

# SMS GENERATION

# SMS IN THE MODERN WORLD

Nowadays SMS (SMS - short message service) and mobile phones play very important role in our lives.

SMS has its important place in youth culture of communication

With the help of SMS you can say so much while using a few words - is not it a sign of our modern world?

# SMS MESSAGE IN ENGLISH

SMS in English is as popular as in Russian.

They have good advantage – if you use Latin in a message, you can type more letters than in Cyrillic.

So we have a financial benefit.

English language - a language of international communication and everyone will understand your text message.

- :( Sad face for sadness, upset
- ;) Wink

# THE MOST WIDESPREAD TYPES OF SMS AMONG THE STUDENTS AND ADULTS

# SMS - WORLD LANGUAGE

People have always dreamed of creating a world language that would unite all nations. Today this is SMS – language.

Real human relations is replaced by formal replies as short text messages. Of course, humanity cannot stop progress but we must not forget that we are people and should try to keep the warmth and the value of relationships.

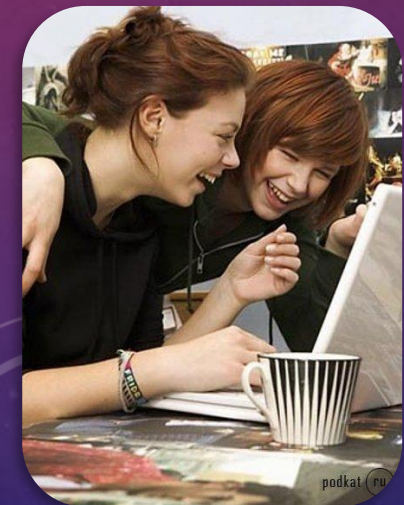

And even such convenient and fastest form of communication as text messages should not turn into the main method of communication.

Antoine de Saint Exupery said:

*“The greatest luxury in the world - is the luxury of human communication”.*

Let it remain the luxury and will not turn into an everyday rapid-fire exchange of information.

THANK YOU FOR  
ATTENTION
