

Deforestation is a global problem of modern world.

People use paper every day. But we often deal with it carelessly. We throw it around, do not save it and do not use it in a proper way and it become wastes.

Every year about **20000000 m²** trees are cut down in Russia. For make **50-70 sheets** of such paper need **1 trees**.

These trees are the source of oxygen. It's necessary for all people and animals' breath.

People!

Economize paper and save forests.

Our future is in a our hands.

Thanks for attention.
