образуют нить , а на ней  
почки.

ДА

НЕТ

**10.** Гаметы образуются на разных растениях.

ДА

НЕТ

•  
**11. У сфагнума есть  
ризоиды.**

ДА

НЕТ

**12.** У сфагнума нет  
ризоидов.

ДА

НЕТ

•  
**13.** Сфагнум, отмирая, образует торф.

ДА

НЕТ

**14.** При прорастании спор образуется новое растение.

ДА

НЕТ

# 15. Оплодотворение

ВОЗМОЖНО ТОЛЬКО В

ПРИСУТСТВИИ ВОДЫ.■

ДА

НЕТ

Повтори тему

"Моховидные".

**17.** Мхи способствуют заболачиванию леса.

ДА

НЕТ

•  
**18.** Прирост сфагнума  
составляет **10-15** см в год.

ДА

НЕТ

•  
**19.** При слиянии гамет образуется зигота.

ДА

НЕТ

**20.** Биология- наука,  
изучающая мхи.

ДА

НЕТ

Молодец!
