Альбер Робидо  
(14 марта 1848— 11 октября 1926)

— французский  
карикатурист, иллюстратор  
и писатель.

В 1880-е написал  
футуристическую трилогию  
романов, став предтечей  
СТИМПАНКА.

$$J_{\text{tot}} = J + \frac{\partial D}{\partial t}$$

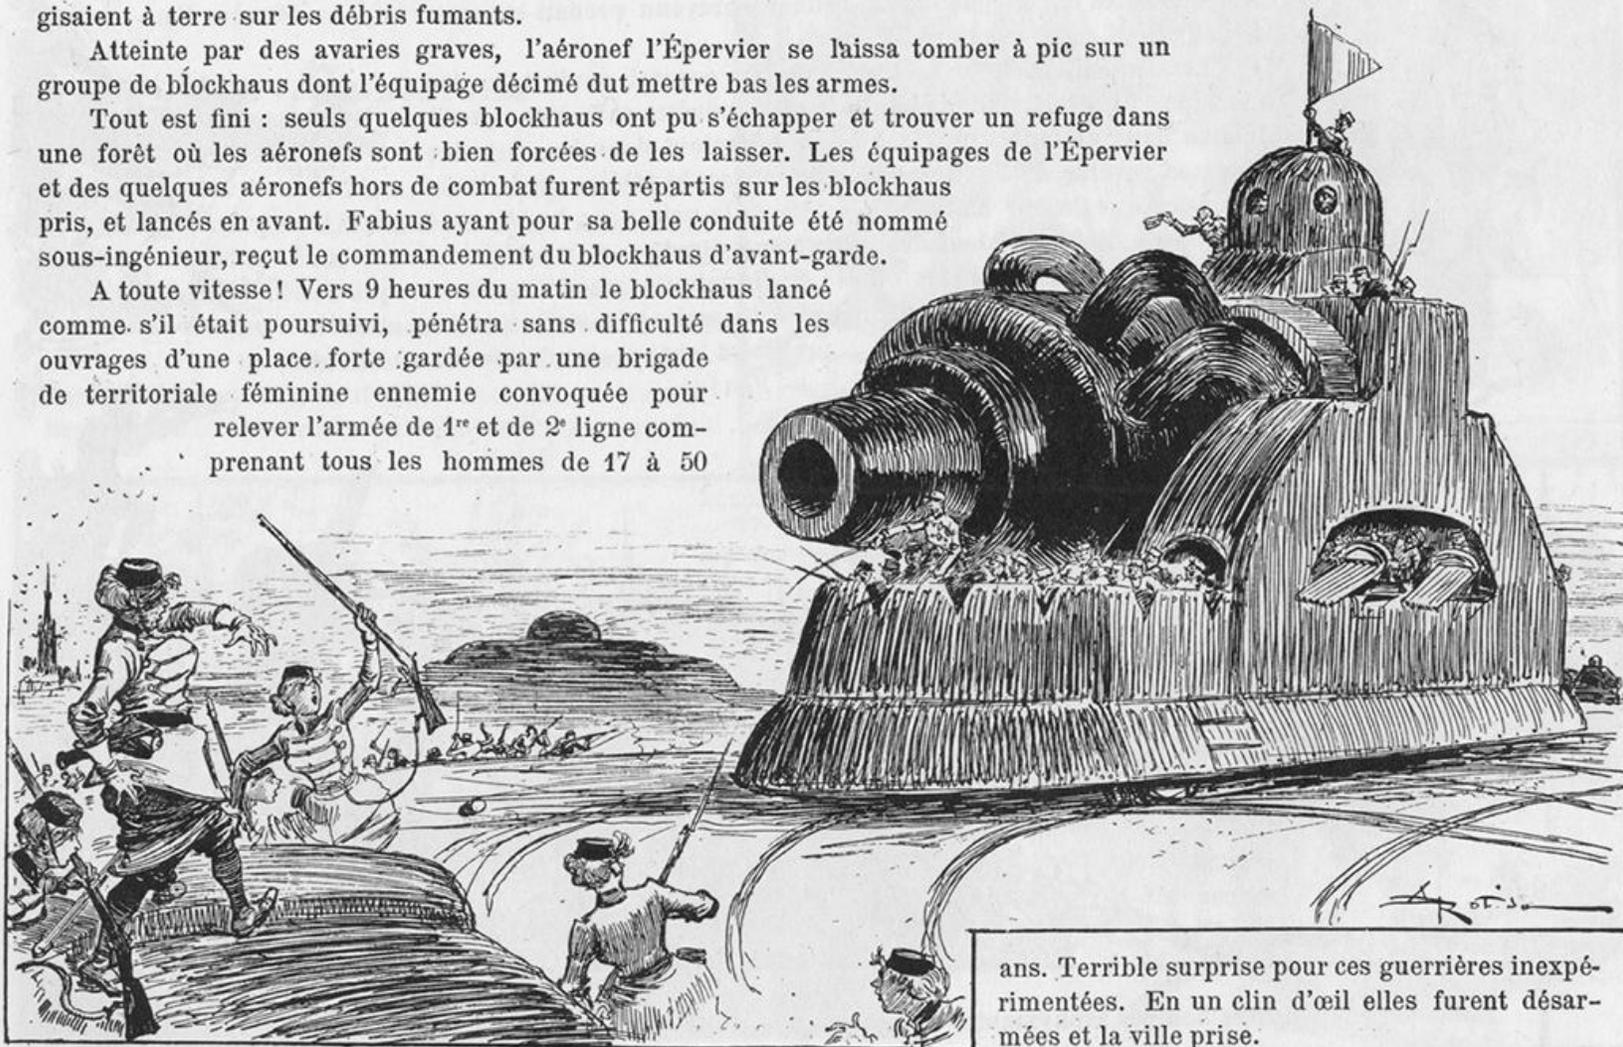

$$E = \frac{1}{2} D$$

blockhaus étaient déjà détruits, d'autres se défendaient plus mollement, mais deux aéronefs gisaient à terre sur les débris fumants.

Atteinte par des avaries graves, l'aéronef l'Épervier se laissa tomber à pic sur un groupe de blockhaus dont l'équipage décimé dut mettre bas les armes.

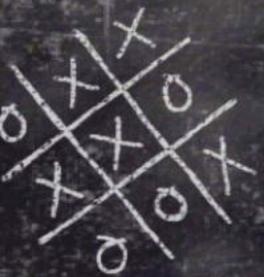

Tout est fini : seuls quelques blockhaus ont pu s'échapper et trouver un refuge dans une forêt où les aéronefs sont bien forcées de les laisser. Les équipages de l'Épervier et des quelques aéronefs hors de combat furent répartis sur les blockhaus pris, et lancés en avant. Fabius ayant pour sa belle conduite été nommé sous-ingénieur, reçut le commandement du blockhaus d'avant-garde.

A toute vitesse! Vers 9 heures du matin le blockhaus lancé comme s'il était poursuivi, pénétra sans difficulté dans les ouvrages d'une place forte gardée par une brigade de territoriale féminine ennemie convoquée pour relever l'armée de 1<sup>re</sup> et de 2<sup>e</sup> ligne comprenant tous les hommes de 17 à 50

ans. Terrible surprise pour ces guerrières inexpérimentées. En un clin d'œil elles furent désarmées et la ville prise.

Handwritten notes in cursive script, partially legible, including the words "and our" and "class with".
