STATISTICS Trade and tariff data

The WTO provides quantitative information in relation to economic and trade policy issues. Its data-bases and publications provide access to data on trade flows, tariffs, non-tariff measures (NTMs) and trade in value added.

STATISTICS

Merchandise trade

WTO provides data on imports and exports of goods, aggregated or individually by product and/or country. Annual data are updated in April and in July of each year, and broken down by commodity group and selected origin and destination in August. Quarterly data are updated every 2 weeks and monthly data are updated daily.

Copyright:

Permission to make digital or hard copies of any information contained in these web pages is granted for personal or classroom use, without fee and without formal request.

Copies may not be made or distributed for profit or commercial advantage.

Databases and Time Series [back to top](#)

- [Statistics Database \(SDB\)](#)
Online database containing time series on international trade, country trade, tariff and [services profiles](#).
Updated 3 times a year, in April, July and in August.
- [Short-term trade statistics](#)
Monthly data updated daily and quarterly data updated every 2 weeks.

.style1 { height: 122px; }

Statistics database

Welcome to the WTO Statistics Database, which allows you to retrieve statistical information in the following presentations.

- The *Trade Profiles* provide predefined information leaflets on the trade situation of members, observers and other selected economies;
- The *Tariff Profiles* provide information on the market access situation of members, observers and other selected economies;
- The *Services Profiles* provide detailed statistics on key infrastructure services (transportation, telecommunications, finance and insurance) for selected economies;
- The *Aid for Trade Profiles* provide information on trends of aid for trade, trade costs, trade performance and development for selected Aid for Trade recipients;
- The *Time Series section* allows an interactive data retrieval of international trade statistics.

Выводы

Показатель колеблется от -41 000 до +41 000 (в первом случае страна является исключительно импортирующей тот или иной товар, во втором — исключительно экспортирующей тот или иной товар). Показатели, располагающиеся между крайними точками, характеризуют степень вовлечения страны во внутриотраслевую международную специализацию.

Наши значения двух стран резко разнятся. Если смотреть на эти страны в общем масштабе, то роль Казахстана исключительно экспортирующая с максимальным показателем в 2012 году +40091, а Армения – исключительно импортирующая с максимальным показателем в 2013 году -2907. Таким образом, роль Казахстана в МРТ больше, чем Армении.
