# Электронные журналы

The screenshot shows two overlapping browser windows. The background window is titled "Health InterNetwork - Microsoft Internet Explorer" and displays the "Health InterNetwork Access to Research Initiative" page. The page includes a navigation menu on the left, a main content area with a "Using Journals through HINARI" section, and a right sidebar with "Reference sources full-text" and "Free collections" lists. The foreground window is titled "MetaPress - Publication - Microsoft Internet Explorer" and shows the "Acta Oncologica" journal page. This page features a search bar, a list of issues, and a "Quick Search" section. A red arrow points from the "Free collections" sidebar in the background window to the "Acta Oncologica" journal cover in the foreground window.

# Бесплатные медицинские журналы ([www.freemedicaljournals.com](http://www.freemedicaljournals.com))

The screenshot shows the website 'FreeMedicalJournals.com' in a Microsoft Internet Explorer browser window. The browser's address bar shows 'http://www.freemedicaljournals.com/'. The website's logo features a stylized orange and grey 'F' and 'J' with the text 'FreeMedicalJournals.com' and the tagline 'Promoting free access to medical journals'. Below the logo is a navigation menu with links for 'Home', 'HIV Medicine', 'Free Amedeo', 'Books', 'Journal Alert', and 'Medicine on Earth'. The main content area is divided into two columns. The left column lists '> 1380 Journals, sorted by:' followed by two sections: '1. Specialty' and '2. Title'. The 'Title' section lists languages: English (A-B, C-H, I-J, L-Q, R-Z), French, German, Spanish, Portuguese, and other languages. Below this is a 'Journal Alert About' link. The right column contains a subscription prompt for 'free AMEDEO?', a paragraph about the importance of free medical journals, a link to 'Journal Alert', and a 'Comments' section listing 'British Medical Journal, Science'. Below this is a 'Free journals, impact factor' section with a list of journals and their impact factors: CA (35,933), Journal of Clinical Investigation (14,118), BMJ (4,994), MMWR (Morbidity and Mortality Weekly Report) (3,688), Endocrine-Related Cancer (3,579), Biochemical Journal (3,560), and Emerging Infectious Diseases (3,560). Further down is a 'Journals sorted by specialty' section and a 'Free one to six months after publication' section listing journals like New England Journal of Medicine, JAMA, Journal of Cell Biology, American Journal of Human Genetics, and Molecular and Cellular Biology.

Journal Alert  
About

Have you subscribed to **free AMEDEO ?**

**Free Medical Journals** - Over the next few years, many important medical journals will be available online, free and in full-text. The access to free scientific knowledge will have a major impact on medical practice and attract Internet visitors to these journals. Journals that restrict access to their Web sites will lose popularity.

If you wish to be informed about new free journals, you may subscribe to our [Journal Alert](#). The Free Medical Journals Site is dedicated to the promotion of free access to medical journals over the Internet.

# КОКРАНОВСКАЯ БИБЛИОТЕКА на CD. Результат поиска “heart attack”

The screenshot displays the interface of The Cochrane Library 2003, Issue 3. At the top, the search bar contains the query "Heart attack" with a "Go" button. Below the search bar, it indicates "(heart next attack) - 190 hits" and provides options to "View selected", "Unselect all", and "Save selected".

The main content area is divided into two columns. The left column lists search results under the heading "The Cochrane Database of Systematic Reviews (27 out of 3058)". It includes a sub-section for "Complete reviews (20 out of 1754)" with a list of 20 items, each with a checked checkbox. The items are:

1. Community interventions for reducing smoking among adults.
2. Continuous positive airways pressure for obstructive sleep apnoea.
3. **Update** Dietary advice given by a dietitian versus other health professional or self-help resources to reduce blood cholesterol.
4. Dietary treatment for familial hypercholesterolaemia.
5. Digitalis for treatment of congestive heart failure in patients in sinus rhythm.
6. Dipyridamole for preventing stroke and other vascular events in patients with vascular disease.
7. Effect of the treatment of Type II diabetes mellitus on the development of cognitive impairment and dementia.
8. Exercise-based rehabilitation for coronary heart disease.
9. Fish oil in people with type 2 diabetes mellitus.
10. Information provision for stroke patients and their caregivers.
11. Low molecular weight heparins versus unfractionated heparin for acute coronary syndromes.
12. **Comment** Mass media interventions: effects on health services utilisation.
13. Oral anticoagulants versus antiplatelet therapy for preventing further vascular events after transient ischaemic attack or minor stroke of presumed arterial origin.
14. Pharmacotherapy for hypertension in the elderly.
15. Pharmacotherapy for hypertension in women of different races.
16. Prostacyclin and analogues for acute ischaemic stroke.
17. Reduced or modified dietary fat for preventing cardiovascular disease.
18. Rofecoxib for rheumatoid arthritis.
19. School-based programmes for preventing smoking.
20. Vasoactive drugs for acute stroke.

Below the complete reviews, there are sections for "Protocols (7 out of 1304)", "Database of Abstracts of Reviews of Effectiveness (5 out of 4122)", "The Cochrane Central Register of Controlled Trials (CENTRAL) (141 out of 375143)", and "The Cochrane Database of Methodology Reviews (3 out of 14)".

The right column features the "2003 Issue 3" logo and the text "the best single source of reliable evidence about the effects of health care". It also includes a brief description of the Cochrane Library's mission and a list of links: "About the Cochrane Library", "Using The Cochrane Library", "Comments and feedback", "Technical support", "Reviewers' Handbook", "Reviewers' Handbook (Glossary)", and "Release notes".

At the bottom of the page, the "UPDATE SOFTWARE" logo is visible, along with the copyright notice "Copyright: Update Software Limited 2003".

# КОКРАНОВСКАЯ БИБЛИОТЕКА на CD

## Пример систематического обзора

The screenshot displays the Cochrane Library interface. The search bar contains the text "heart attack" and shows 190 hits. The left sidebar lists various reviews, with "Dipyridamole for preventing stroke and other vascular events in patients with vascular disease" selected. The main content area shows the title of the review, the authors (De Schryver ELLM, Algra A, van Gijn J), and the date of the most recent substantive amendment (25 February 2002). The abstract section includes the following text:

**Background**  
Patients with transient ischaemic attacks (TIA) and minor ischaemic strokes are at risk of serious vascular events (death from all vascular causes, non-fatal stroke, or non-fatal myocardial infarction). Their risk of vascular events lies between 4 and 11 percent per year. Aspirin only, in a daily dose of 30 mg or more, offers only modest protection in such patients: it reduces the incidence of major vascular events by 13 percent. In a single trial, adding dipyridamole (an alternative antiplatelet agent) to aspirin was associated with a 22 percent reduction in the risk of major vascular events compared with aspirin alone. However, a systematic review of all trials of antiplatelet agents by the Antithrombotic Trialists' Collaboration showed that, in high risk patients, there was virtually no difference between the aspirin-dipyridamole combination and aspirin alone. We therefore sought to assess the effects of dipyridamole in more detail.

**Objectives**  
1) To assess the efficacy of dipyridamole versus control in the secondary prevention of vascular events in patients with vascular disease in the presence and absence of other antiplatelet drugs.  
2) To assess the safety of dipyridamole versus control in the secondary prevention of vascular events in patients with vascular disease in the presence and absence of other antiplatelet drugs.

**Search Strategy**  
The Cochrane Stroke Group Trials Register was searched and other relevant Cochrane Groups were contacted to search their specialised registers (last search 29 April 2002). In addition the Cochrane Controlled Trials Register, MEDLINE and EMBASE were searched and Dutch manufacturers of dipyridamole were contacted to identify further published and unpublished studies.

**Selection Criteria**  
Randomised long term secondary prevention trials with concealed treatment allocation, treatment for > 1 month, starting within 6 months after presentation of a arterial vascular disease were selected (coronary artery disease, myocardial infarction, angina pectoris, retinopathy, nephropathy, peripheral arterial disease, stroke, TIA, amaurosis fugax). Therapy consisted of dipyridamole in any dose in the presence or absence of other antiplatelet drugs compared with no drug or an antiplatelet drug(s) other than dipyridamole (control group).

**Data collection and analysis**  
Two reviewers selected trials which met the inclusion criteria and extracted details of randomisation methods, blinding of treatments and assessments, whether intention-to-treat analysis was possible from the published data, whether treatment groups were comparable with regard to major prognostic factors, the number of patients who were excluded or lost to follow-up, definition of outcome events, and entry and exclusion criteria. The methodological quality of each trial was assessed by the two reviewers on the basis of these extracted data. In addition, dose and type of antiplatelet treatments, duration of follow-up, and the number of defined outcome events were recorded. Data published by the Antithrombotic

# ЭЛЕКТРОННЫЕ БИБЛИОТЕКИ УНИВЕРСИТЕТОВ.

## Виртуальный госпиталь Университета Штата Айова ([www.vh.org](http://www.vh.org))

The image shows a screenshot of a Microsoft Internet Explorer browser window displaying the Virtual Hospital website. The browser's address bar shows the URL: [http://www.vh.org/navigation/vh/groups/body\\_location\\_systems-blood\\_lymphatic\\_system.html](http://www.vh.org/navigation/vh/groups/body_location_systems-blood_lymphatic_system.html). The website header includes the Virtual Hospital logo and navigation links for providers and patients. The main content area is titled "Body Location/Systems -- Blood/Lymphatic System" and features a list of links for various conditions such as Anemia, Bleeding Disorders, and Bone Marrow Transplantation. A smaller browser window is overlaid on the main page, displaying the "Bone Marrow Transplantation" page. This page includes a navigation menu for "Health Topics A-Z" and specific links for "For Adult Patients" (Understanding Blood Tests: A Guide for Patients with Cancer) and "For Pediatric Patients" (Pediatric Bone Marrow Transplant: A Guide for Families). The bottom of the screenshot shows the Windows taskbar with the Start button and several open applications.

# Сайты профессиональных ассоциаций. Общество сердечно-сосудистой патологии. ([www.scvp.net](http://www.scvp.net))

**НАШ ИНСТИТУТ**

Первый Ташкентский Государственный Медицинский Институт был создан в 1918 году и на сегодняшний день является одним из ведущих ВУЗов республики Узбекистан, а также одним из крупнейших научно-исследовательских центров. На факультетах нашего института обучается около 3000 студентов по программе врача общей практики, 200 клинических ординаторов (программа магистратуры) более 100 аспирантов и докторантов. Институт занимается подготовкой специалистов лечебного дела и стоматологов. В институте работают ведущие специалисты по хирургии, терапии, акушерству и гинекологии, реанимации, интенсивной терапии и анестезиологии, стоматологии, а также специалисты по биохимии, фармакологии, морфологии и другим медико-биологическим дисциплинам, которые помимо преподавательской работы занимаются научно-исследовательской деятельностью.
