

You don't know how to
spend the weekend in
Belarus?

I'll help you.

I'll tell you about introducing the three
non-trivial options for travel in Belarus.

For art historians

Love art? Get tickets to Vitebsk. Near this town is the estate of the artist Ilya Repin, where he lived for 8 years. The wooden house was built on sketches of Repin and like structure rather on a fairy tower.

During the Second world war the manor was completely destroyed, but in the 80s, the architects have restored the old sketches. The main house is now the Museum of Repin, but the area around is a downright charming Park.

THE CHURCH OF GERVYATY

With those who love sightseeing tour, and without hesitation ready to go on a bus tour and even around the whole Earth, we recommend you to go see the Church of Gervyaty.

Have you heard about this? If the answer is no, then get ready to see the highest and beautiful Church in Belarus. Amazing, but somehow this place is not too well known among Belarusians. But it is better to purposefully not go to Church, and to go on the excursion "Ostrovets around the world".

The gist of it is that in one trip you can visit all the best Catholic churches in Grodno region and to see the temples in Salah, Mihalisko, Vornado and Ostrovets.

FOR Gourmet

As in "Korobkina" tasty food real Belarusian cuisine! Mmmm... But not just your restaurant interested in this agro-turism complex. This is a real estate-Museum under the open sky.

The complex is located near Grenoble (the most beautiful city of Belarus, by the way). From the city and should start, and then to travel to nature in Korobchitsy. The territory is huge and stylized under ancient 19th century manor house. Here is a restaurant with Belarusian cuisine, jousting area, workshops of craftsmen and the zoo. Overall, the experience for everyone!
