

# Skysurfing

What kind of sport is it?

It is one of the types of parachuting.

**It is a team sport**

**There are 2 people in a team:**

**a skysurfer and an airoperator**

There is a special airboard on feet; it is like a snowboard

**While floating in the air a skysurfer makes acrobatic tricks**

Not far from him his airoperator is, in free-falling he makes video about everything his partner does

Doing their own jobs, they don't forget about the cooperation with each other

Of course, it's an extreme and dangerous sport

Scysurfing puts your life at risk, but you could experience the rush of adrenalin

This is absolutely incredible!

Try skyserfing...
