# The Text : *The Environmental Pollution*

People have always polluted their surroundings. But until now pollution was not such a serious problem. People lived in uncrowded rural areas and did not have pollution — causing machines. With the development of crowded industrial cities which put huge amounts of pollutants into small areas, the problem has become more important.

SAVE TREES

THEY WILL SAVE YOU

Automobiles and other new inventions make pollution steadily worse. Since the late 1960's people have become alarmed with the danger of pollution. Air, water, and soil are necessary for existence of all living things. But polluted air can cause illness, and even death. Polluted water kills fish and other marine life. On polluted soil, food can not be grown. In addition environmental pollution spoils the natural beauty of our planet.

Pollution is as complicated as serious problem. Automobiles are polluting the air but they provide transportation for the people. Factories pollute the air and the water but they provide jobs for people and produce necessary goods. Thus, people would have to stop using many useful things if they wanted to end pollution immediately. Most people do not want that of course. But pollution can be reduced gradually.

Scientists and engineers can find the ways to reduce pollution from automobiles and factories. Government can pass the laws that would make enterprises take measures for reducing of pollution. Individuals and groups of people can work together to persuade enterprises to stop polluting activities.

# Exercises

1. But until now pollution  e)
2. With the development of  a)
3. Automobiles and other new inventions  b)
4. Polluted water  d)
5. Scientists and engineers can find  c)

a) crowded industrial cities which put huge amounts of pollutants into small areas, the problem has become more important.

b) make pollution steadily worse.

c) the ways to reduce pollution from automobiles and factories.

d) kills fish and other marine life.

e) was not such a serious problem.

1. **People** have always polluted their surroundings.
2. **Automobiles** and other new inventions make pollution steadily worse.
3. Since the late .....1960..... people have become alarmed with the danger of pollution.
4. Air, water, and soil are necessary for .....Existence..... of all living things.
5. But polluted air can cause .....Illness..... , and even .....Death..... .
