

Skysurfing

What kind of sport is it?

It is one of the types of parachuting.

It is a team sport

There are 2 people in a team:

a skysurfer and an airoperator

There is a special airboard on feet; it is like a snowboard

While floating in the air a skysurfer makes acrobatic tricks

Not far from him his airopoperator is, in free-falling he makes video about everything his partner does

Doing their own jobs, they don't forget about the cooperation with each other

Scysurfing puts your life at risk, but you could experience the rush of adrenalin

This is absolutely incredible!

Try skyserfing...

A blurred black silhouette of a person with their arms raised in a celebratory gesture, centered in the background. The person appears to be wearing a short-sleeved shirt and shorts.
