Alekseevich.

What is warehouses?

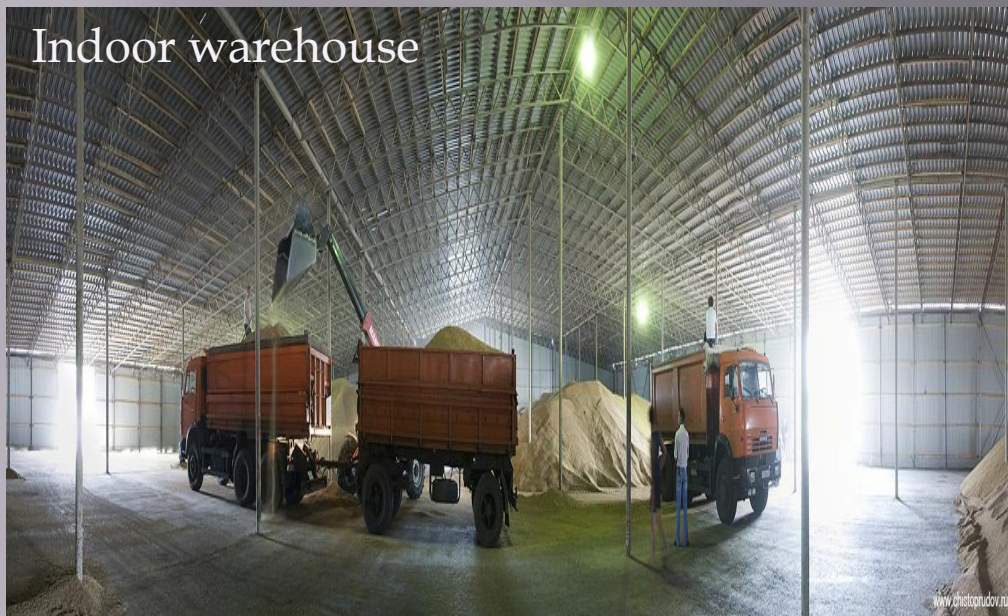

- ▣ Warehouses – buildings and equipment for storing, recording and issuing of all material assets in construction, in the form of enclosed spaces, canopies, stacks of outdoor and special areas.

What are the warehouses?

Warehouses and sheds are used for storing cargoes during any periods of time before they are conveyed to the quays and loaded on board. There are single-floor-two-floor-, and mul-tifloor sheds and warehouses in a modem port. In the warehouses special care should be taken to ensure even distribution of natural and artificial light-ing .
