

***Проект на тему:
Торговый центр.
Банк.***

Выполнила: Ершова А.А.
Лузанова Е.Э.

Я, Ершова Анастасия, ученица 11б класса
МОУСОШ№9 города Новочеркасска
Ростовской области. По окончании школы
хочу стать архитектором.

Я мечтаю создать торговый центр и банк,
объединив их в единое целое.

Я живу в городе Новочеркасске. Это город
студентов. Новочеркасск в 2005 году отметил
свое 200-летие. Новочеркасск - столица
донских казаков, а после празднования
юбилея, и казаков всего мира.

В настоящий момент город не отстает по красоте от наших столичных центров. А я хочу, чтобы мой город стал еще благоустроеннее. Торговый Центр и банк, мне кажется, значительно улучшат экономическое развитие моего родного города, да и области в целом. Мне хочется, чтобы архитектура и дизайн не уступали бы европейским стандартам, чтобы работать в таких учреждениях было приятно, легко и интересно, а самое главное, чтобы такая работа приносила огромную прибыль, которая будет расходоваться на дальнейшее улучшение благосостояния моего города и его жителей, то есть нас, молодых людей XXI века.

Вашему вниманию я предлагаю
свой проект, В создании которого
мне оказали огромную помощь
учитель английского языка,
Литвинова С.Л., и учитель
информатики, Рыжикова Н.Б.

*Shopping
center
'Europe'*

Director: Luzanova E.
Ershova A.

Our new and modern shopping center refers to 'the Europe'. At us very much a wide range of the diversified goods for children and adults, and the prices pleasantly surprise.

For you some restaurants with various kitchen where it is possible to have a rest work and is tasty to eat. In our center there is a children's room in which you can leave the children during that as you do purchases.

We have some zones of rest: a winter garden, a skating rink and pool. As for you in territory of shopping center the convenient parking works.

The building is constructed with use of the newest technologies and materials. Young and perspective designers of our city participated in its registration.

Coming in “the Europe” you will see the big hall, on a ground floor is shops with home appliances, having risen on the second floor you will return to the childhood because shops with the goods for children there settle down.

On the third floor you can pick up to yourselves clothes from last collections of fashionable designers and not only. And on last floor you will get in the world of sports and books.

*The address: Rostov-on-Don, street
Pushkin 125.*

The report on English
language, on a theme: "
Design of bank "

Introduction

- Good afternoon! We are glad that you have addressed in our company (hitino company)! Now the project of architectural design of one from our banks will be presented to your attention. Pleasant viewing!

Appearance and style

The bank is executed in modern Gothic style, and naturally enters into a modern city interior

Externally represents
four floor building

Internal interior

- The internal interior is executed in the mixed style, but the echo of Gothic style has here again found the place

For example in this style the furniture is executed

Internal interior

- Taking place on corridors you will feel in the medieval lock

Internal interior

However all internal interior is executed in style of a gothic style, For example studies (the second floor) managers are executed modern style "modernist style"

Internal interior

- Workplaces for simple employees will appear approximately so

Internal interior

- The hall for meetings (on the third floor) is issued in strict classical style. But modern technologies are harmoniously entered in it For example the flat screen

Internal interior

- On the last (the fourth floor) service rooms and a room of protection are located. We cannot show their arrangement to you (in connection with privacy of this information)
