

Луг - природное сообщество

A detailed painting of a meadow. The scene is filled with numerous white daisies with bright yellow centers, scattered throughout the frame. Interspersed among the daisies are several red flowers, possibly poppies, which are partially visible. The background consists of tall, green grasses and foliage, rendered with soft, painterly brushstrokes. The overall color palette is dominated by greens, whites, and yellows, with accents of red.

● План:

1. Что такое луг?

2. Растения луга.

3. Животные луга.

4. Использование лугов.

- 
- A wide-angle photograph of a tulip field. The foreground and middle ground are filled with numerous tulips in various colors, including bright yellow, vibrant red, and orange. The flowers are in various stages of bloom, with some fully open and others as buds. The background shows a flat horizon line with a few distant trees and a cloudy sky. The overall scene is bright and colorful.
- Луг – это содружество травянистых растений и животного мира.
