

# Borland®

function

Interface

# Delphi™

Enterprise

# 7

Mavzu: Ilova  
oynasiga ma'lumot  
joylash.

---

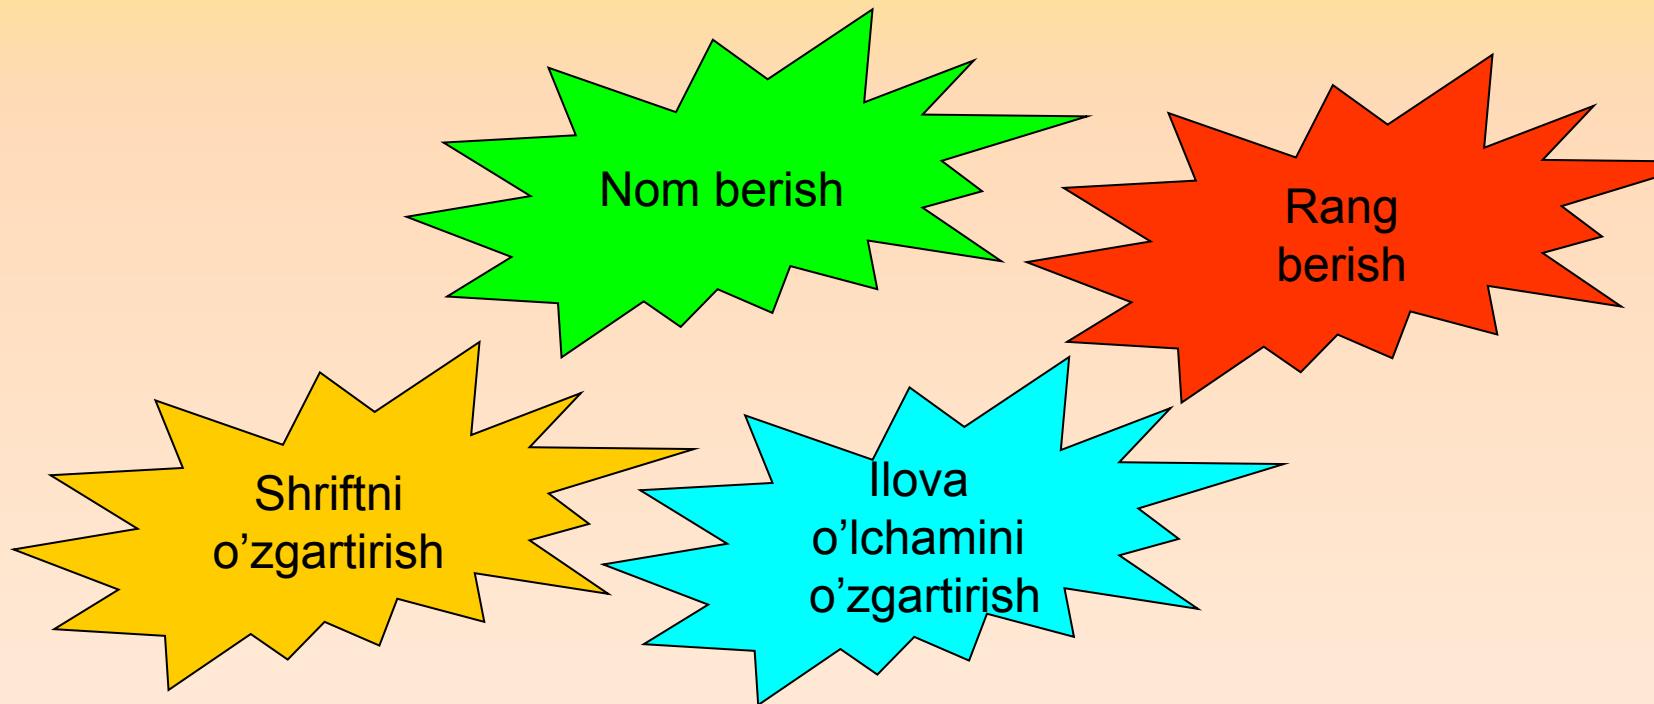

# **Ta'limiy o'yin**

## **“Tanlab ol !”**

*Javob variantlari ichidan qaysi rangli  
javob to'g'ri bo'lsa, o'sha rangdagi  
kartochkani ko'taring.*

# **“TANLAB OL” DIDAKTIK O’YIN**

Savol: **Caption xossasining vazifasi nima?**

# **“TANLAB OL” DIDAKTIK O’YIN**

**Savol: IntToStr funksiyasi qanday vazifani amalga oshiradi?**

Satrli turdag  
o’zgaruvchini  
butun turga  
o’zgartirib beradi

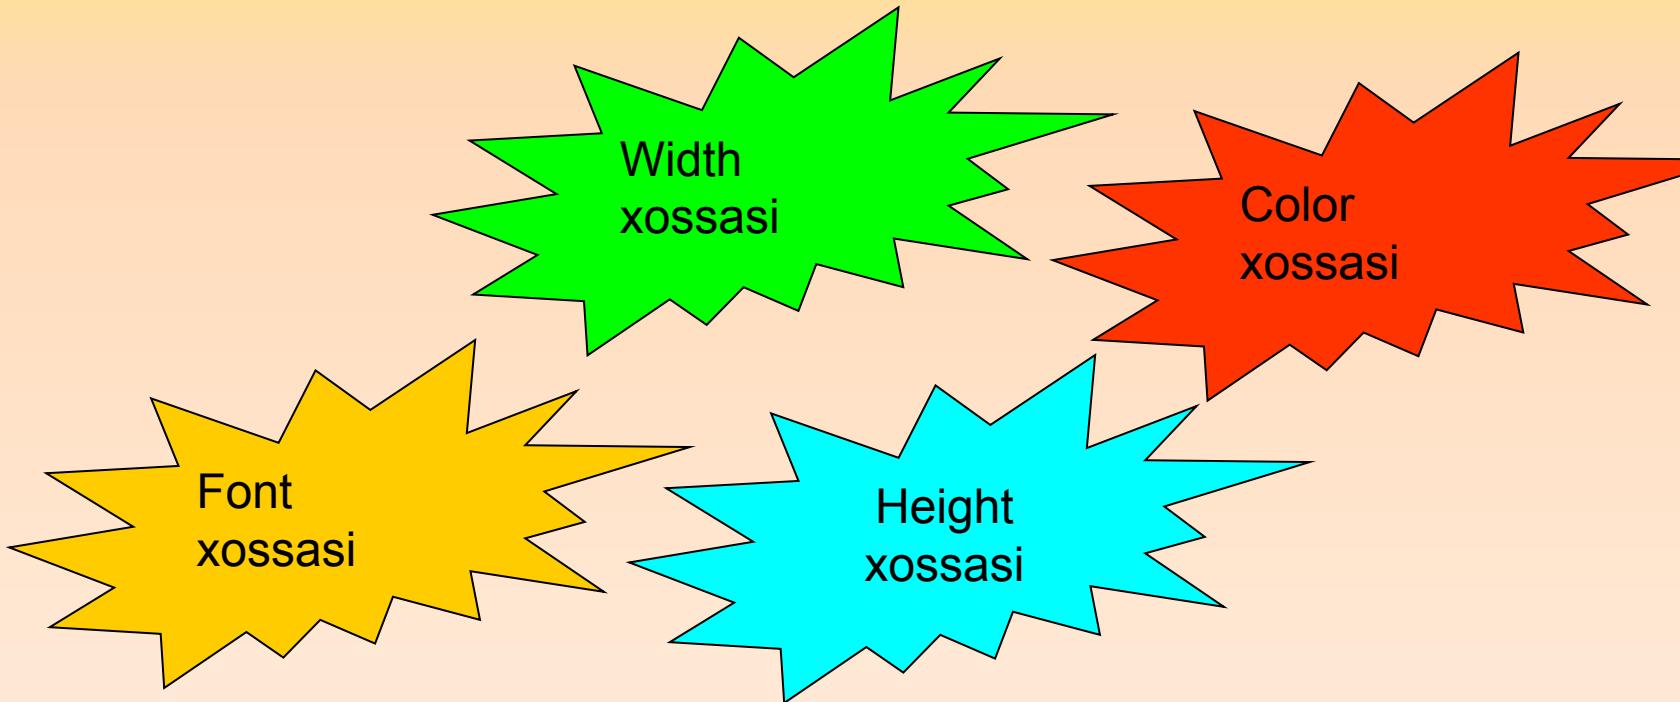

O’zgaruvchinin  
g bir turi  
hisoblanadi

Butun turdag  
o’zgaruvchini  
satrli turga  
o’tkazib  
beradi

Sarlavhaga ilova  
oynasining  
o’lchamini  
yozish

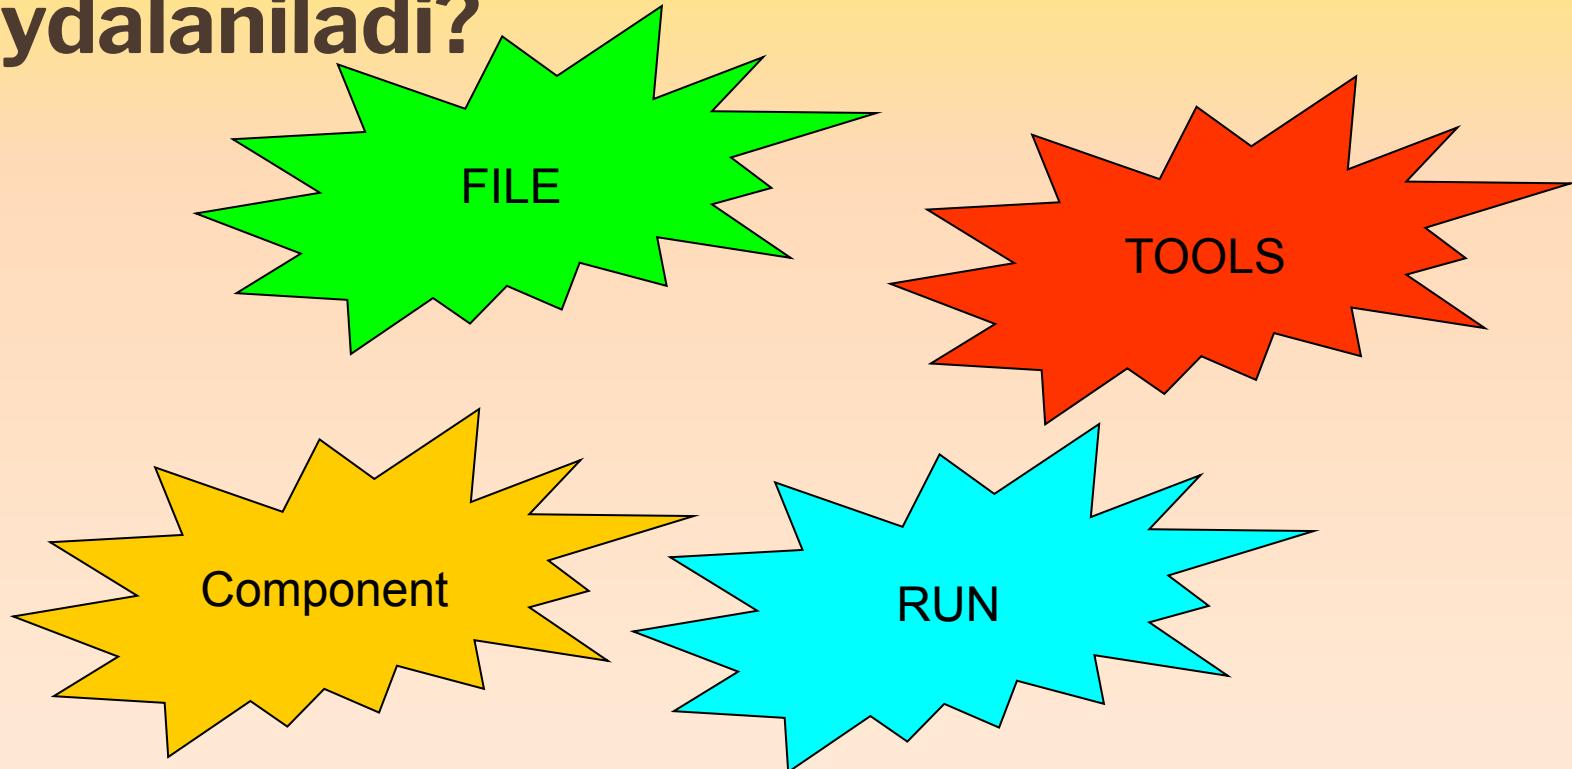

# **“TANLAB OL” DIDAKTIK O’YIN**

□ Savol: Ilova oynasining balandligini o’zgartirish xossasi qaysi javobda ko’rsatilgan?

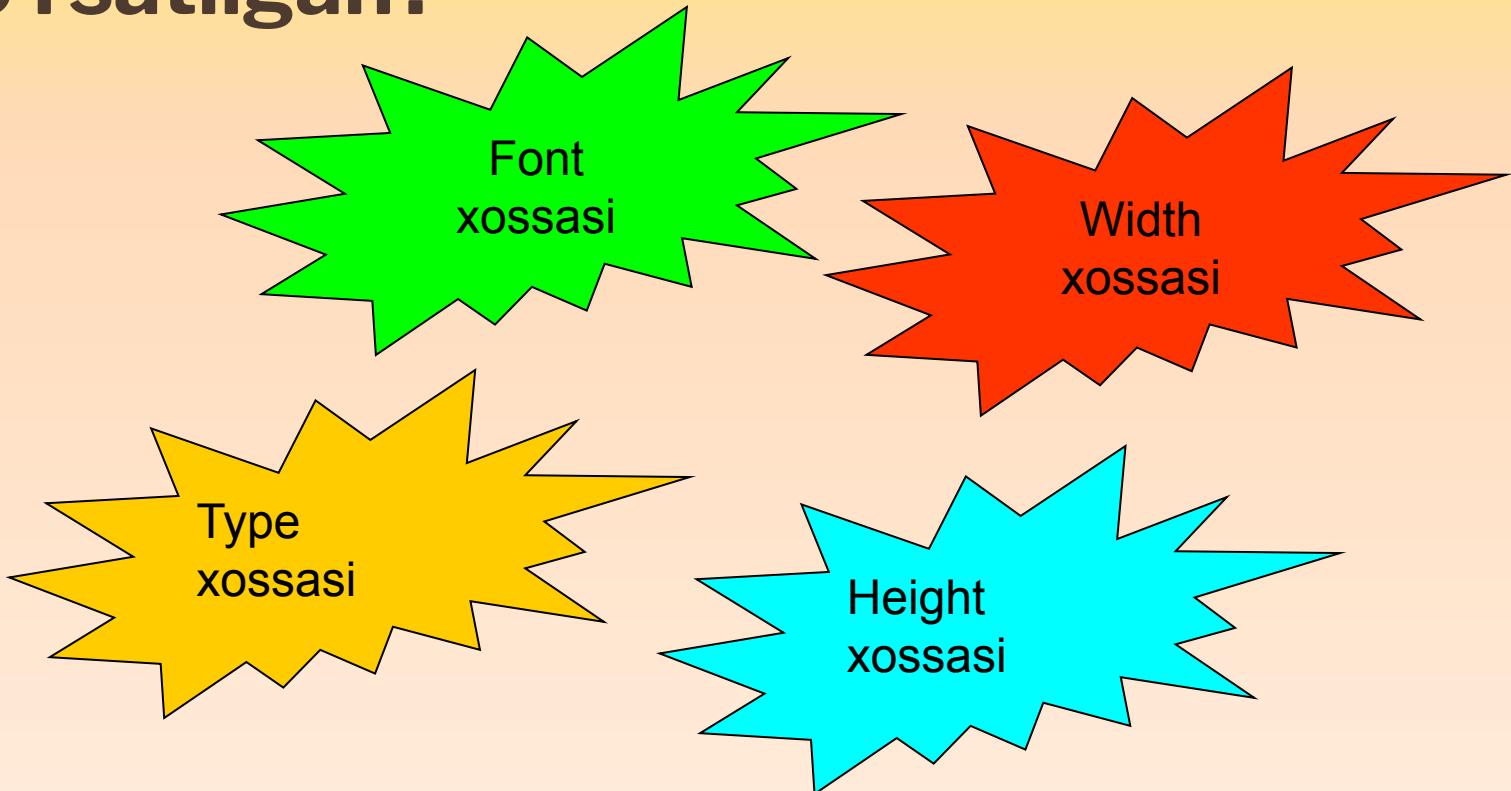

# “TANLAB OL” DIDAKTIK O’YIN

Savol: **Delphida dasturni ishga turshirish uchun qaysi menyu buyrug’idan foydalaniladi?**

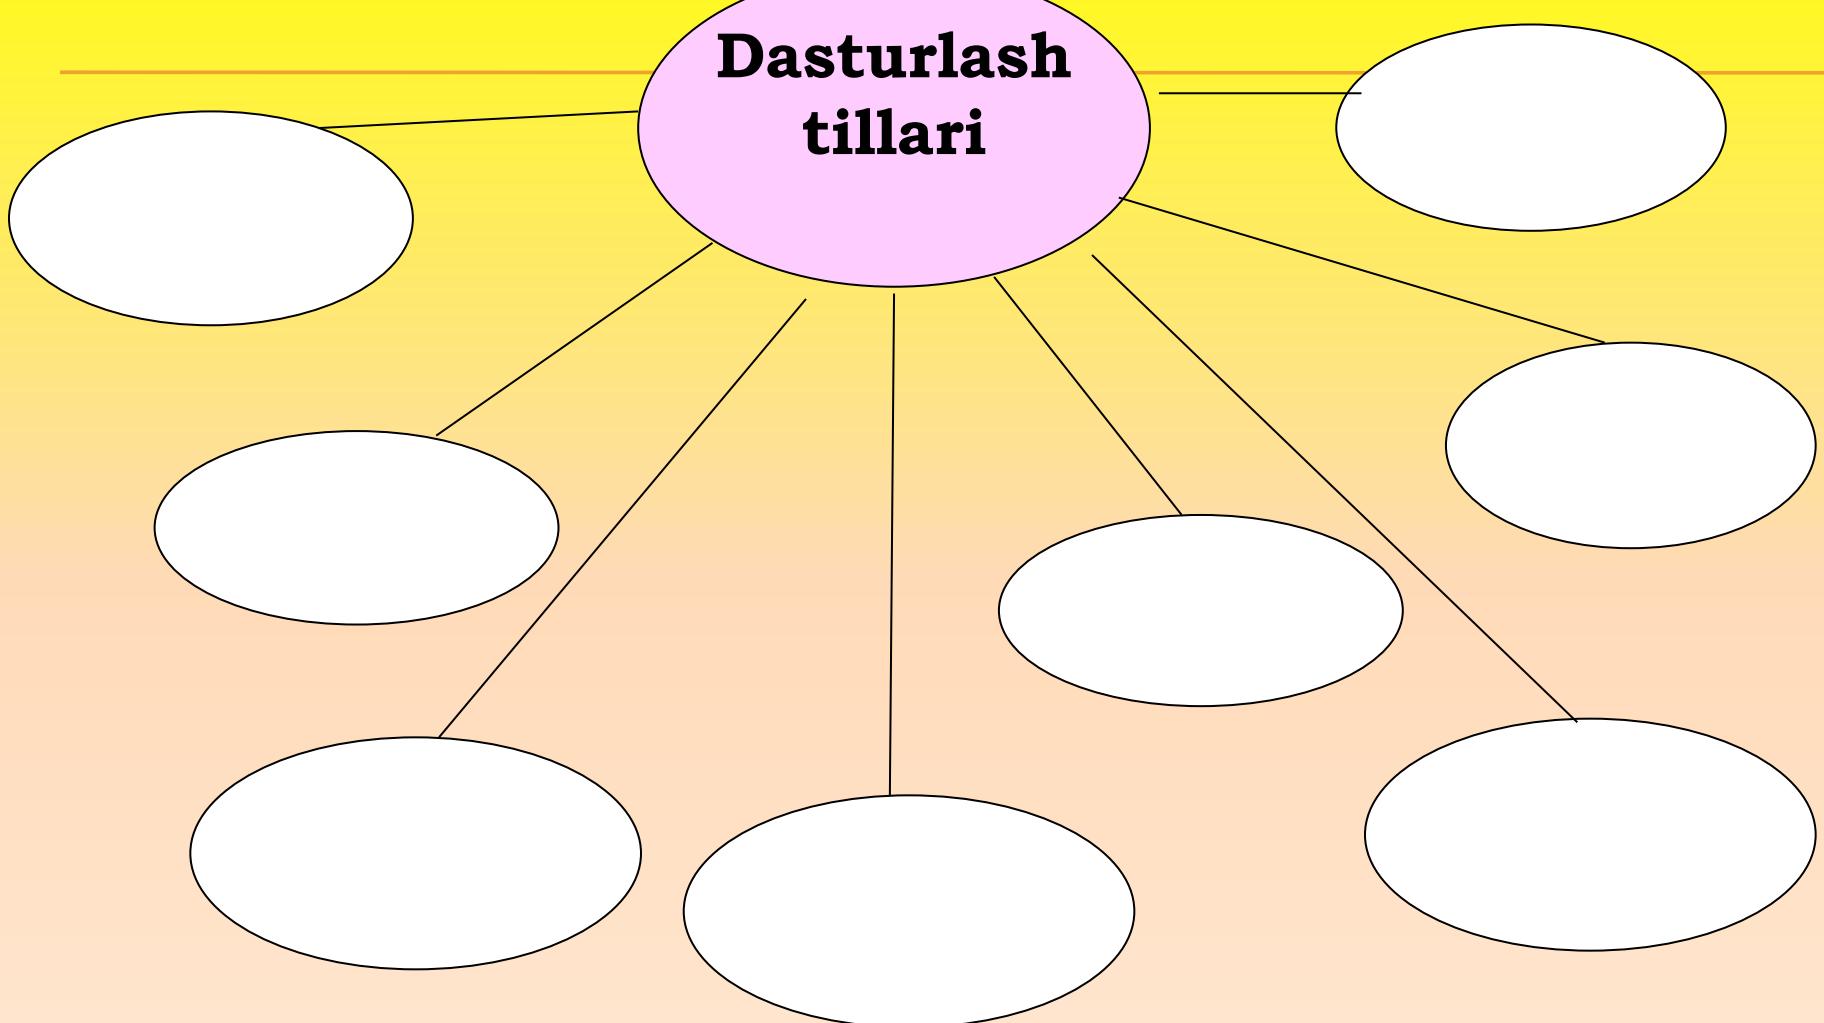

# **“TANLAB OL” DIDAKTIK O’YIN**

□ Savol: Ilova oynasining kengligini o’zgartirish xossasi qaysi javobda ko’rsatilgan?

## Dasturlash tillari

## **Dasturlash tillari**

**Paskal**

**Delphi**

**Fortran**

**Beysik**

**C++**

**Java**

**Algol**

**Java  
Script**

O'quvchi darsni o'zlashtirgandan so'ng quyidagi

BKMlarga ega bo'ladi:

*Delphi dasturini ishga tushirish*

*Delphi dasturi oynalari bilan ishlash*

*Button boshqarish tugmasini ilova oynasiga joylash*

*Label bosqalarish tugmasini ilova oynasiga joylash*

# **DARS DAVOMIDA QO'LLANILADIGAN TAYANCH IBORALAR**

**Form – ilova**

**Caption - nom berish xossasi**

**Width - ilova oynasi kengligini o'zgartirish  
xossasi**

**Height - ilova oynasi balandligini o'zgartirish  
xossasi**

**Left - ilova oynasining chap tomonga nisbatan  
joylashuvi**

**Top - ilova oynasini tepasidan joy qodirish**

**Color - rang berish xossasi**

**Label - ma'lumot yozish xossasi**

## **LABEL BOSHQARISH OBYEKTI**

---

**Label boshqarish tugmasi yordamida foydalanuvchi uchun ilova oynasiga ma'lumotlar, tushuntirishlar yoki belgi va nishonlar kiritish mumkin.**

Ilova oynasiga **Label** boshqarish obyektini joylashtirish uchun Delphi komponentlar panelidagi **A** tugmasini tanlab ilova oynasiga sichqoncha chap tugmasini bosamiz.

# **Label boshqarish tugmasi xossalari ni o'zgartirish**

**Labelning asosiy xossasi **Caption**(nom)  
dir.**

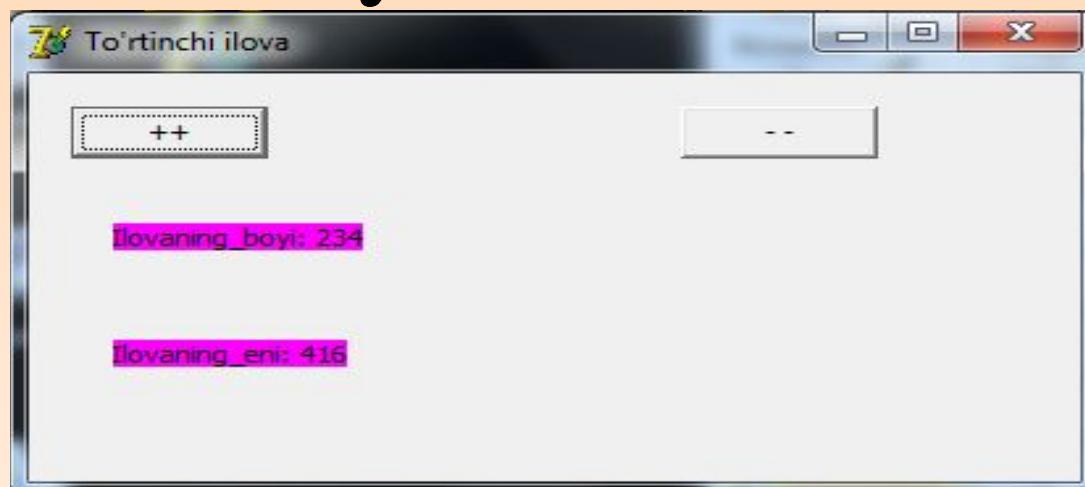

**Color** xossasi yordamida labelning  
rangini o'zgartirish mumkin.

**Label ilovaga joylashtirilishi bilan  
unga avtomatik ravishda **Label1, Label2,  
Label3, ...** tarzda nom beriladi.**

**Dastur kodi oynasida esa  
**Label1.Caption:=** kabi yoziladi. Masalan:  
**Label1.Caption:='Oynaning eni:'****

**Ilova oynasiga labelni joylash va unda  
oynaning bo'yi hamda eni haqidagi  
ma'lumotlarni dastur yozib borishi uchun  
quyidagilarni bajaramiz:**

**Buning uchun ilova oynasi o'lchamlarini  
kattalashtirish va kichiklashtirish uchun  
ikkita tugmadan, oyna o'lchamlarini  
ko'rsatish uchun ikkita labeldan  
foydalanamiz.**

## **1-qadam: Ilova oynasi xossalari ni o'zgartirish**

---

- ◆ **Form1.Caption:= 'To"rtinchi  
ilova';**
- ◆ **Form1.Height:=225;**
- ◆ **Form1.Width:=400;**
- ◆ **Form1.Left:=200;**
- ◆ **Form1.Top:=100;**

**2-qadam: Ilova oynasiga obyektlarni  
joylash va ularning xossalalarini o’rnatish  
(Obyektlar boruzeri oynasi yordamida)**

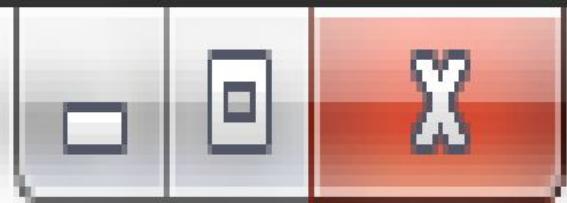

- ◆ **Button1.Caption:=’++’;**
- ◆ **Button2.Caption:=’--’;**
- ◆ **Label1.Caption:=’Oynanining  
bo”yi: ’;**
- ◆ **Label2.Caption:=’Oynanining eni:  
’;**

**3-qadam: Ilova oynasini kattalashtirish  
va kichraytirish, ilovaning bo'yi va eni  
haqida ma'lumot olish uchun Button1ni  
ikki marta tez bosib hosil bo'lgan  
dastur kodi oynasiga quyidagilarni  
yozamiz:**

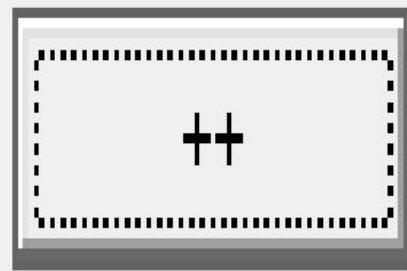

- ◆ **Form1.Width:=Form1.Width+16;**
- ◆ **Form1.Height:=Form1.Height+9;**
- ◆ **Label1.Caption:='Oynaning\_bo''yi: ' +  
IntToStr(Form1.Height);**
- ◆ **Label2.Caption:='Oynaning\_eni: ' +  
IntToStr(Form1.Width);**

To'rtinchi ilova

Oynaning\_bo'yic:198

Oynaning\_eni:352

---

# Tushunchalr tahlili

Tushuncha nomi	Ta'rifi
IntToStr	Butun sonli o'zgaruvchini satrli turga aylantirib beradi
Label	Foydalanuvchi uchun belgi, nishon va ma'lumot yozish uchun boshqarish tugmasi
Height	Ilova oynasining balanligini o'rnatish xossasi
Left	Ilova oynasini chap tomonidan qoladigan joyni
Top	ilova oynasini tepasidan qoladigan joyni aniqlaydi
Caption	Nomni o'zgartirish
A	Label boshqaruv tugmasini ilovaga joylash komponenti
ShowMessage	Foydalanuvchiga xabar chiqarish oynasi

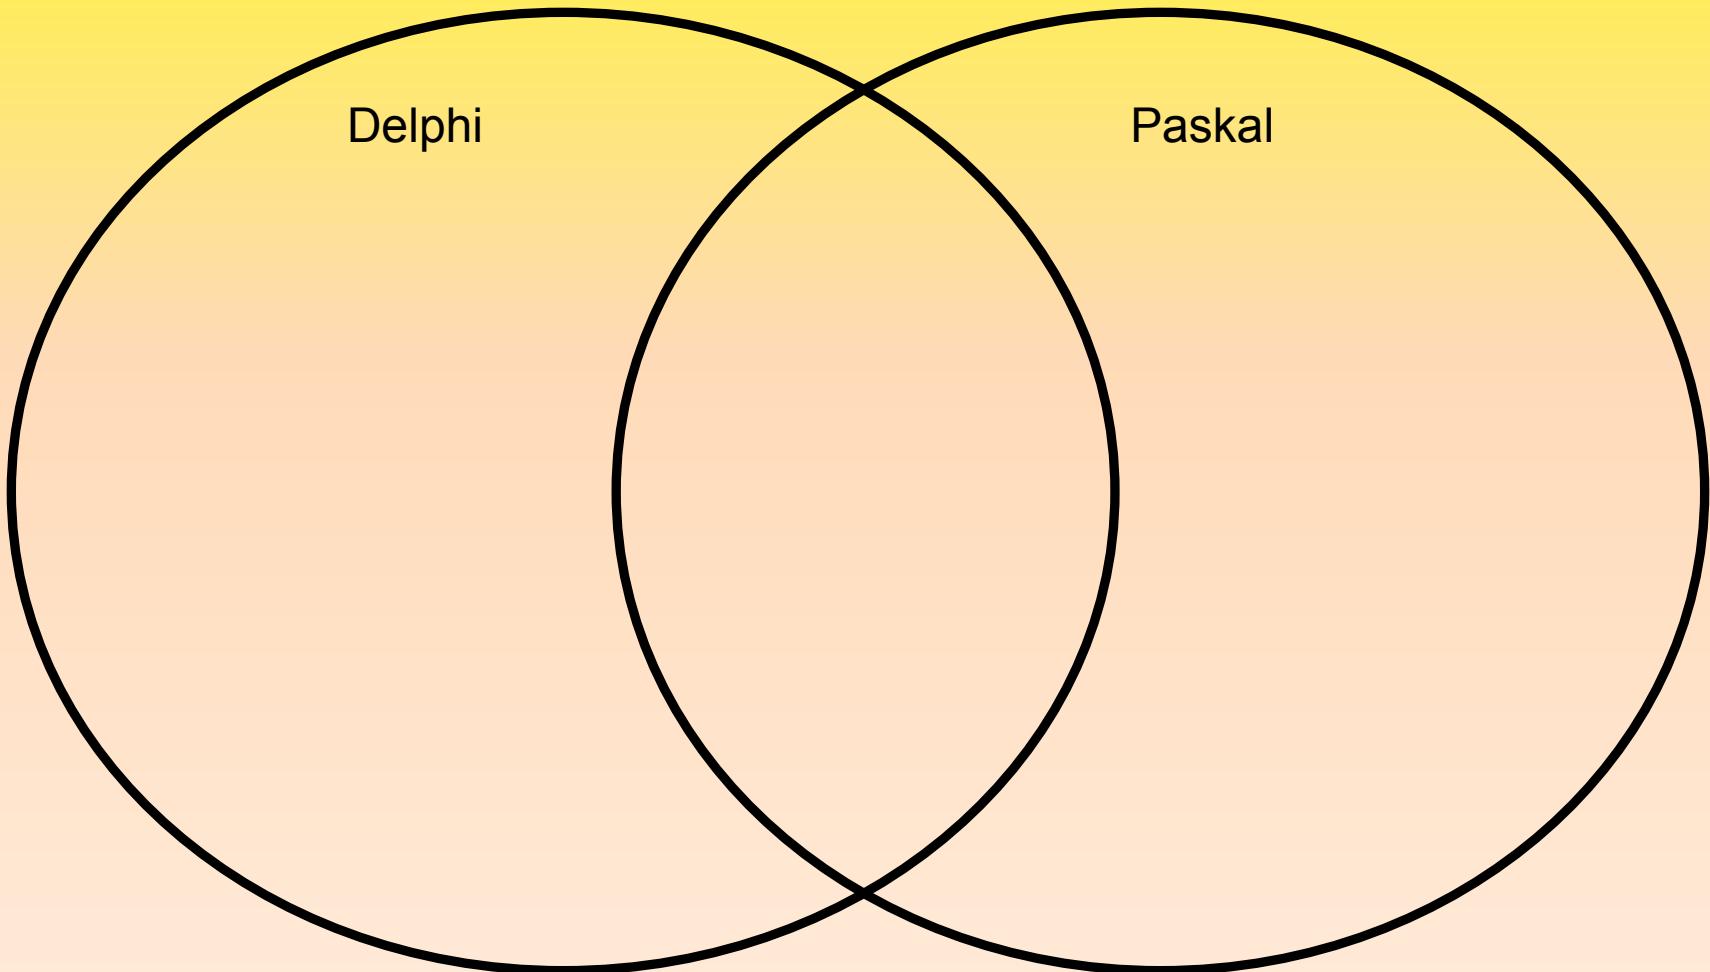

## Aqliy hujum savollari

- 1.Delphida yaratilgan ilovani yangi joyda, yangi nomda saqlash ketma-ketligini ayting?
- 2.Delphi dasturidagi Label tugmasining vazifasi?
- 3>ShowMessage oynaasining vazifasi nima?
- 4.Top xossasining vazifasi nima?
- 5.Height xossasining vazifasi nima?
- 6.Dastur nechta oyna bilan ishlaydi?
- 7.Ilova oynasini chap tomondan qoladigan joyni qaysi xossa yordamida aniqlaymiz?
- 8.F9 tugmasining vazifasi nima?
- 9.Caption xossasining vazifasi nima?
- 10.Ilova oynasining xossalari qaysi oynada joylashgan bo'ladi?
- 11.Ilova oynasining kengligi qaysi xossa yordamida o'zgartiriladi?
- 12.Delphida yangi ilova qanday yaratiladi?
- 13.Color xossasining vazifasi nima?
- 14.Dasturni ishga tushirish usullarini sanab bering?
- 15.Ilovadagi obyektlarning daraxtsimon ko'rinishi qaysi oynada ko'rinib turadi?
- 16.Dastur kodi oynasining vazifasi nima?
- 17.File menyusining Save all buyrug'I nima vazifani bajaradi?
  - Delphi dasturiga kirish usullari?
- 1.IntToStr funksiyasining vazifasi nima?
2. File-Exit ketma-ketligi vazifasi nima?

## **VENN DIAGRAMMASI**

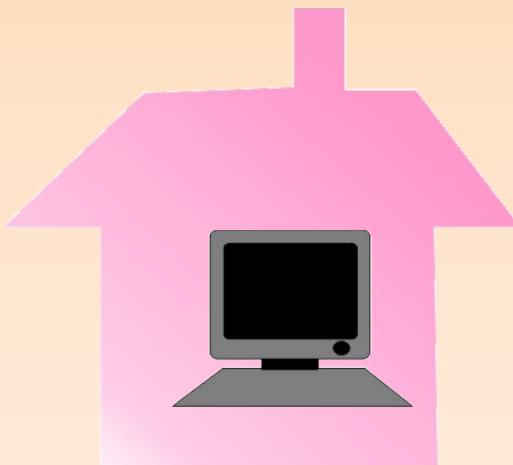

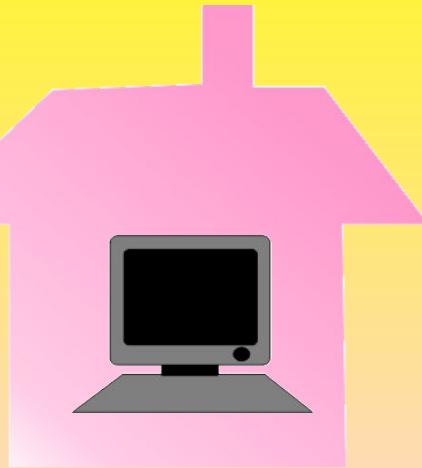

### **Dasturlash tillarining o'xshashligi va farqi**

---

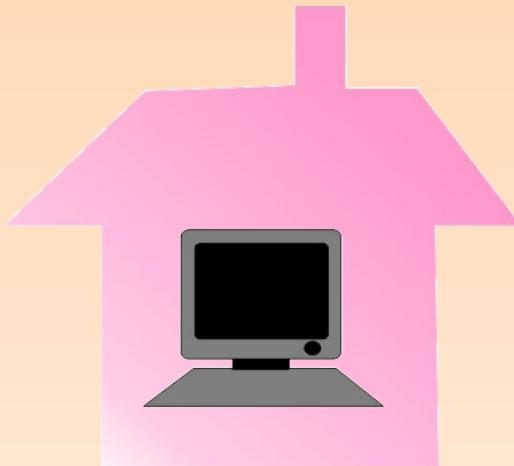

---

vuyga  
vazifa:

**1.Label boshqarish obyektining  
vazifasini yod olish.**

**2.Label boshqarish obyektining  
xossalalarini yozib kelish**
