

# TROPICAL RAINFOREST

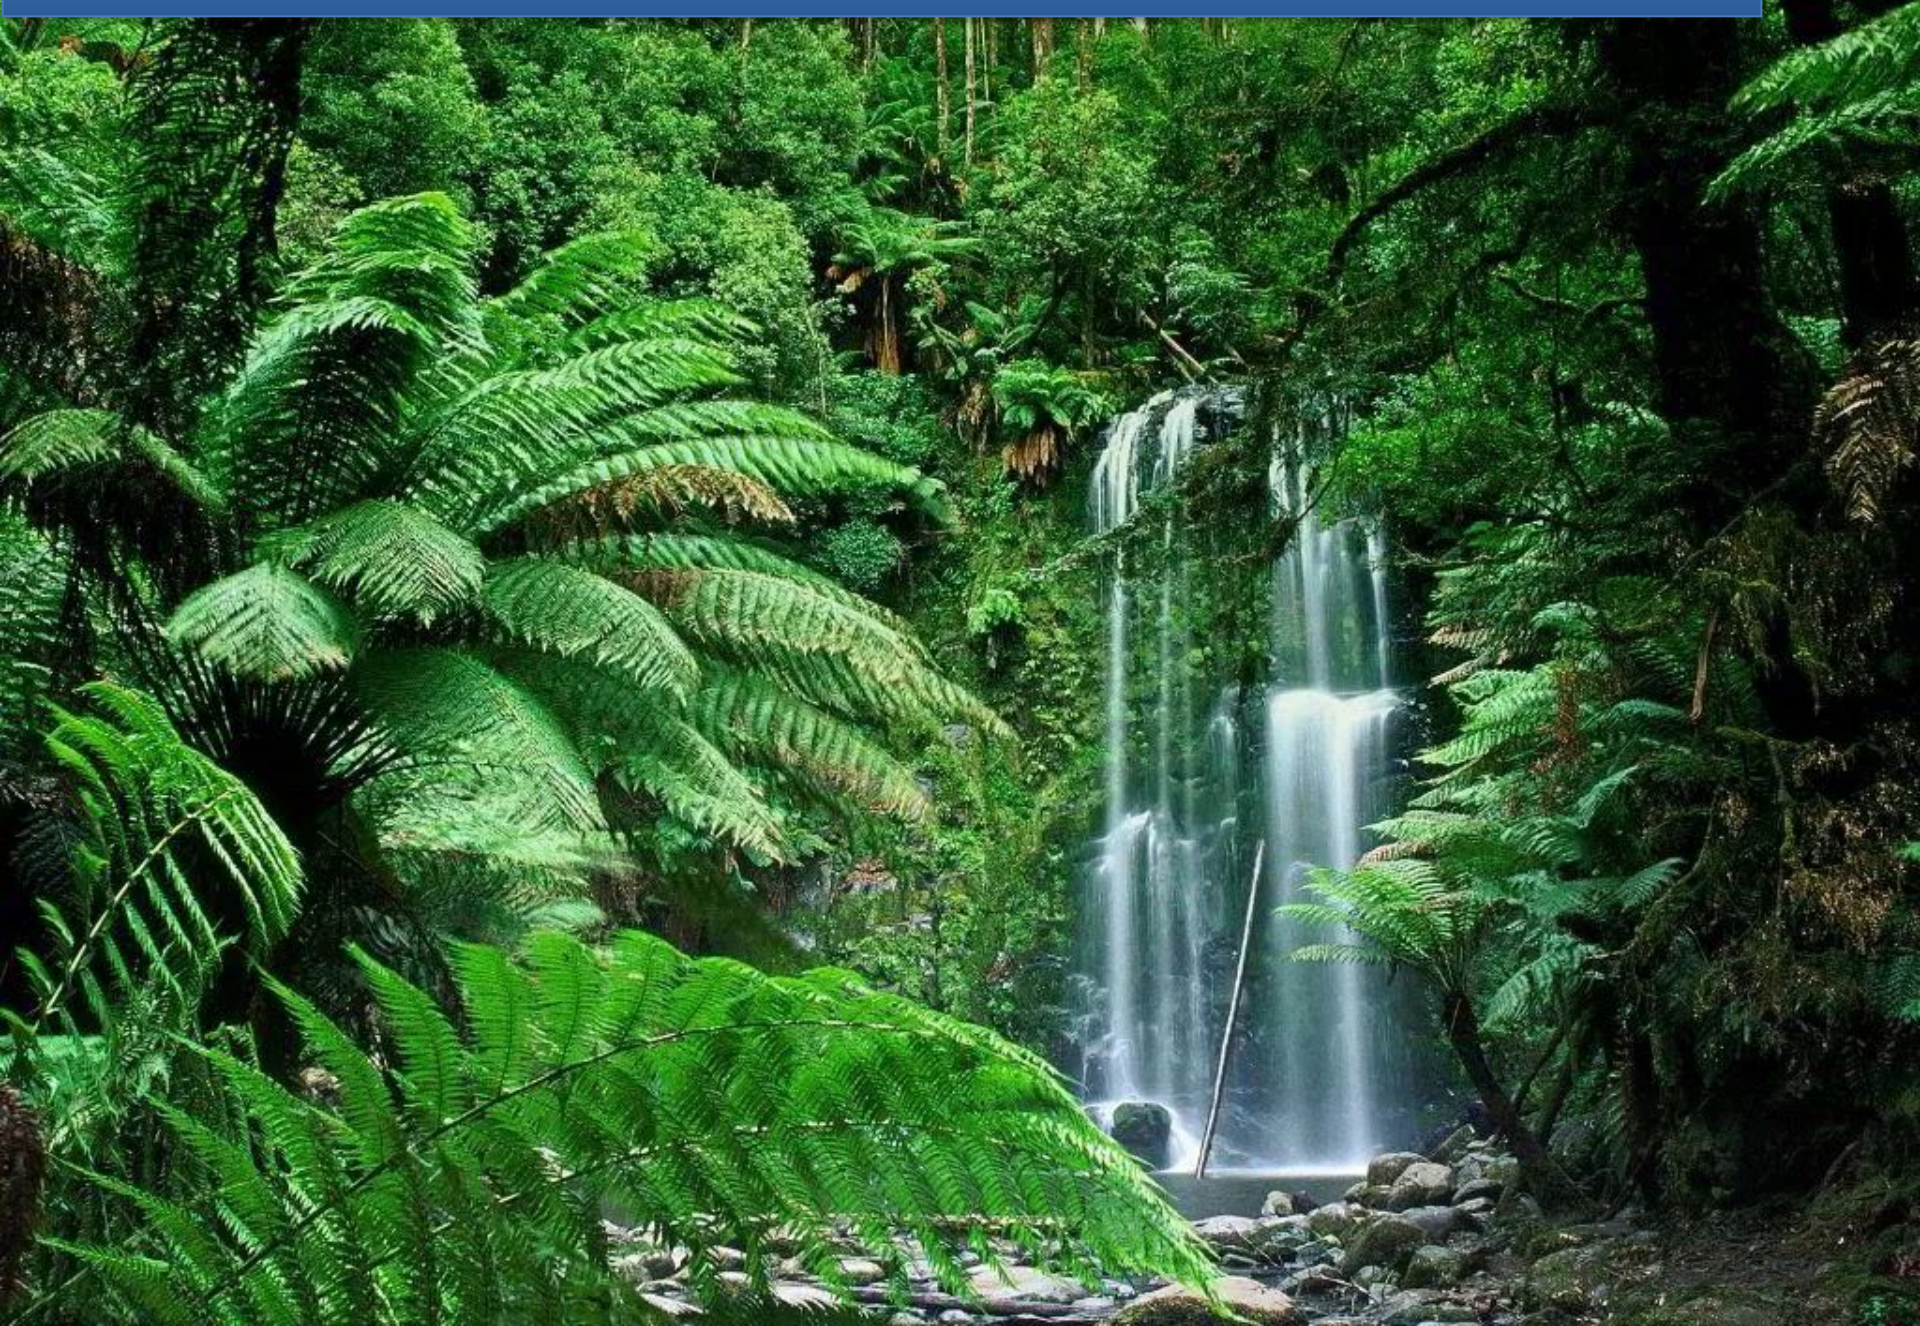

BY STUDENTS

CLASS 10 «D»

ASYA KUSK AND DASHA ZLOBINA

Rainforest is described as tall, hot and dense forest near the equator and is believed to be the oldest living ecosystems on Earth which gets maximum amount of rainfall.

You can find rainforests in many countries, not just in South America. They can be found in Alaska and Canada, as well as Asia, Africa and Latin America.

There are two different types of rainforests, and they include both temperate and tropical. Rainforests help to regulate the temperatures around the world and the weather patterns as well. Rainforests help to maintain our supply of drinking water and fresh water, so they are critical in the

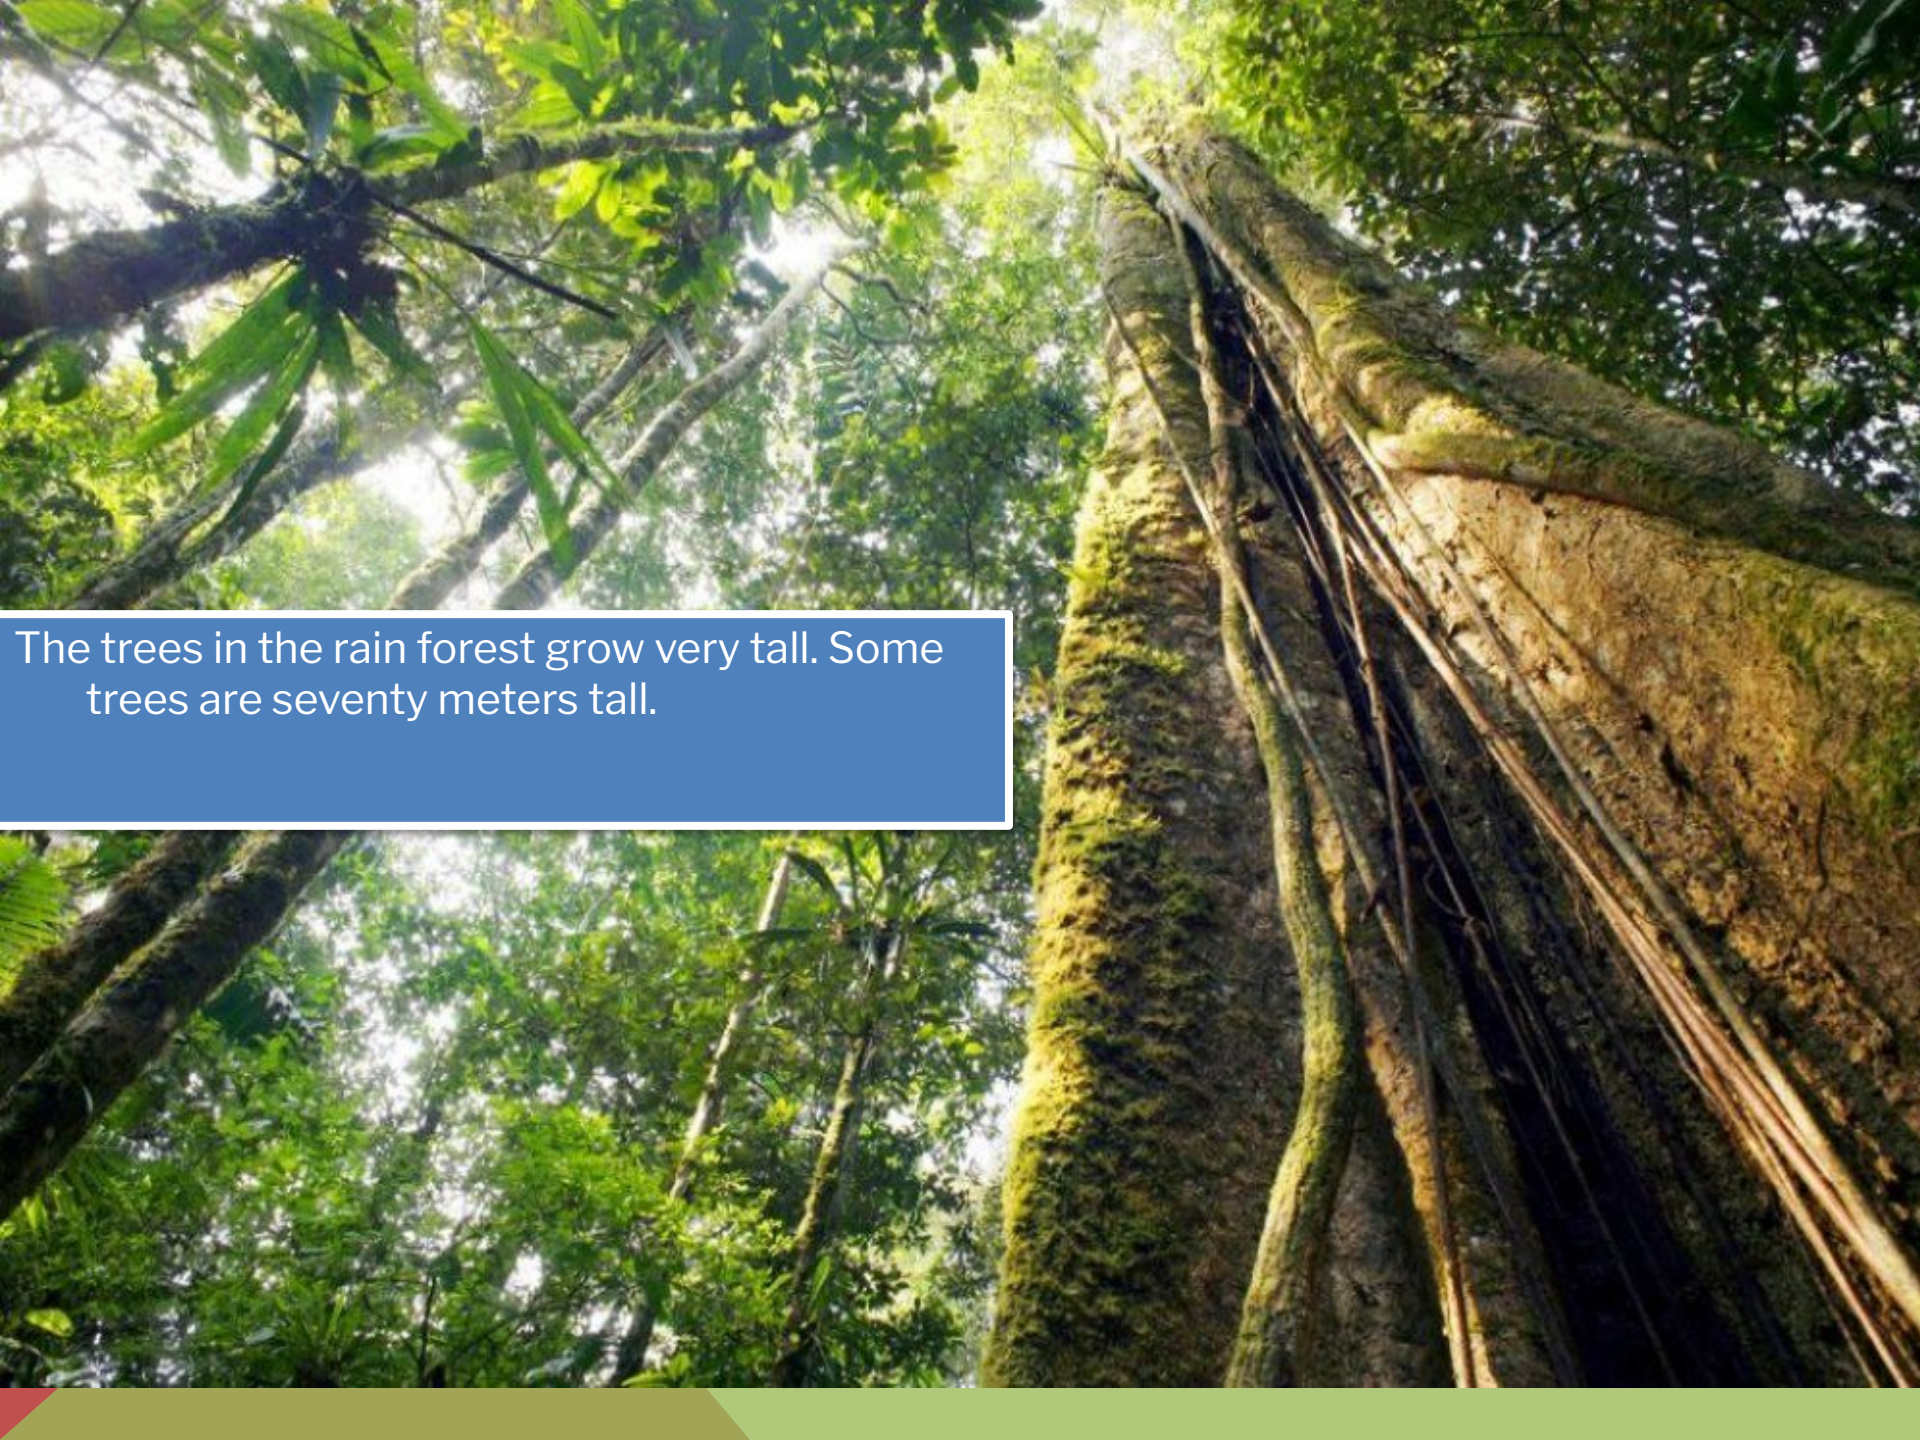

About 1/4 of natural medicines have been discovered in rainforests. Within four square miles of tropical rainforest, you will find 1500 flowering plant species, 750 types of trees, and many of these plants can be helpful in combating cancer. 70% or more of the plants that are used to treat cancer are found only in the tropical rainforests on the planet.

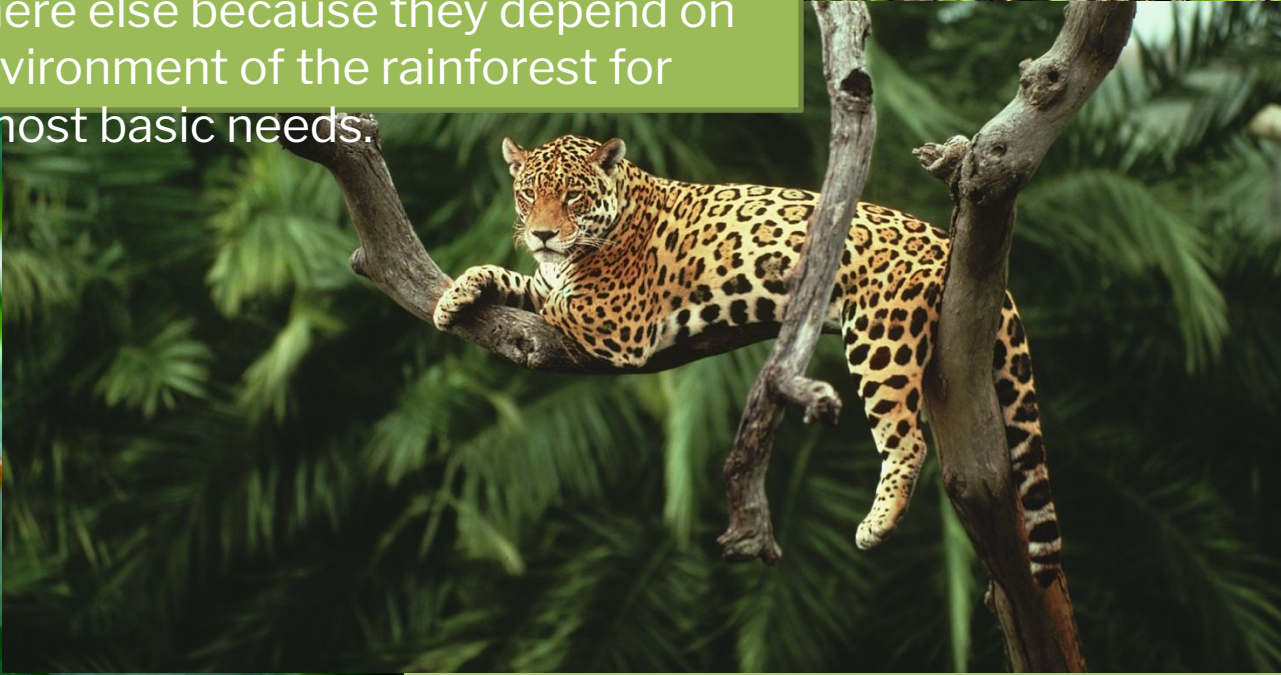

The trees in the rain forest grow very tall. Some trees are seventy meters tall.

There are a lot of different types of animals that can be found in the rainforest, and most of them cannot live anywhere else because they depend on the environment of the rainforest for their most basic needs.

# CINQUAIN

Jungle

Impassable and wild

To get lost, to alive, to get through

Be strong every time

Tropics

Tropical forest

Enticing and dangerous

To wander, to search, to find

It's like our living

Jungle

❖ Джунгли

Непроходимые и дикие

Заблудиться, выживать, пробираться

Быть сильным каждую минуту

Тропические леса
