The majestic past of Varozia was the source of fables, often short and simple, but always impressive. Here are a few of them.

Tsar Georgey went out hunting with his court. He took along with him his daughter, the young Tsarevna Tamar. The hunt began and the tsar and his court forgot about the tsarevna. Carried away with excitement, Tamar got lost in the caves. The huntsmen began anxiously to search for her: "Tamar, where are you, Tamar?" called one of them. The last girl cried out, "Ak var dzia" ("Here I am, uncle"). It is suggested that the place got its name from these last two words.

According to a second legend, in one of the high cliffs in a gorge of the river Mtkvari, work had begun on the royal monastery, Vardzia. The stone was crumbly, and this complicated the process of hewing out the caves. In the evening, when work was over for the day, the workmen put down their tools and made their weary way home. Next morning the tools were not there. After a long search, the men found them by another cliff in a completely different place. The workmen returned to the old place in amazement and continued their work. Next morning exactly the same thing happened - their tools had once again been moved. Then the workmen understood that this was the "pointing finger" and obeyed it. They began to hew out Vardzia in a new place and from then on the old place was known as Navardzera (former Vardzia).

A third legend tells that to prevent the enemy from finding out where the tsaritsa lived, Tamar ordered that 365 caves should be hewn out in Vardzia - one for every day in the year. Every day a nother room was hollowed out and it took a year to complete the whole complex.

Тиамаг образовалась последним, и эго катастрофы искажило его сущность по сравнению с мирами Тора и Атлантиды. Время потекло не так, и жители, пришедшие в этот мир, быстро разбились. Тиамаг - мир сильных боцов и великих противостояний, непредсказуемого баланса сил и тонких интриг. Мир, где все может очень быстро измениться...

Мир Тора стал пустынным двойником мира катастрофы. Но время неумолимо шло, и жители осваивали непроходимые просторы. Поначалу им не приходилось бороться за ресурсы, рынки, территории, и между ними установился хрупкий паритет. Но с недавнего времени мир начал открываться и в нем стали появляться люди, пришедшие из других миров. И никто теперь не скажет, в какую сторону пошатнется чаша равновесия.

Атлантид за это время стал наиболее устойчивым миром. Вечная борьба за власть, первичность рынков, медлителность и ресурсов сделали его трудным для выживания тех, кто не обучен в совершенстве мастерству боя или плетения заклинаний.

# Are vampires the same nowadays?

Do vampires  
exist? Are  
they real or  
are they  
some myth  
from the  
past?

Vampires don't exist in the form made so popular by Hollywood. Those terrible vampires are purely a work of fiction. These ones are some myth from the past.
