Man Enters Space

'So Close, Yet So Far,' Sighs Cape

U. S. Had Hoped For Own Launch

CAPE CANAVERAL, Fla. (AP) — The Redstone rocket which the United States had hoped would boost the first man into space stands on a launching pad here. The Soviet Union beat its firing date by at least two weeks.

"So close, yet so far," commented a technician who is helping groom the Redstone to send one of America's astronauts on a short sub-orbital flight, hopefully late this month or early in May.

"If we hadn't had those troubles last fall and on the chimp and Little Joe shots this year, we might have made it," the technician said.

"But you have to give the Russian scientists credit. They've accomplished a remarkable breakthrough."

Dr. Hugh Dearden, deputy director of the National Aeronautics and Space Administration, told

Soviet Officer Orbits Globe In 5-Ton Ship

Maximum Height Reached Reported As 188 Miles

MOSCOW (AP)—A Soviet astronaut has orbited the globe for more than an hour and returned safely to receive the plaudits of scientists and political leaders alike. Soviet announcement of the feat brought praise from President Kennedy and U. S. space experts left behind in the contest to put the first man into successful space flight.

By the Soviet account, Maj. Yuri Aleksyevich Gagarin, rode a five-ton spaceship once around the earth in an orbit taking an hour and 20 minutes. He was in the air a total of an hour and 49 minutes.

The whole sequence of events and the announcements relating to it raised a number of questions. The Soviet announcement said the flight took place today between 9:07 and 10:55 a.m., but some persons in Moscow's Western colony were skeptical that the feat actually came off today.

VON BRAUN'S REACTION:

To Keep Up, U. S. A. Must Run Like Hell

Голубая планета - Земля

Белка и Стрелка

Наш маршрут:

- 3 Солнечная семейка
- 2 Загадочная
- 1 Планета звездочетов
- 4 Планета веселых человечков
- 5 Планета Физкультурников
- 6 Планета Сказочная
- 7 Планета Развлечений

Физминутка для глаз

«Космическая»

Кто такой звездочет?

Звезд на небе около 200
млн.

Солнце

Горячие звезды- белые,
холодные- красные
