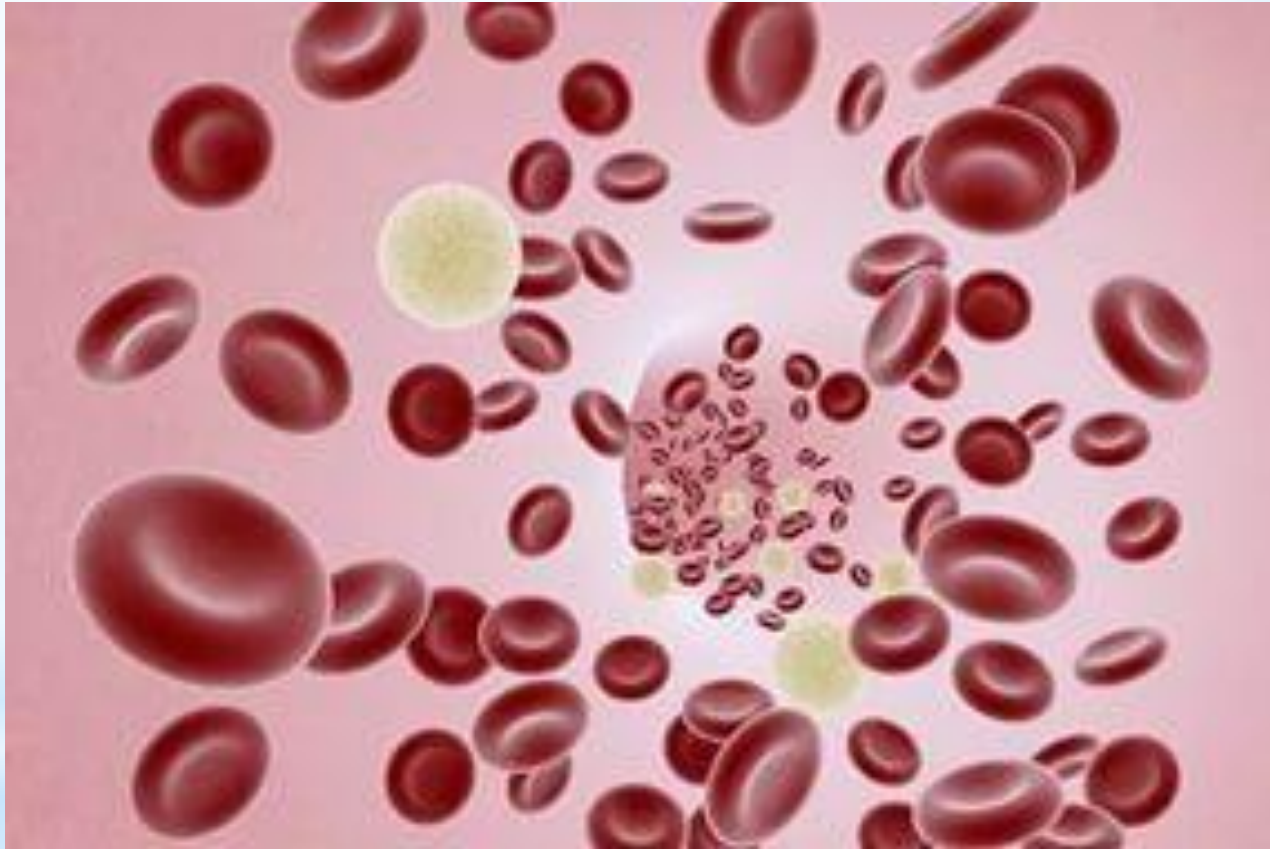

**5-6 millions per cubic millimetre
of blood**

Function of red blood cells

Hemoglobin

pigment

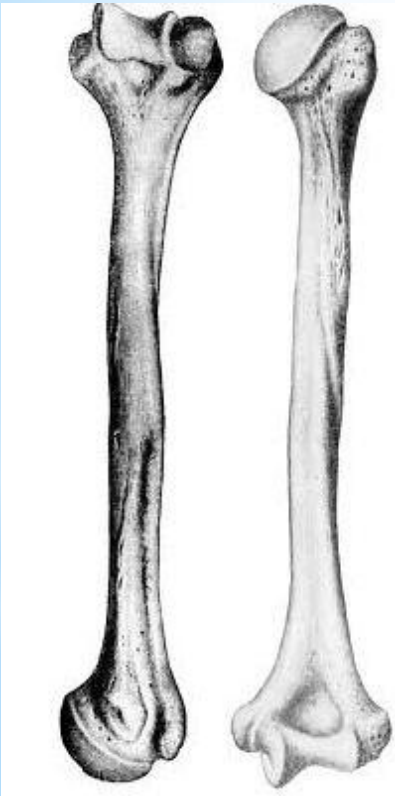

Jan Swammerdam

a Dutch biologist

Production

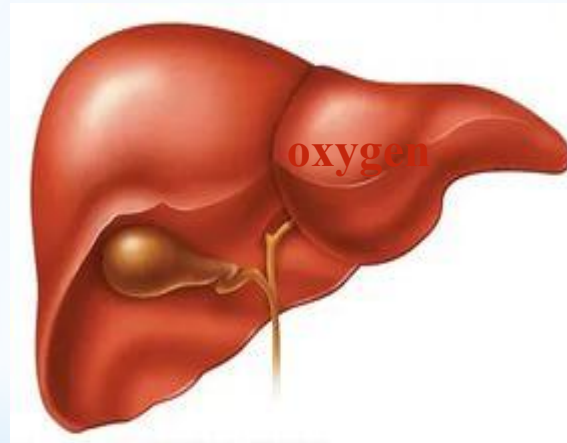

After birth

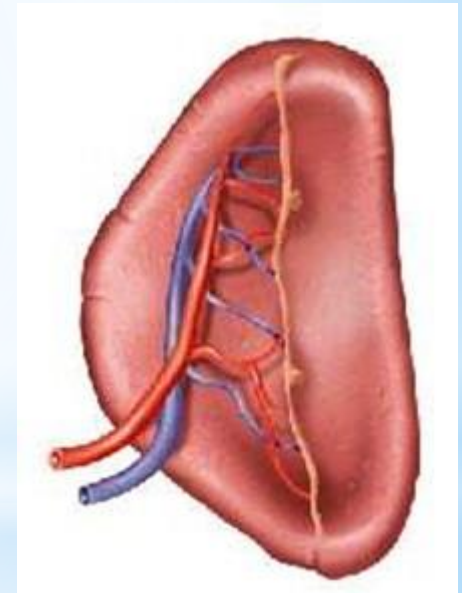

bones

Before birth

liver

spleen

in liver and spleen

Iron need

to replace old blood red cells

Oxygen

the normal functions of organ

Thank you for your attention!
