

Геометрия в начальной школе.

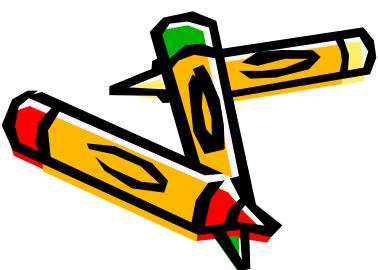

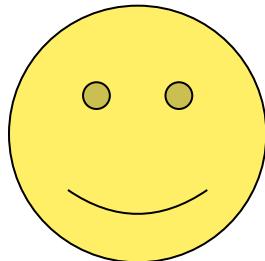

Материалы для уроков математики. 1-4 класс.
Работа учителя начальных классов
Щеблыкиной Т. М.

Понятие о точке.

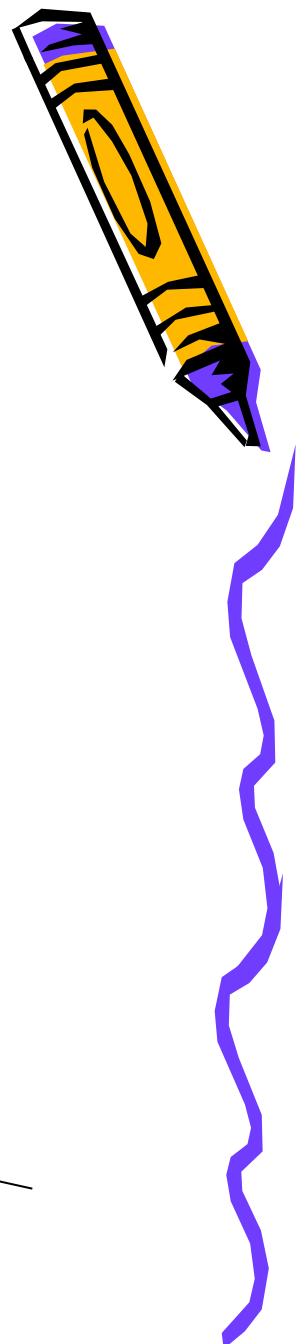

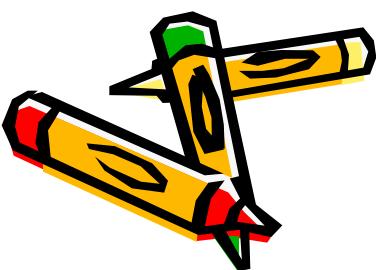

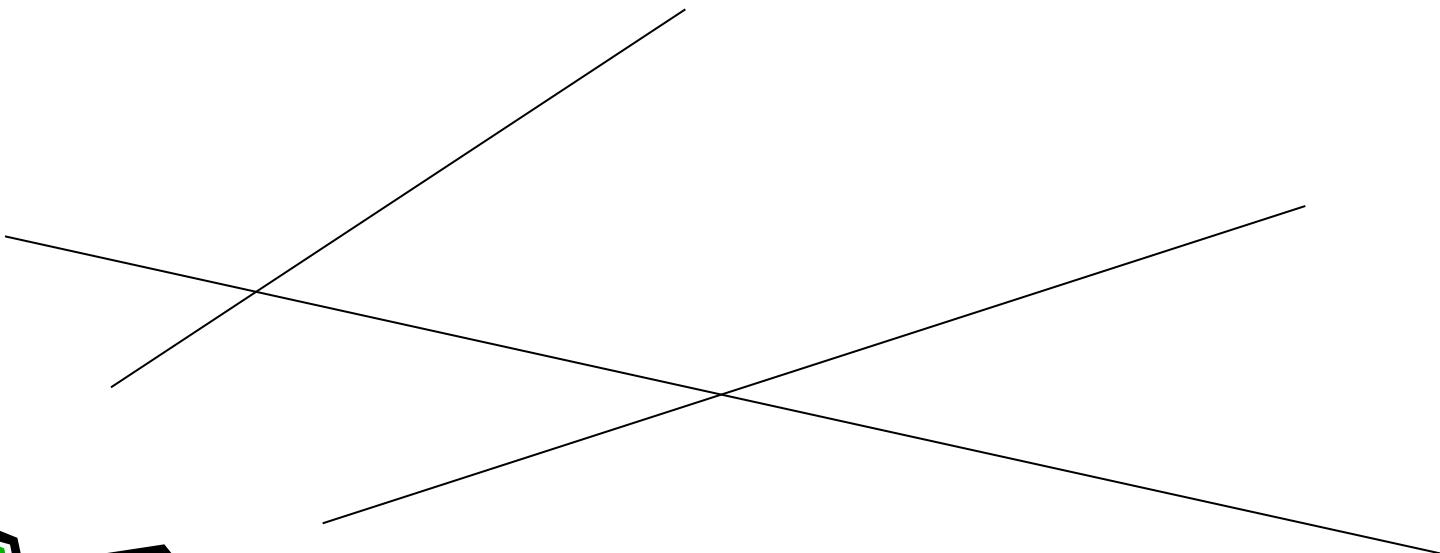

- В каждой геометрической фигуре есть множество точек.

—Познакомьтесь
со мной, я точка.

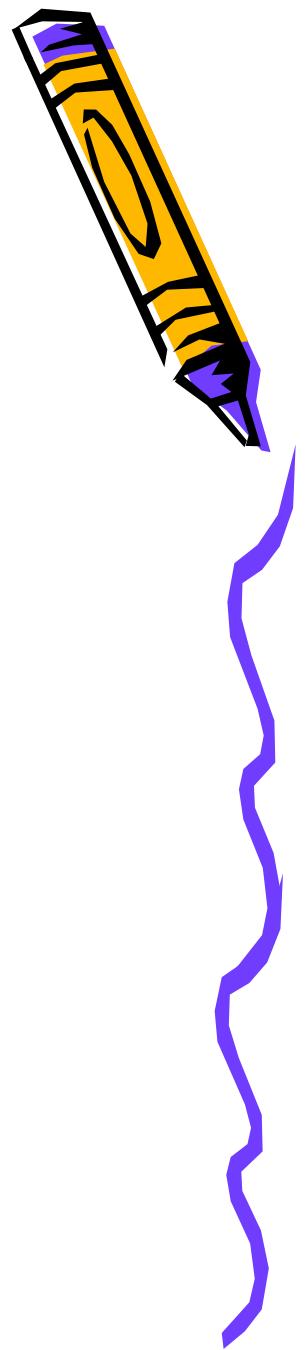

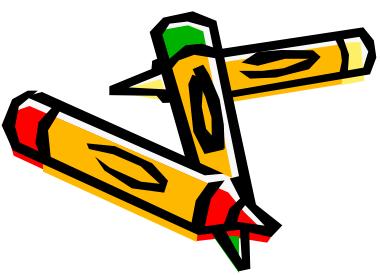

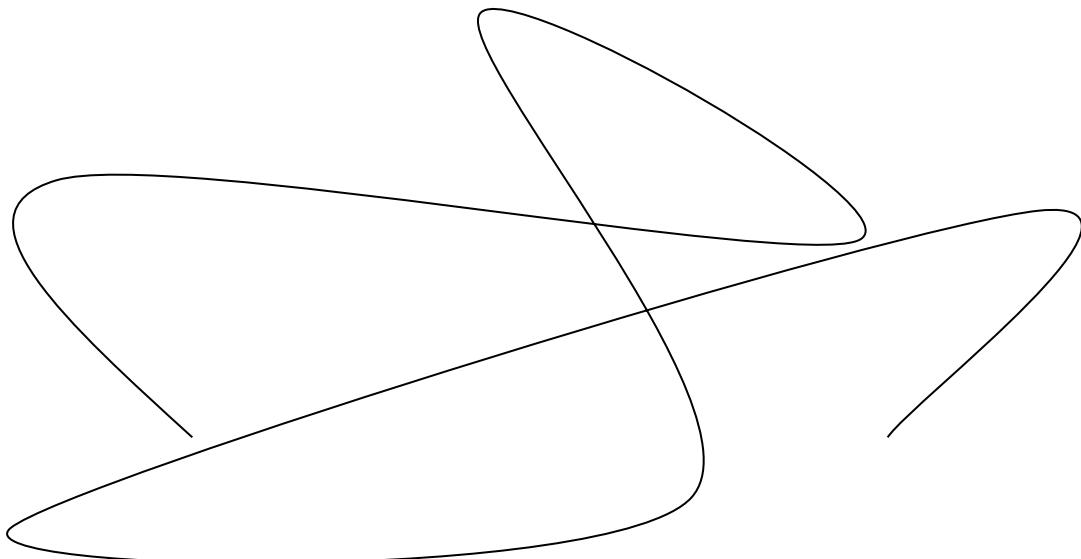

Прямая.

- Линия не ограниченная с двух сторон, называется прямой.

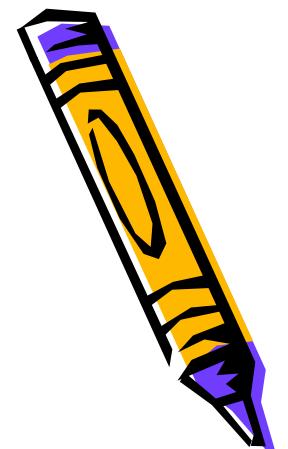

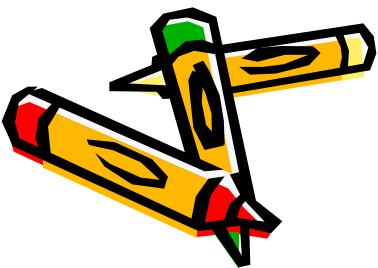

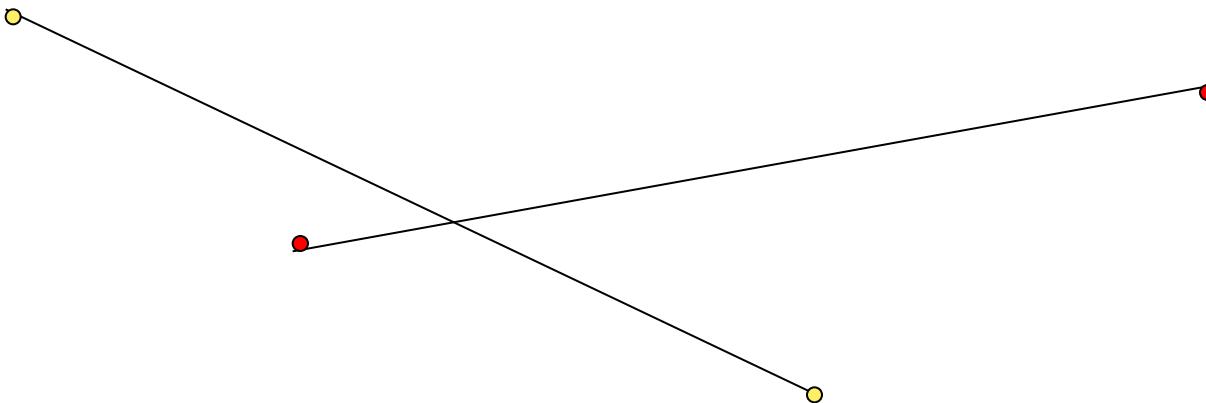

Кривая линия.

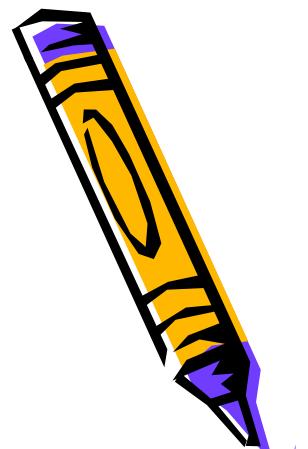

Отрезок.

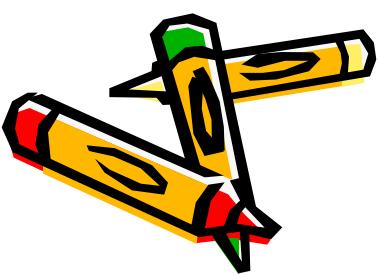

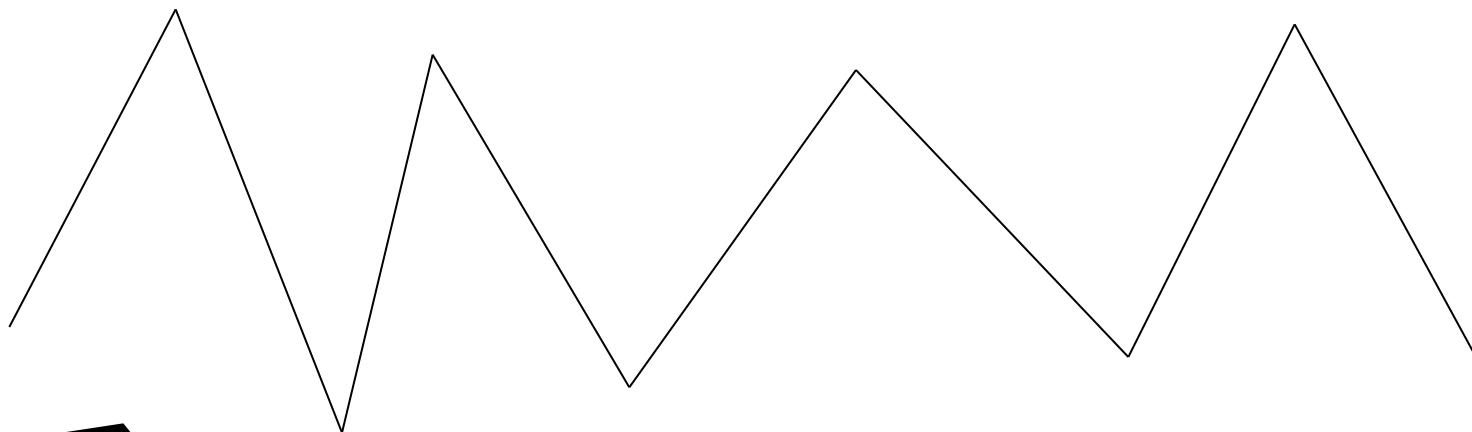

- Прямая линия , ограниченная с обеих сторон, называется отрезком.

Ломаная.

- Из каких геометрических фигур состоит ломаная?
- Как должны располагаться отрезки?

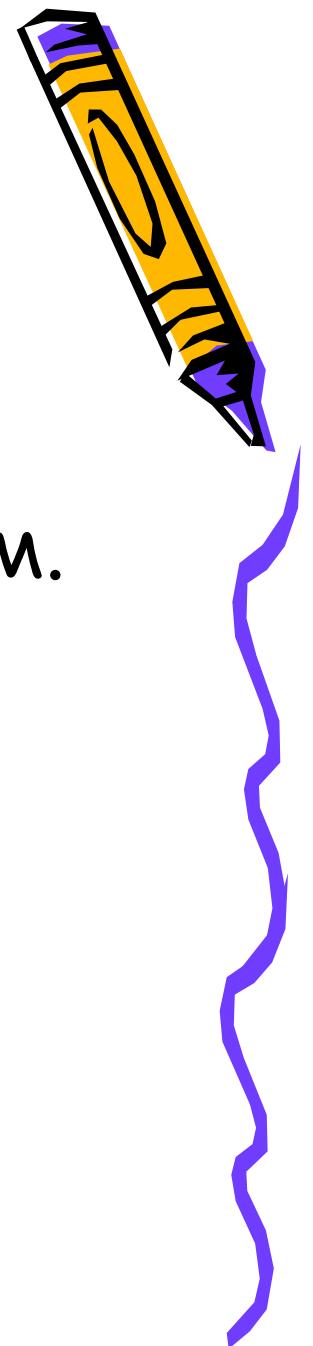

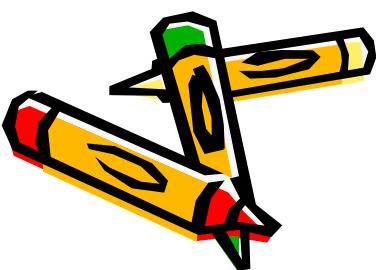

Луч.

- Прямая линия , ограниченная с одной стороны, называется лучом.

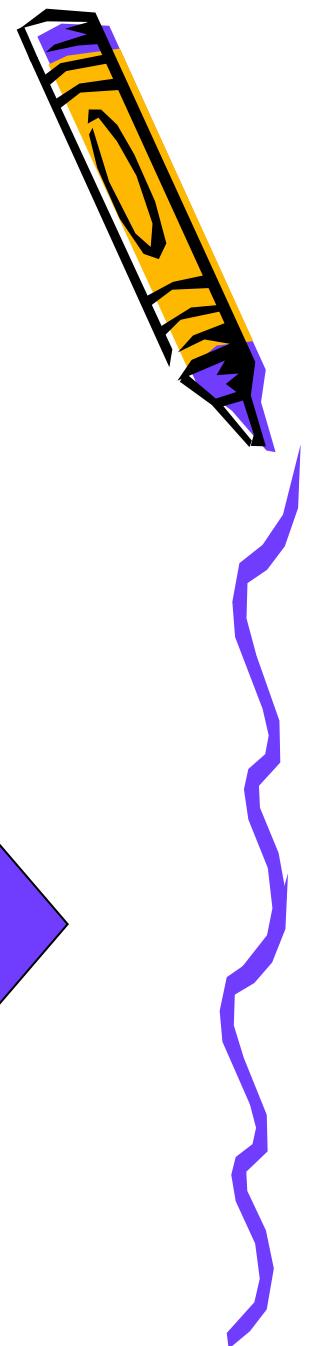

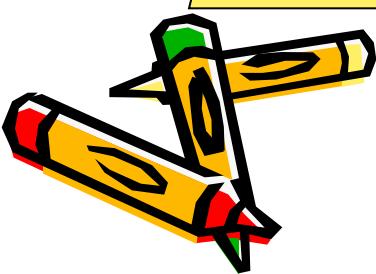

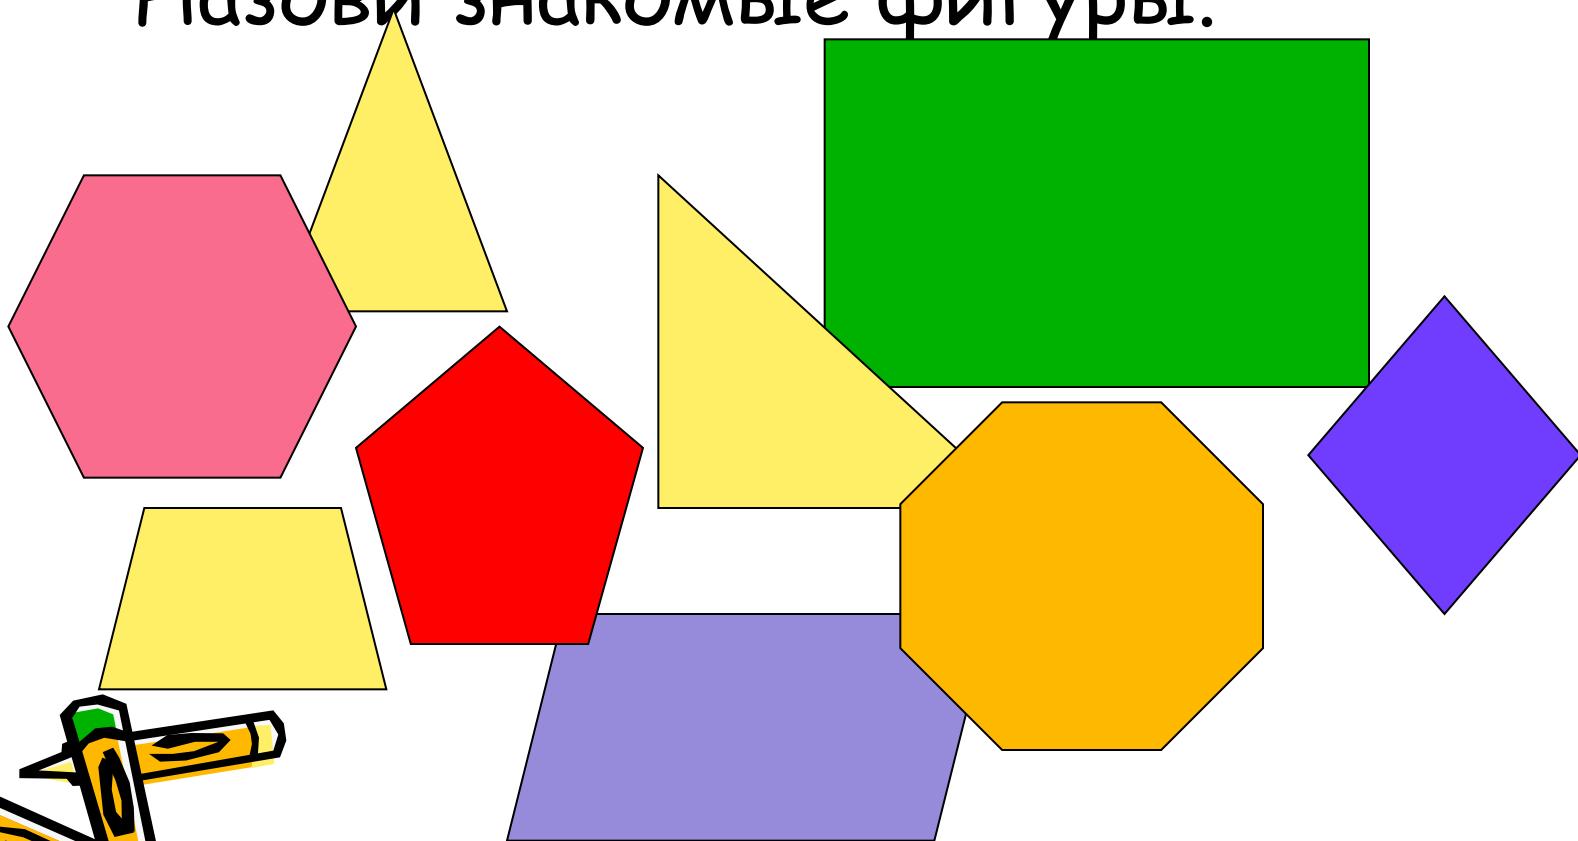

-Здесь я в
начале.

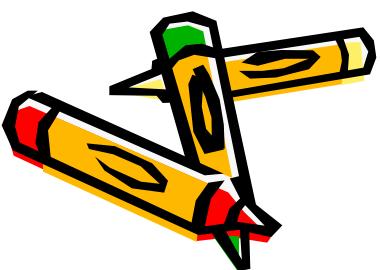

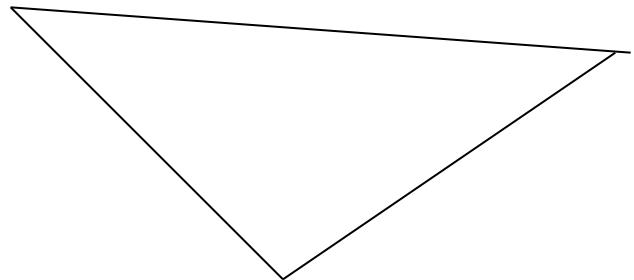

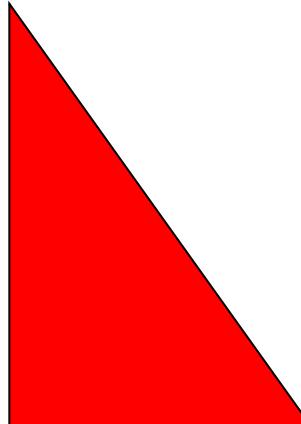

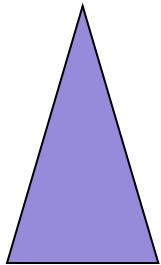

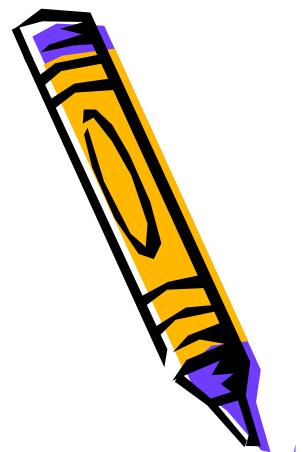

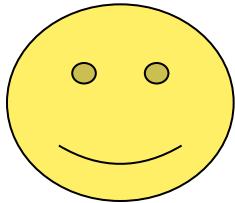

Геометрические фигуры.

Назови знакомые фигуры.

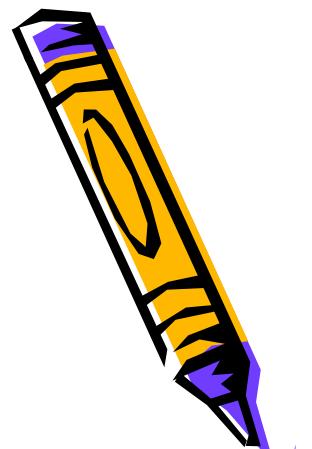

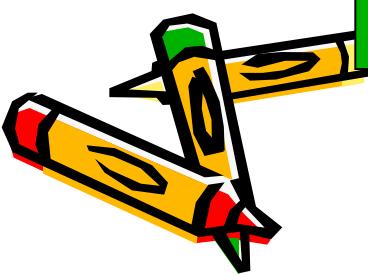

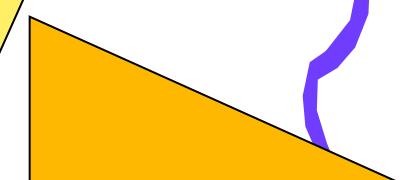

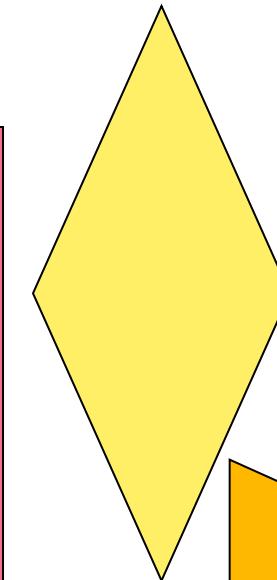

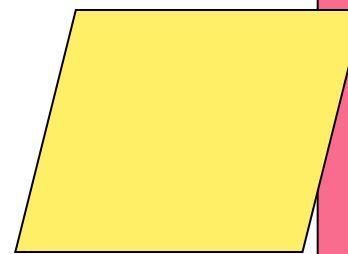

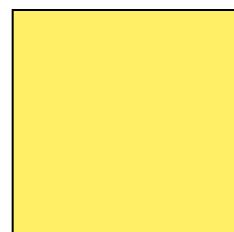

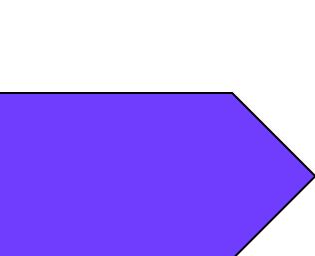

Запомни!

Виды треугольников.

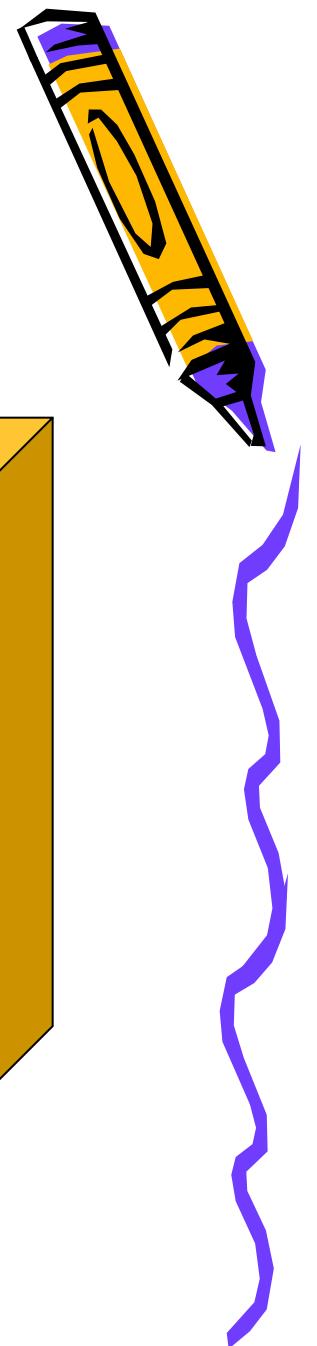

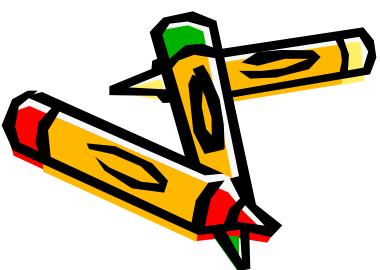

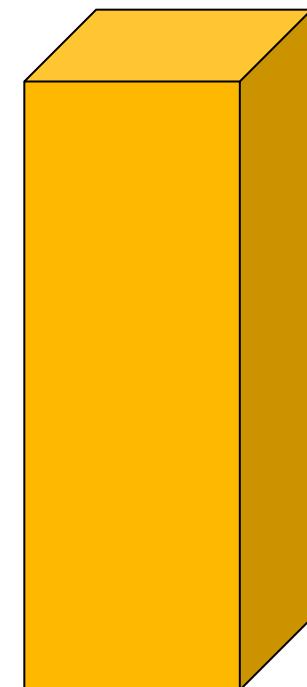

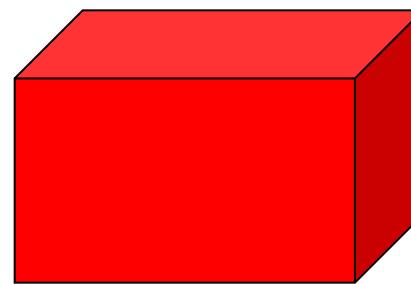

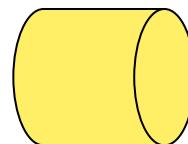

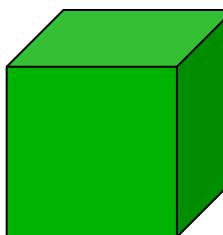

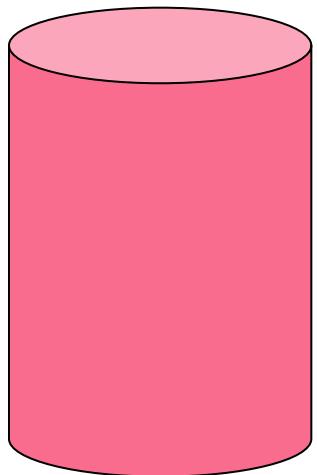

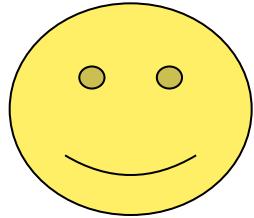

Прямоугольник.

- Найди среди фигур
прямоугольники.

Объёмные фигуры.

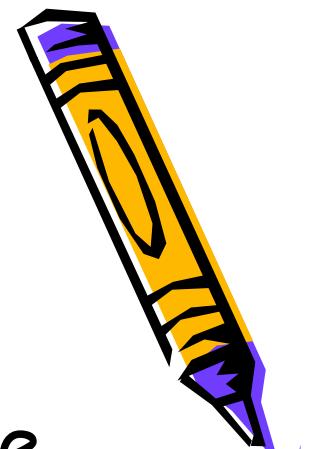

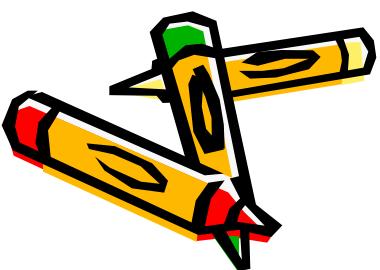

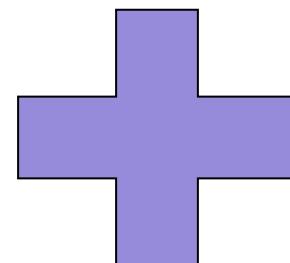

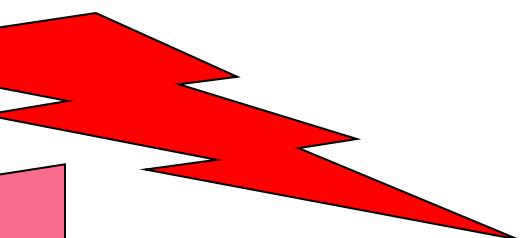

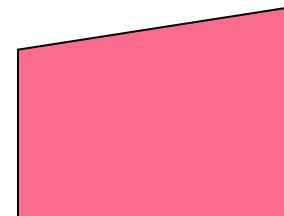

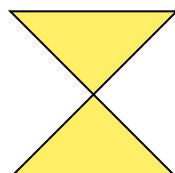

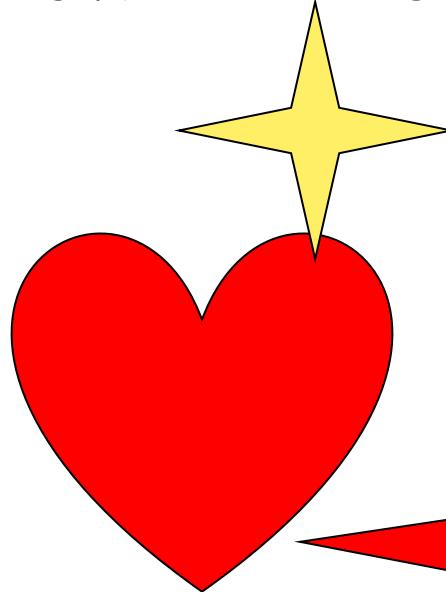

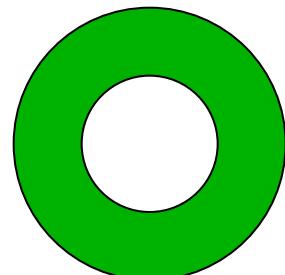

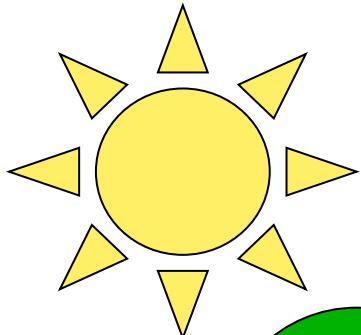

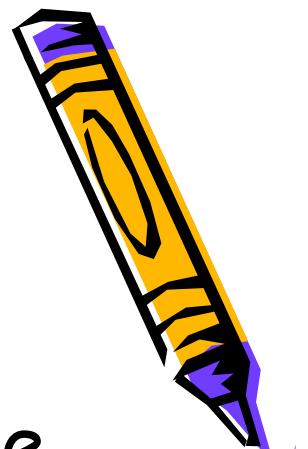

Составь
свои
фигуры.

Игра.

- Найди известные геометрические фигуры .

Геометрия в жизни человека.

- Где мы можем увидеть изученные геометрические фигуры?
- Какие предметы имеют форму квадрата?
- Какие предметы имеют форму круга?
