

Endangered animals

Vasilenko Ivan 4b

These beautiful birds live on Mount Everest, in the Himalayas and other mountain areas of Europe and Asia. On their little kids and lambs. It is believed that the size of the population of these birds today is about 10 thousand individuals.

"Clown frog" live in Costa Rica.It have very beautiful color. These frogs left unit.

These funny rare monkeys look like elves. They live mostly in the mountainous Asian and rarely catch the eye. Their species is threatened with extinction due to excessive deforestation.

Thank !!!
