There are four seasons in a year: spring, summer, autumn and winter.

SPRING

March, April and May
are spring months.

Green grass and flowers cover the ground.

In spring nature awakens from its long winter sleep.

In spring all the migratory birds return. They sing sweetly on the branches of the trees.

We can enjoy fresh air, blue and cloudless sky and warm sunshine.

summer

In summer the sky is clear and cloudless. The days are long and the nights are short and warm.

Summer is the hottest season in the year. It begins in June and ends in August.

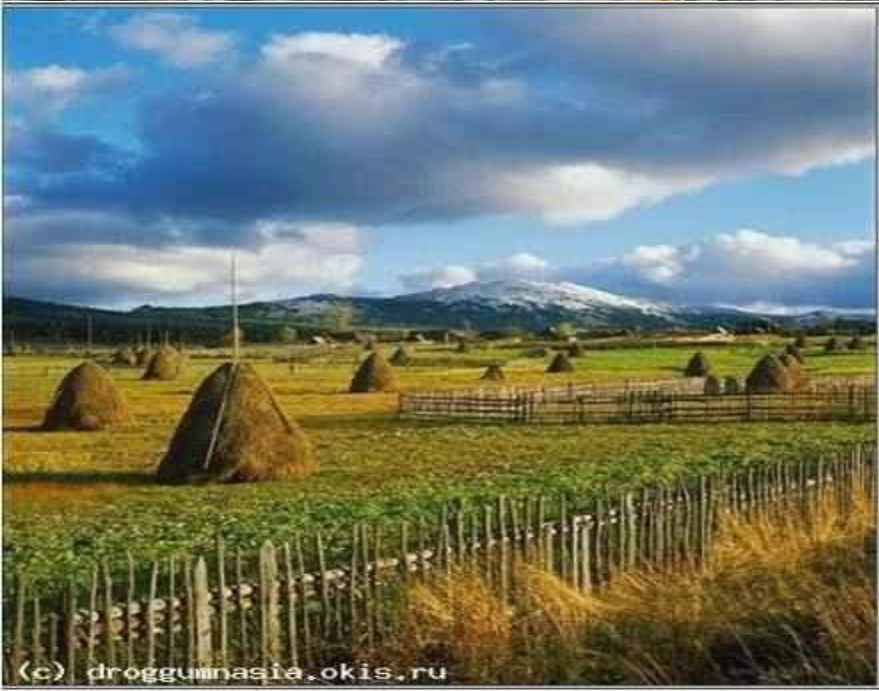

All of us enjoy summer with its cloudless sunshine, with its gardens and meadows full of flowers.

In autumn the days
are becoming
shorter, the sun lose
its force.

It often rains. It is the season of harvesting.

A winter landscape with snow-covered trees and a frozen body of water. The scene is captured in a cool, blue-toned palette, suggesting a cold and serene atmosphere. The trees are heavily laden with snow, and the water in the foreground is partially frozen, with ice floes visible. The sky is dark, and the overall lighting is soft and diffused.

winter

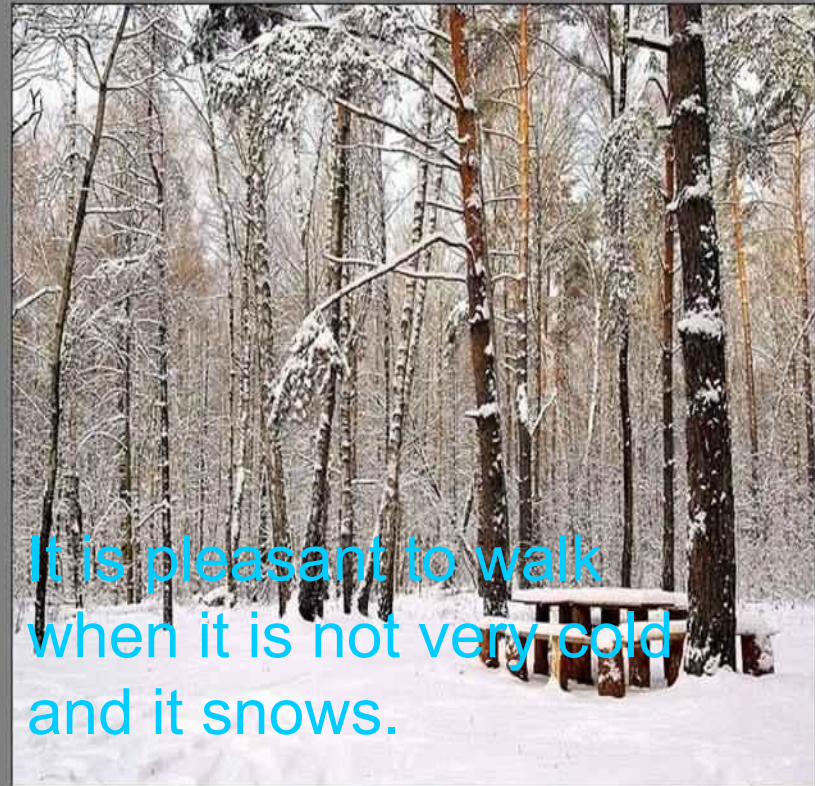

Winter is the coldest season of the year.

Winter is a very beautiful season. It is time of snow and frost.

The winter days are short and gloomy.

Everything looks so pretty covered with snow.

It is pleasant to walk when it is not very cold and it snows.

The ground is covered with snow.

**There are bright and
dark sides in every
seasons. But we must
be thankful together
whatever the weather**
