

ОКРУЖАЮЩИЙ МИР

2 класс

«КРАСОТА НЕБА»

Огненная радуга – удивительное природное явление

A vibrant green aurora borealis (Northern Lights) illuminates a dark, starry night sky. The light reflects on a calm body of water in the foreground, which is dotted with numerous icebergs. The shoreline is rocky and dark, and distant mountains are visible under the glowing light. The overall scene is serene and majestic.
