**“Ghost of  
Madagascar”**

A close-up photograph of a lemur, likely a Ring-tailed Lemur, eating a piece of yellow, textured food. The lemur has dark fur around its eyes and a white patch on its forehead. Its mouth is open, showing its pink tongue and teeth. The background is blurred.

# LEMUR

# The reason of my choice

The cartoon on Nickelodeon channel  
"Penguins of Madagascar" ⇒ **lemur "King  
Julien"**

# The habitat of my animal

- Lemurs live in Madagascar and Comoros
- Due to the variety of flora in these islands lemurs quickly get used to this ecosystem.

# Protecting from predators

- The main enemies of lemurs in their natural habitat are owls, eagles, snakes. They can be protected by powerful claws and dexterous hands. But this tool is available for adults, kids can not hope for their hands.

# Climate zone

For a long time different kinds of these primates adapted to:

- the jungle of the tropical monsoon climate
- the forests
- the temperate-marine climate

# Nowadays

Most lemur species are listed in the Red Book and they need protection and special treatment from people. Now 80% of lemurs are in zoos
