references

«Z-Trade Internet trading system is likely one of the most successful systems in the Russian market. A well balanced set of services allows to get the best effectiveness. Deliberate renunciation of developers from resource-intensive and redundant technical analysis services, focus on order management services and original findings in interface administration allowed to create a software ideally suited both for a beginner and an experienced trader…»

Constantine Tsarikhin,
Ph.D., Trader since 1993,
Author of five books and more than 40 publications
on stock markets trading

Z-Trade:

references

«We recommend using Z-Trade to participants in our course. It is not hard to convince them in its advantages. It has only necessary services and no extras. Beginner traders appreciate intuitive interface and speed. They don't need redundancy, and for technical analysis needs it is more practical to use dedicated packages (MetaStock, for example) which are perfectly compatible with Z-trade. 90% of our graduates use Z-trade as a basic internet trading system.»

Vladimir Baranin,
Director of raining center
of Zerich Capital Management
Investment Company

Z-Trade:

development plans

- Improvement of performance, security and ergonomics;

- Improvement of marginal lending system;

- Development of integrated technical analysis tools;

- Building-in additional news bulletins;

- Development of built-in information and research tools and quotes translation from world's leading stock exchanges.

Thank you for your attention
