# Hypothesis:

**We count , that remarkable substance water , it is necessary for a life of the ground and on the ground.**

## **The purposes and problems:**

- To systematize representations about distribution of water on the ground.
- To find out value of water for plants , animal , the person.
- To open principal causes and consequences of pollution water.

# Kind from space.

- On the globe and a card our planet.
- Water is blue: oceans, seas, rivers.

# Waters of reservoirs.

oceans

Seas

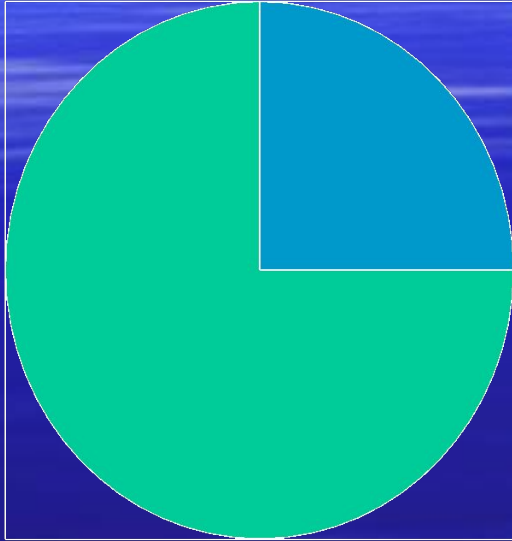

Rivers

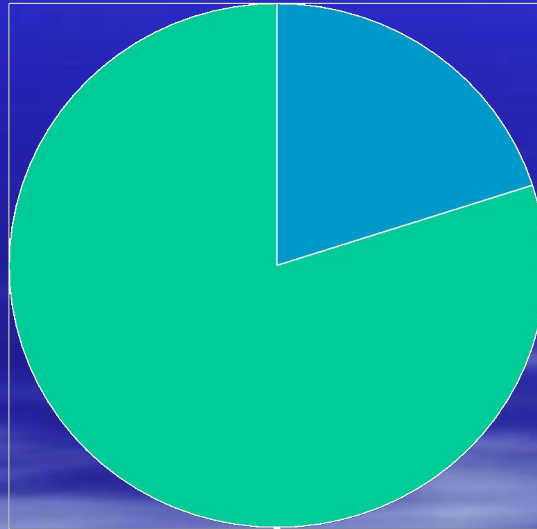

Lakes

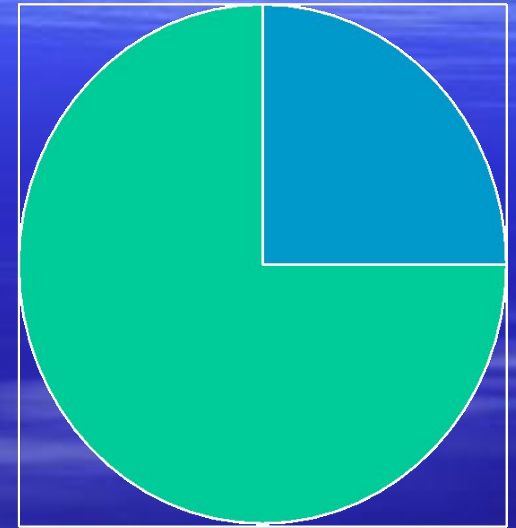

# Water , water – circle water...

On the ground –  $\frac{3}{4}$

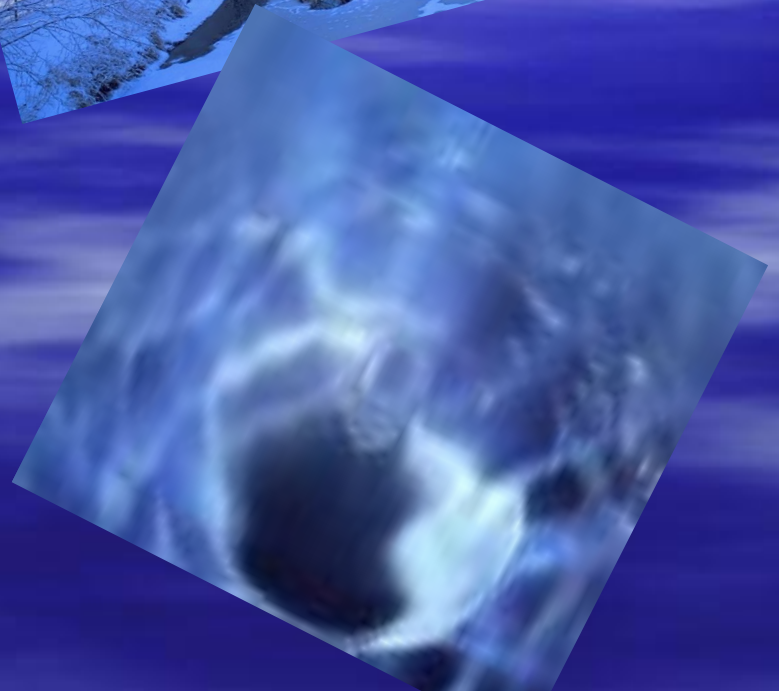

In plants -  $\frac{4}{5}$

In the person– $\frac{3}{4}$

There is no end to its various transformations:  
the she a dewdrop, a sparkling snowflake,  
transparent ice.

# Consequences of activity of the person

# Pollution of reservoirs

# The Caucasian mineral waters.

# Mineral source

# Conclusions:

- Water transfers heat and warms houses.
- Water is necessary for transport.
- Water is necessary in the industry and an agriculture.
- Water is necessary for plants, animals, and people.
- Water is one of the most important resources of the Earth!
