

**The most important problems of our environmental  
And  
How save our planet?**

# ECO-MATERIAL

- Environmentalists say the air in a modern apartment 4 times dirtier than the outside, and 7 times more toxic. The main source of pollution - finishing materials and furniture.
- For construction and repair of premises used harmless substances.
- Such material are more friendly for our health

# FACTORIES

- Pollution from car , factories and power station is causing harmful greenhouse gases to build up in the Earth's atmosphere.
- These gases prevent heat from escaping , and as a result our planet is getting warmer.
- This process is know as **global warming**

# CYCLING ROADS

- The biggest polluter today is the car. This problem is especially bad in cities , where the number of cars is increasing every year.
- For shorter journeys cycling is a much healthier alternative to driving a car , and many towns have introduced special **cycle lanes**.

# ECO-PATROL

- The big car companies are also working on developing new engine technology , so that cars can run on **clear** fuels such as hydrogen instead of petrol .
- This reduce the amount of pillution

# ECO-LABEL

- We can help the environmental by choosing to buy green products , for example organic foods that are produced without using pesticides.

Eco-label Européen.

**Eco-labels and Green Stickers** are labeling systems for food and consumer products.

# CLEAN DAY

- In this day people should clean parks , beaches , streets from rubbishes . We have to meet once on week and make our environmental more cleaner. We must take carry about our future.

# DON'T USE PESTICIDES

- The term GM foods is most commonly used to refer to crop plants created for human or animal consumption using the latest molecular biology techniques.

## Human health risks:

- Allergenicity
- Unknown effects on human health
